

## Special Summer Program 2020: Special Research Seminar

Your Name: Maung Aung Myoe

<b>Research Seminar on Some Specific Topics</b>	
Description	<p><b><i>Mapping Myanmar: Geobody, Geostrategy, and Geopolitics</i></b></p> <p>This is a special seminar based on my current research in progress. Rather than a series of lecture, it is designed for discussion among those who are familiar with Myanmar's history and politics. By applying concepts of geobody, geostrategy, and geopolitics, the seminar will deal with Myanmar as a modern nation-state seeking for survival and security in international system. This involves mapping literature on Myanmar from various disciplines and writings. (Please note that the participants are required to read academic articles as well as popular literature written in Myanmar language; therefore, advanced reading skill in Myanmar is a must.) There will be weekly reading assignments and class presentations.</p>
