

# Installing Symantec Endpoint Protection for Windows

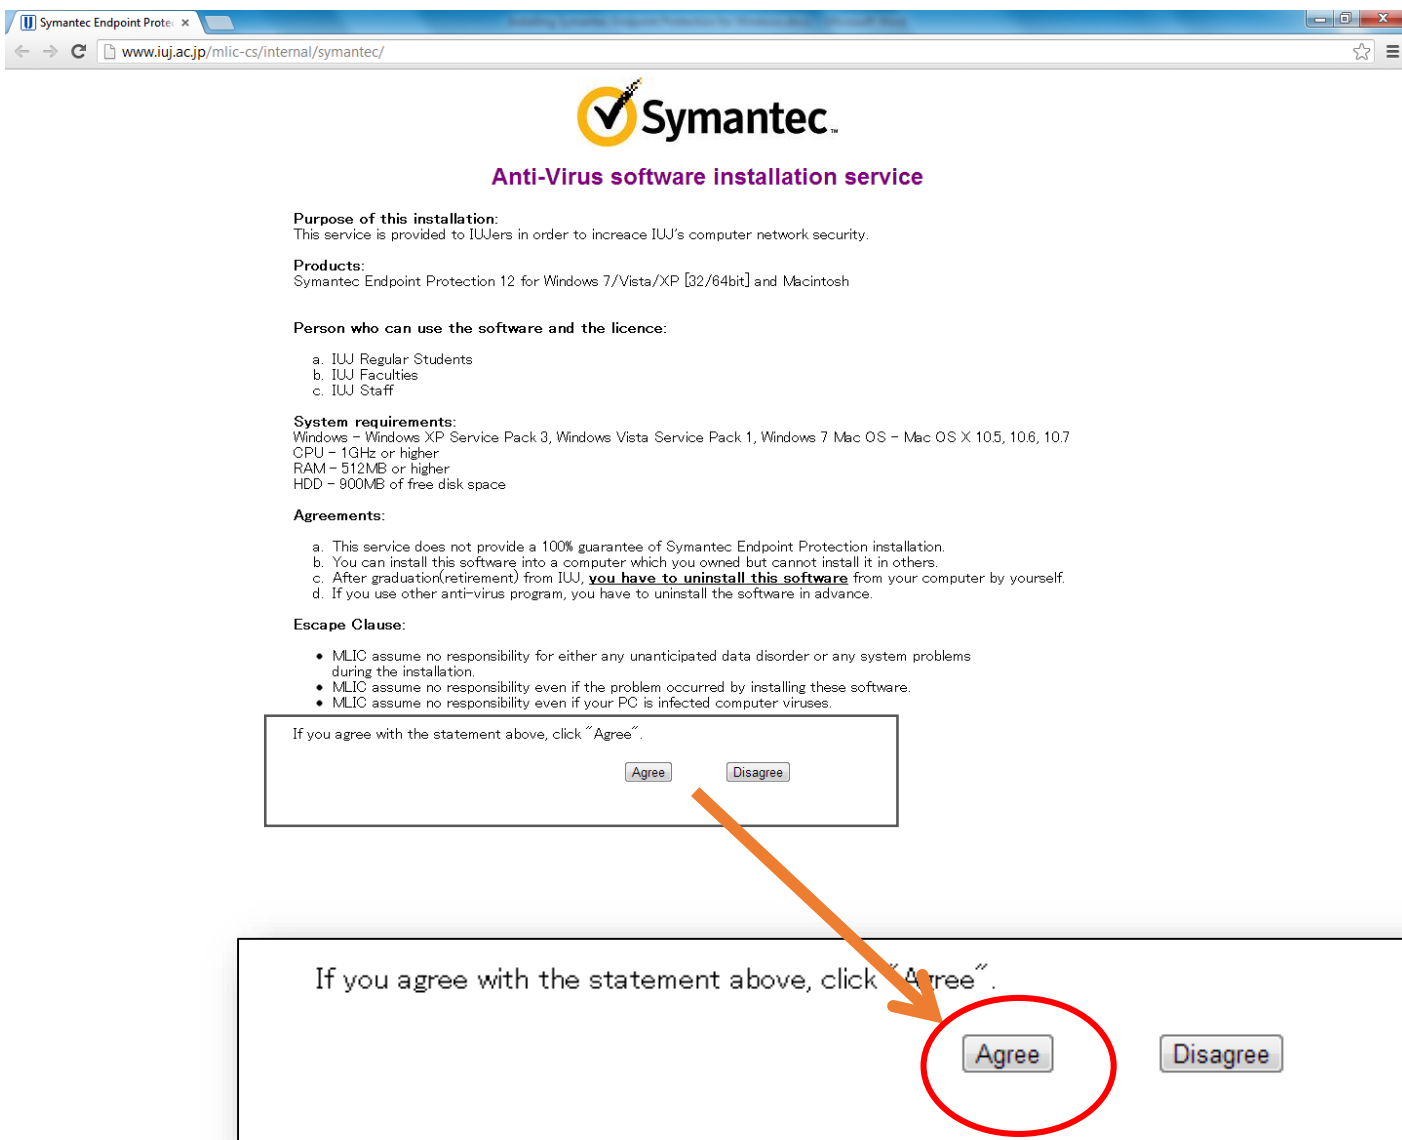

## Condition:

You have to uninstall this Symantec software by yourself when you graduate from IUJ.

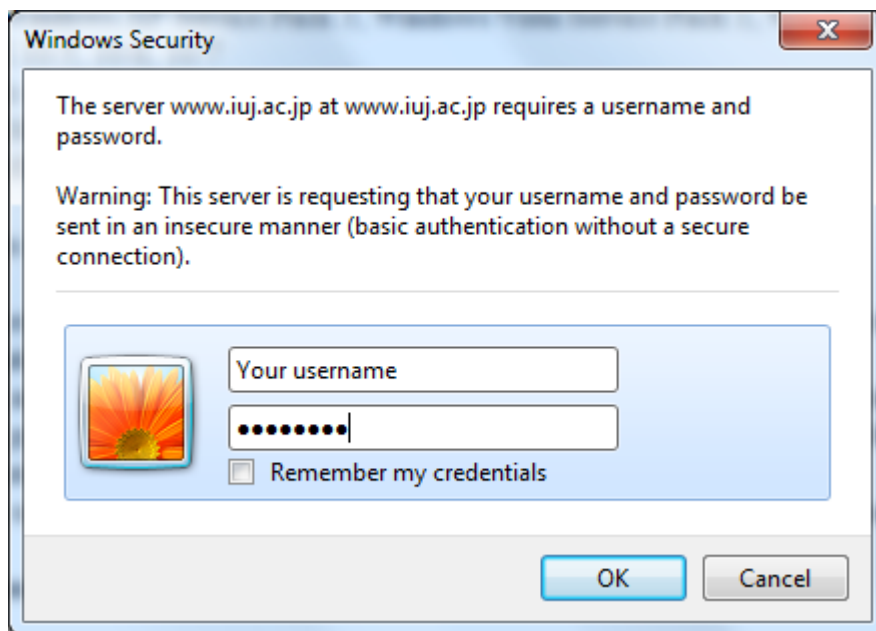

1. Access [iuj.edu/software/Symantec](http://iuj.edu/software/Symantec) to download the installer.

2. Read the agreements and click **Agree**.

3. Type your username and password for IUJ network and click OK.

4. Select the language and bit edition to match the edition of your Windows.

## Symantec Endpoint Protection installation service

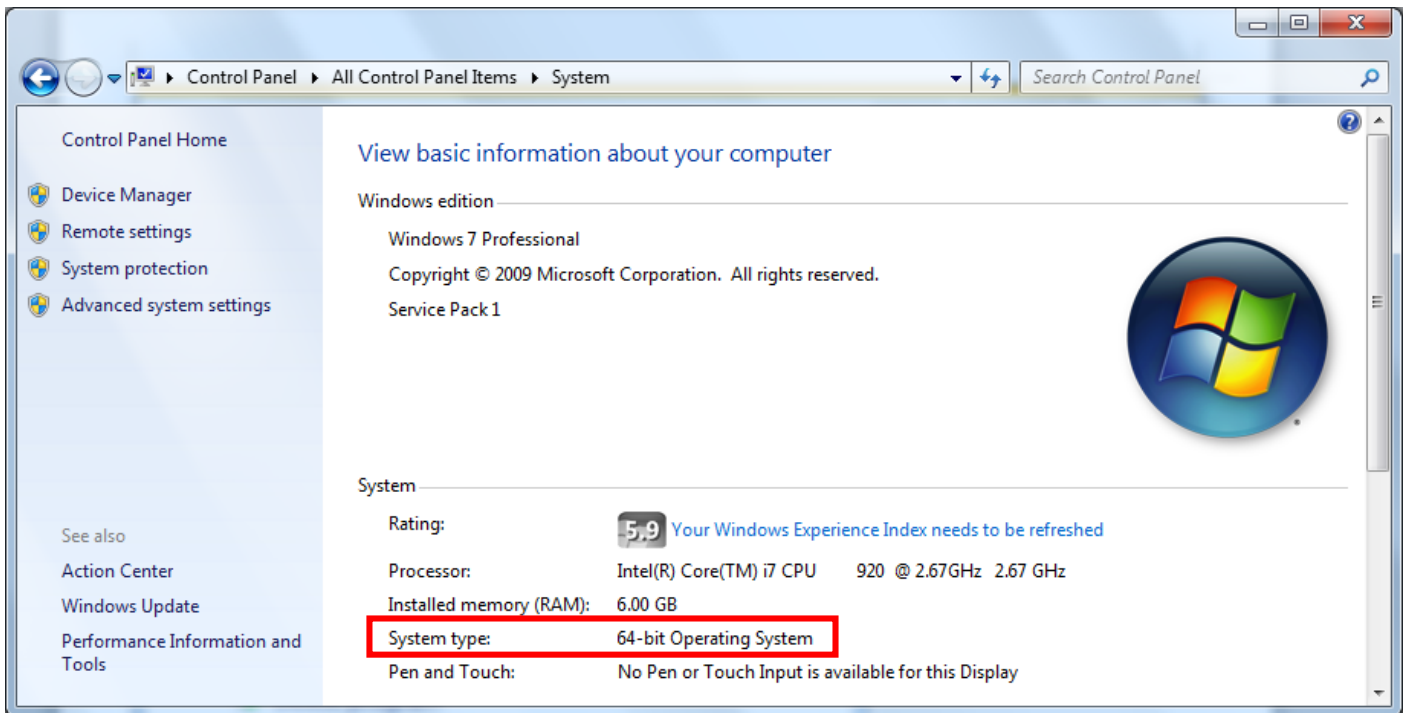

**Select your version and download it into your computer to Install**

<b>Windows</b>	English	32 bit OS	<a href="#">Win32E.exe</a>	<a href="#">Instruction Manual for Win. (PDF)</a>
	English	64 bit OS	<a href="#">Win64E-SEP11.exe</a>	
	Japanese	32 bit OS	<a href="#">Win32J.exe</a>	
	Japanses	64 bit OS	<a href="#">Win64J.exe</a>	
<b>Macintosh</b>	English		<a href="#">MacE.zip</a>	<a href="#">Instruction Manual for Mac. (PDF)</a>
	Japanese		<a href="#">MacJ.zip</a>	

If you have any problems or questions, please contact MLIC.

\*You can confirm the bit edition from **Start button > Control Panel > System**.

Check the **System type** that your Windows is 32bit or 64bit.

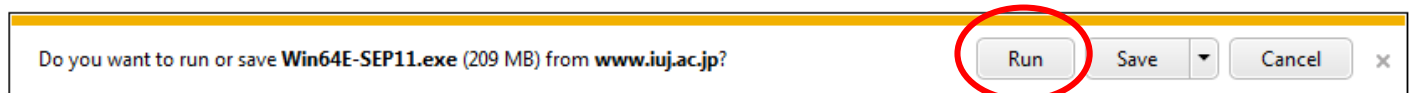

5. The action to install the antivirus program is different depending on the web browsers.

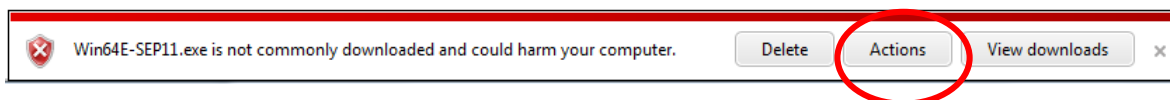

Please see the instruction of the browser which you use.

### <Internet Explorer>

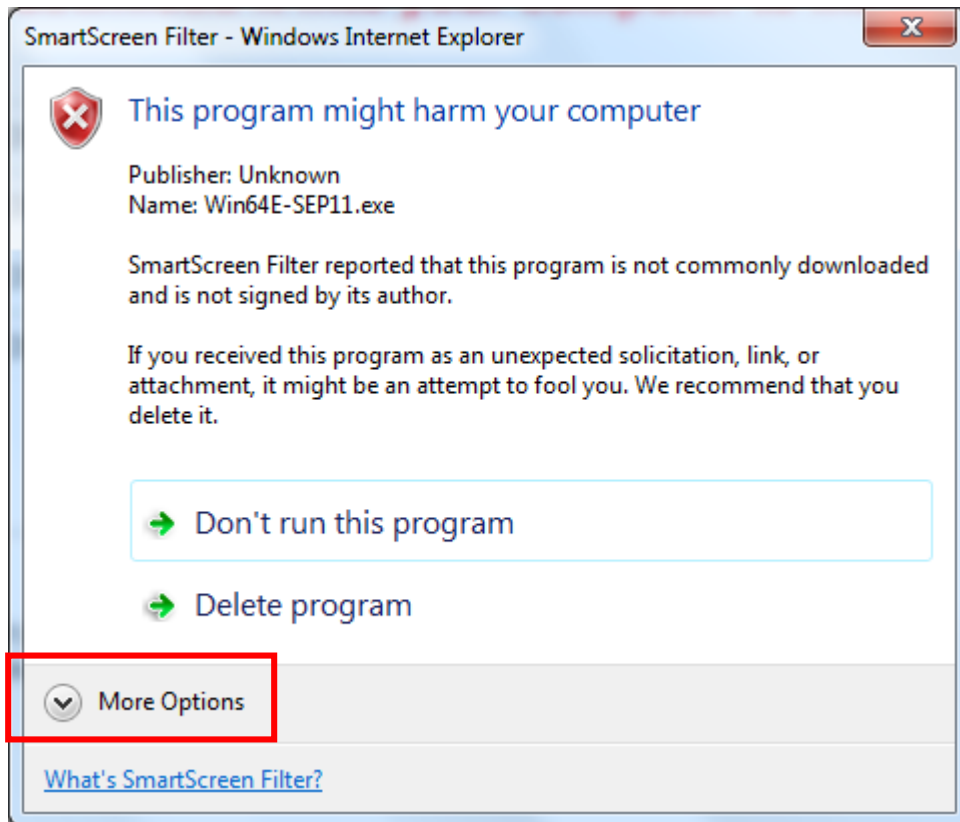

I. Click **Run**.

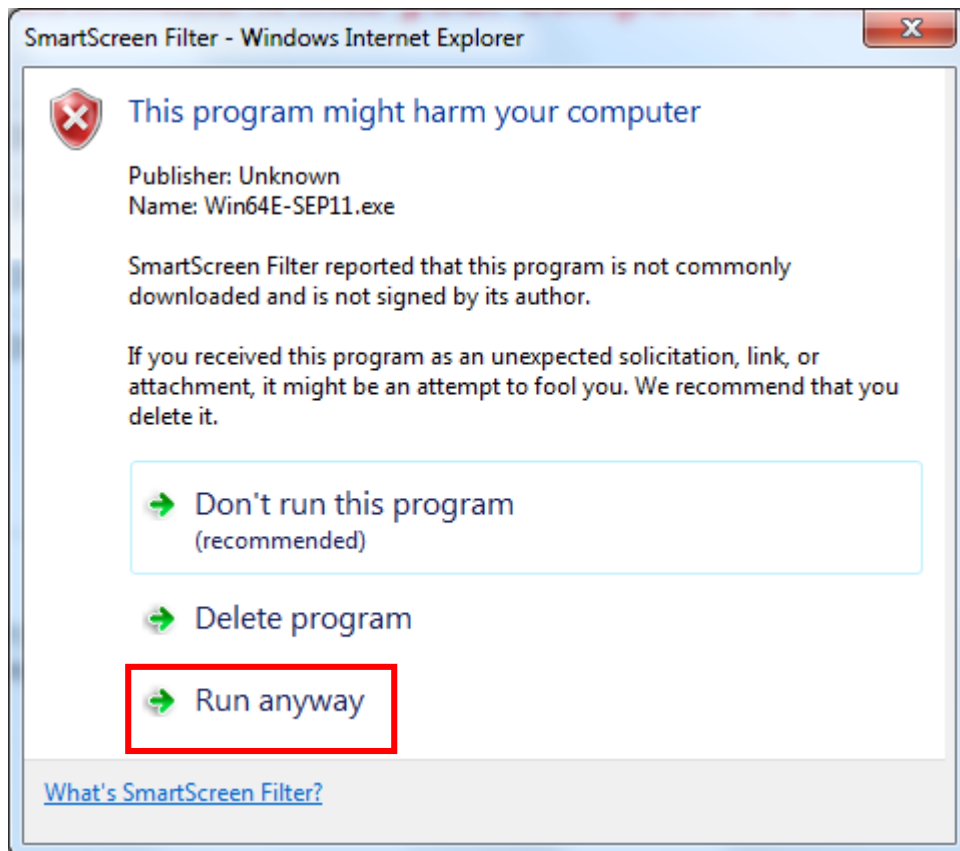

II. Click **Actions**.

III. Click **More Options**.

VI. Click **Run anyway**.

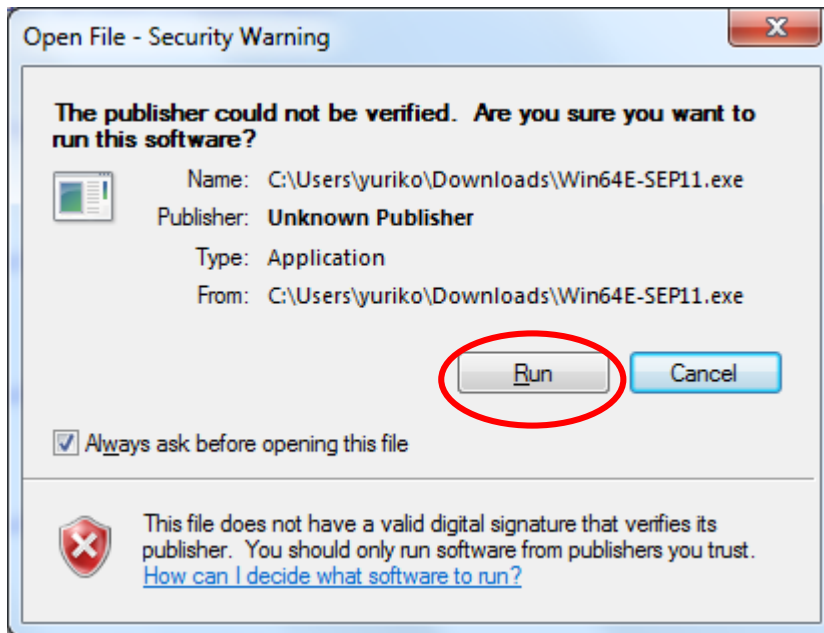

## <Google Chrome>

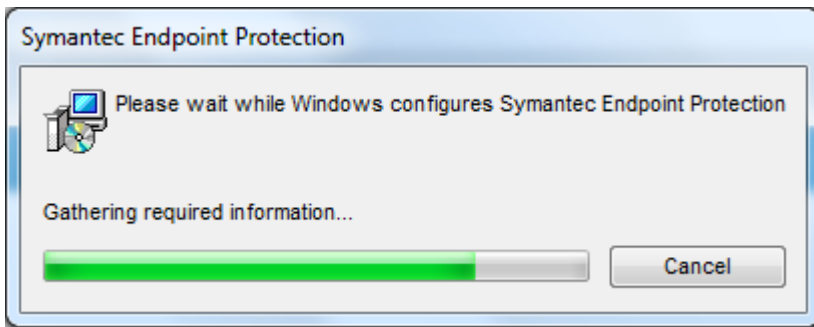

I. Download the setup package file and click the file on the browser.

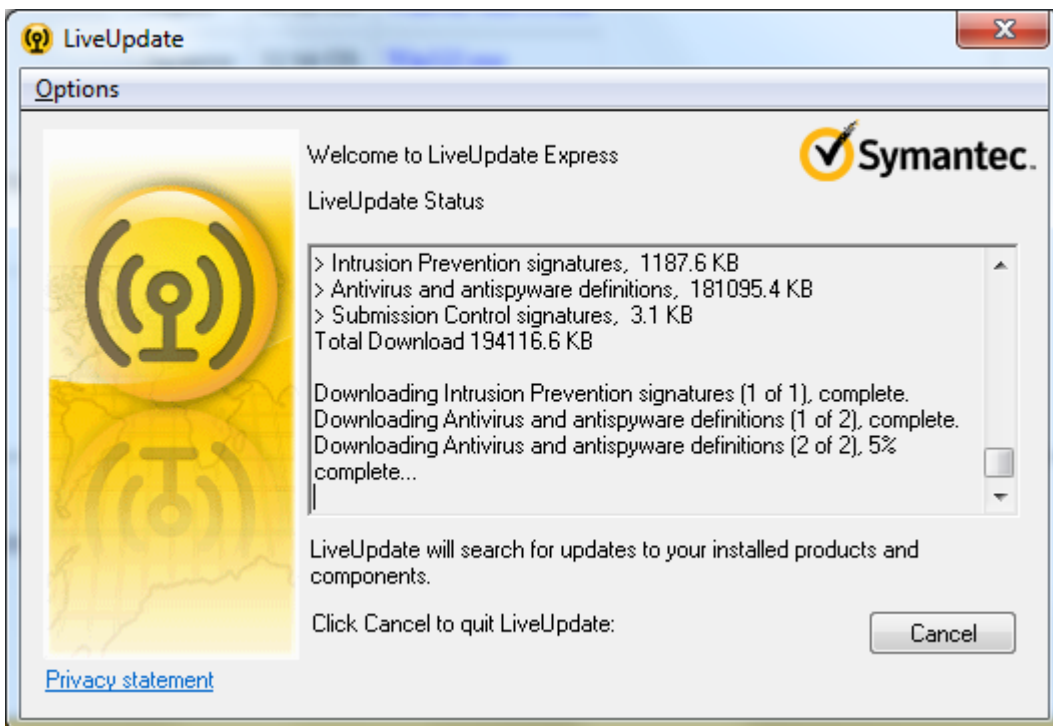

II. Click Run.

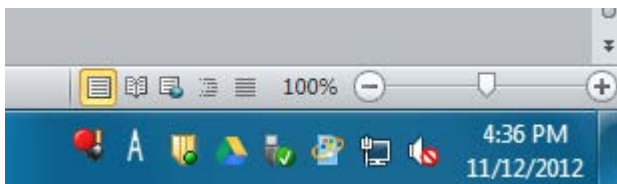

6. After you click Run, the installation will be started. Wait until it is finished.

7. One more action named Live Update to update the virus definition will be started after the Endpoint Protection program is installed. When it is finished, click **Close**.

8. When the program is installed properly, you can see the small yellow icon on the taskbar.

In case there is any problem regarding this program, please contact below.
