

Special Summer Program 2020: Special Research Seminar

Your Name: Kyohei Yamada

Joint Presentation and Discussion	
Description	<p>This seminar offers opportunities for students to refine their ongoing research projects and/or start new projects.</p> <p>For those who have completed their MA thesis, the seminar offers the opportunity to improve the draft and prepare for submission to a peer-reviewed journal. Those whose projects are ongoing (first year students in particular) can improve some parts of their project. For those who would like to develop new research ideas for their future term papers, new research projects, or research proposals for Ph.D. applications, this is a good opportunity to share their ideas and receive feedbacks.</p>
