2025 Spring Term

Course	Schedule code ACT1020	Course title Managerial Accounting	
Name of Instructor Instructor's Contact Information	Lee, Hyunkoo		Credits 2 credits
	Office#	Office Hours Wed 4:00-5:00 PM or by appointment	E-mail
Class Schedule Day / Period	TBA (to be announced)		

Course Description	<p>This course introduces students to the evolving role of managerial accounting in modern business environments. The course highlights the informational need of managers in planning, controlling and decision making, and shows how to take advantage of accounting information in various management settings. The course will enable students to express real world business problems in a systematic way and solve them by applying managerial accounting concepts and techniques.</p> <p>Topics include cost estimation, cost analysis, activity based costing, cost-volume-profits analysis, budgets and standards, responsibility accounting and transfer pricing, and decision-making in various business situations.</p> <p>As the 4th industrial revolution is undergoing, business environments are changing rapidly. The existing business model has been replaced with new network models, and management tools are finding a way to adapt themselves to recent digital trends. Knowledge of technological trends and industry analysis is ever more critical. This course aims to cover management accounting in an integrated way combining knowledge from various disciplines and making students better prepared for the post-digital business world.</p> <p>As the environments surrounding business have evolved over time, standard management tools and techniques often couldn't keep up with the trend. Many management consulting firms have competed to provide wide range of tools and fill the gap between management tools and reality. This course also exposes students to various management consulting practices. As a potential consumer or a provider of a consulting product, students will be able to get indispensable knowledge and realistic perspective on the fast-paced world of management consulting.</p>
Learning Objectives & Goals	<p>The focus of this course is on business analysis. We try to lay a foundation for being a corporate executive, an entrepreneur, and a public organization officer. That also means that the course is not intended to train students as professional accountants or help them to pass a professional examination.</p> <p>Many of our students have the experience of taking at least one equivalent course before joining the IUJ. If a student has no accounting background or business experience, taking this course might take considerably more time. Given the core content's quantity and the fast speed of the course delivery, the burden of taking this course can be pretty high.</p> <p>The course aspires to make students immerse themselves in deep learning beyond shallow discussions. Please focus on understanding the underlying principles and</p>

	<p>implications. Memorizing formulae and details might improve test scores, but that won't help students to go to a higher level of learning.</p> <p>This course contributes to achieving learning goal 5-5 for 2-year MBA students. Upon completion of this course, students will be able to:</p> <p>(1) demonstrate understanding of accounting knowledge (LG5-5) (2) discuss managerial issues competently and present their viewpoints in a group meeting and classes.</p>																																
<p>Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)</p>	<p>This course fulfills the following MEXT learning objectives:</p> <p>MP1 (MBA): Able to demonstrate ability to formulate/define issues MP2 (MBA): Able to demonstrate ability to analyze and compute MP3 (MBA): Able to demonstrate ability to interpret concepts and data MP4 (MBA): Able to demonstrate ability to evaluate and make choices among alternatives MF5 (MBA, JGDP): Able to demonstrate understanding of Accounting Knowledge MD1 (IMBA): Able to apply the concepts of strategic management, recognizing internal and external strategic contexts. MD2 (IMBA): Able to demonstrate ability to gather and interpret data MD3 (IMBA): Able to demonstrate ability to make a strategic decision under pressure. MJ1 (JGDP): Able to demonstrate understanding of Japanese industries and manufacturing strategy. MJ2 (JGDP): Able to demonstrate understanding of Japanese employment practice MI4 (ISEP): Able to demonstrate ability to establish systems with business knowledge for providing solutions to social issues sustainably</p>																																
<p>Delivery Methods</p>	<p>The course will use lectures, problem solving and case discussion in workshop style as a main pedagogical method. It relies heavily on students' pre-study of teaching materials. Students are expected to perform all reading assignments and exercises prior to attending a class.</p> <p>In each class, a short lecture, student presentations and discussion, and problem solving activities will follow. For certain topics, students will be asked to self-study them by watch lecture videos and reviewing course material. Also quizzes will be given to motivate students' preparation.</p>																																
<p>Assessment</p>	<table border="1"> <thead> <tr> <th></th> <th colspan="3">Learning Objectives</th> </tr> <tr> <th>Assessment methods</th> <th>(1)</th> <th>(2)</th> <th>overall</th> </tr> </thead> <tbody> <tr> <td>Class Participation</td> <td></td> <td>35%</td> <td>7%</td> </tr> <tr> <td>Group Presentation</td> <td></td> <td>65%</td> <td>13%</td> </tr> <tr> <td>Quizzes</td> <td>10%</td> <td></td> <td>8%</td> </tr> <tr> <td>Final Exam</td> <td>55%</td> <td></td> <td>44%</td> </tr> <tr> <td>Case and assignment Report</td> <td>35%</td> <td></td> <td>28%</td> </tr> <tr> <td>Weight on Final Grade</td> <td>80%</td> <td>20%</td> <td>100%</td> </tr> </tbody> </table>		Learning Objectives			Assessment methods	(1)	(2)	overall	Class Participation		35%	7%	Group Presentation		65%	13%	Quizzes	10%		8%	Final Exam	55%		44%	Case and assignment Report	35%		28%	Weight on Final Grade	80%	20%	100%

<p>Prerequisites</p>	<p>ACT1010</p>																																

Method of Feedback for Exams/Papers	The instructor will return graded papers or allow students to inspect their paper.
Required Textbook(s)	The course will generally follow the following textbook. You will be asked to read assigned portions to keep up with the course lectures and cases. Hilton, R. and Platt, D. [2022]: Managerial Accounting: Creating Value in a Global Business Environment, 13th ed., McGraw-Hill (International Student Edition), ISBN: 978-1265046798 [Reserved]
Reference Books	Some students asked me how to apply what they learned in this class. The following books are recommended for such students. Both books contain fairly practical application cases. Saegusa, T. [2021]: It's All About Time. DJ Publications [Reserved] Kaplan, R. and Cooper, R. [1997]: Cost & Effect, Harvard Business School Press [Reserved]
Other Materials	There will be additional articles related to each topic. These will be stored in the course folder. I am often asked where to find more specific applications of a certain tool. These references are a good starting point to find a clue. That is also a good way to prepare for a case question in the final examination.
Group Assignments	There will be a series of required group works. Students are asked to work together to carry out group assignments. Group work is getting more important as a real workspace simulation. The goal is to create an environment where group members are encouraged to interact and support each other. That is not necessarily easy for the first-year students. But that will become a hallmark of the MBA experience. The details of group formation, assignments, and assessment plan will be announced later.
Tutorial	There will be a weekly tutorial class. This arrangement is mainly for students without accounting background. Attendance is optional. Further information on schedule and format will be announced later.
Fairness and Integrity	Fairness and integrity of the class should be maintained. It is our responsibility to facilitate these principles. Please don't do anything unfair to other students or ask the instructor to make exceptions that are not fair to other students. Quizzes and examinations will be done individually. Copying another student's paper or giving/receiving verbal assistance to/from another student during a quiz or an exam is considered cheating. Students who are found cheating on an exam will receive an F grade. In addition, the student will be referred to the applicable authorities for further disciplinary action. All assignments are group-based. Members of the same group are encouraged to cooperate. But copying another group's work or plagiarizing other illegitimate sources is considered cheating. All guilty parties will receive a zero for that assignment. In addition, the students will be referred to the applicable authorities for further disciplinary action. All assignments should be handed in by the scheduled deadlines. Failure to turn in by the deadline will result in a penalty. Please do not leave any material related to the group assignments on the net. Let's avoid violating copyright and hurting others' learning incentive.
Course Policy on Usage of Generative AI	These guidelines aim to help students use AI tools responsibly and ethically in their academic work at IUJ GSIM. They aim to ensure that AI use supports learning while maintaining academic integrity.

	<p>1. Ethical Use of AI</p> <ul style="list-style-type: none"> <input type="checkbox"/> Students must use AI tools ethically and responsibly. This includes avoiding misuse that may harm academic standards, fairness, or honesty. <input type="checkbox"/> AI tools should be used to enhance learning, not to replace personal effort or critical thinking. <p>2. Permissible AI Use</p> <ul style="list-style-type: none"> <input type="checkbox"/> AI can be used for: <ul style="list-style-type: none"> o Generating ideas or brainstorming o Summarizing notes or readings o Assisting with grammar and language checks o Providing feedback on assignments <input type="checkbox"/> Always follow specific instructions given by your course or program regarding the use of AI tools. <p>3. Prohibited AI Use</p> <ul style="list-style-type: none"> <input type="checkbox"/> Do not submit AI-generated content as your own work without proper citation or acknowledgment. <input type="checkbox"/> Do not use AI to complete exams, quizzes, or other assessments unless explicitly allowed by your instructor. <input type="checkbox"/> Do not input confidential or sensitive data into AI tools without proper approval. <p>4. AI in Group Work</p> <ul style="list-style-type: none"> <input type="checkbox"/> If AI tools are used in group projects, all group members must agree on their use. <input type="checkbox"/> Be transparent about how AI was used and document AI contributions in group work. <p>5. Disclosure and Citation</p> <ul style="list-style-type: none"> <input type="checkbox"/> When using AI for any part of your work, you must clearly disclose it. For example, include a note like: " This assignment was assisted by [AI tool name] to generate ideas." <input type="checkbox"/> Failure to disclose AI use may be considered academic misconduct. <p>6. Consequences of Misuse</p> <ul style="list-style-type: none"> <input type="checkbox"/> Misusing AI, such as submitting AI-generated work as your own or failing to disclose AI use, will result in penalties. These may include: <ul style="list-style-type: none"> o Redoing the assignment o Failing grades o Academic discipline or expulsion, depending on the severity of the misuse. <p>7. Privacy and Data Security</p> <ul style="list-style-type: none"> <input type="checkbox"/> Be cautious when using AI tools that require uploading content. Do not share any personal or confidential information in these tools without proper authorization. <p>8. Seeking Help</p> <ul style="list-style-type: none"> <input type="checkbox"/> If you are unsure about how to use AI responsibly, ask your instructor or academic advisor for guidance.
Course Cap	Because of the capacity limit, this course is open only to 65 GSIM students.
Others	Neither audit nor withdrawal is allowed.

	1	Topic	Chapter 1. Role of Managerial Accounting Appendix III section 2 (pp805-807)**
Required preparation		Read the textbook in advance.	1h
Post-study		1-1, 6, 12, 13, 24	1h
2	Topic	Chapter 2. Basic Cost Management Concepts Chapter 6. Cost Behavior (read pp234-244)	
	Required preparation	Read the textbook in advance.	1h
	Post-study	2-1, 2, 6, 7, 18, 19, 26, 28, 31, 42, 50, 6-4	1h
3	Topic	Chapter 3. Product Costing in a Batch Production	
	Required preparation	Read the textbook in advance.	2h
	Post-study	3-2, 5, 6, 10, 16, 19,	2h
4	Topic	Chapter 3. (Continued), Cost Drivers, Cost Allocation	
	Required preparation	Read the textbook in advance.	2h
	Post-study	3-30, 32, 44, 50	2h
5	Topic	Chapter 3. (Continued), Departmental Allocation	
	Required preparation	Read the textbook in advance. Review of sample problem set	2h
	Post-study	3-53 (1-3), 58	3h
6	Topic	Chapter 5. Activity Based Costing (ABC)	
	Required preparation	Read the textbook in advance.	2h
	Post-study	5-6, 7, 10, 11, 14, 26, 27	2h
7	Topic	Chapter 5. (Continued) Assignment Due	
	Required preparation	Read the textbook in advance. Complete the assignment	2h+2h
	Post-study	5-46, 50	2h
8	Topic	Chapter 5. Activity Based Management (from p187) Chapter 15. Target Costing (pp681-686)	
	Required preparation	Read the textbook in advance. Review of sample problem set	2h
	Post-study	5-35, 63, 65	2h
9	Topic	Chapter 7. Cost-Volume-Profit Analysis (Appendix included)	
	Required preparation	Read the textbook in advance. Review of sample problem set	2h+3h
	Post-study	7-2, 5, 6, 9, 13, 16, 18, 25, 28, 35, 45	2h
10	Topic	Case: TBA	
	Required preparation	Read and analyze the case in advance. Review of sample problem set	2h+3h
	Post-study	6-46, 55, 69 7-4, 13, 15, 34, 37	2h

	11	Topic	Chapter 9. Profit Planning (Budgeting)		
		Required preparation	Read the textbook in advance.	2h	
		post-study	9-1, 14, 16, 21, 24, 29, 34	2h	
	12	Topic	Chapter 12. Responsibility Accounting (skip 534-548) Chapter 10. Standard Costing (skip Appendix)		
		Required preparation	Read the textbook in advance. Review of sample problem set	2h	
		Post-study	12-1, 2, 3, 10, 11, 14, 27, 30, 32 10-2, 6, 9, 15, 21, 22, 30, 35, 40	2h	
	13	Topic	Chapter 10. Standard Costing (Continued) Chapter 12. Balanced Scorecard (self-study, read pp534-548) Chapter 11. Flexible Budgeting and Overhead (will cover Overhead briefly, skip Appendix)		
		Required preparation	Read the textbook in advance. Review of sample problem set	2h	
		Post-study	12-19, 24 11-2, 3, 7, 9, 11, 12, 16	2h	
	14	Topic	Chapter 11. Flexible Budgeting and Overhead (Continued) Case: TBA		
		Required preparation	Read the textbook in advance. Read and analyze the case.	2h+3h	
		Post-study	11-26, 28, 38	2h	
	15	Topic	Chapter 13. Investment Center (skip 583-587) Chapter 13. Transfer Pricing (self-study)		
		Required preparation	Read the textbook in advance. Review of sample problem set	2h	
		Post-study	13-5, 7, 8, 14, 19, 29 13-20, 34, 49	2h	
	16	Topic	Case: TBA Chapter 14. Decision Making (skip Appendix, self-study)		
		Required preparation	Read the textbook in advance. Read and analyze the case. Review of sample problem set	2h+3h	
		Post-study	14-7, 8, 10, 14, 31, 33, 36, 41, 49, 52	3h

Course	Schedule code FIN3050101	Course title Risk Management	
Name of Instructor	Chuang, Hongwei		Credits 2
Instructor's contact information	Office#	Office Hours by appointment	E-mail
Class Schedule Day / Period	Mon.2~3		

Course Description	Risk management is a discipline for living with the possibility that future events may cause adverse effects, ensuring resilience to the future.		
Learning Objectives & Goals	Risk is a variable that can cause deviation from an expected outcome which can cause variation from the desired result. Risks are highly dependent and can't be segmented and managed by entirely independent units. This course provides fundamental knowledge for the financial risk management certificate, including risk measurement and quantitative tools, which are critical aids for supporting risk management.		
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>[For MBA, JGDP] MF2: Able to demonstrate an understanding of Finance Knowledge.</p> <p>[For IMBA] MD1: Able to apply strategic management concepts, recognizing internal and external strategic contexts. MD2: Able to demonstrate the ability to gather and interpret data.</p>		
Delivery Methods	Slides and course materials will be distributed via IUJ Google Classroom.		
Assessment	The understanding level will be on participation/discussion, homework, and case study presentation: 20% participation + 40% assignments + 40% case studies.		
Prerequisites	Corporate Finance (FIN 1010)

2025 Summer Term

Course	Schedule code ITC1070	Course title Ethics and CSR of Digital Business
Name of Instructor	WATANABE, Tomoaki	Credits 1
Instructor's contact information	Office#	Office Hours (upon request)
Class Schedule Day / Period	E-mail	
	July. 1(Tue)-4(Fri) / Periods 4 and 5 (14:40-17:50) each day	

Course Description	This course centers around ethical issues related to the business use of digital technologies. The course is discussion-intensive during the class sessions. Students are expected to read designated materials beforehand and contribute to the discussions during the class.																						
Learning Objectives & Goals	<ul style="list-style-type: none"> ✓ To learn ethical issues related to the digital businesses and ICTs ✓ To formulate informed opinions on some of the major questions ✓ To explore some of the technological, design, policy, and other solutions to the ethical challenges, and their limitations 																						
Contribution to the Diploma Policy	MS1 Able to identify the central problem/issue to demonstrate understanding of socially responsible leadership concepts and practices MS4 Able to understand the implication of technologies to social responsibilities in the creation of social and business values.																						
Delivery Methods	The students are expected to read the materials and come with answers to the discussion questions. During the class sessions, we hold small group discussions and inter-group debates over some of the discussion questions.																						
Assessment	The grade is assigned based on your contribution to the in-class discussions.																						
	<table border="1" style="width: 100%; border-collapse: collapse; text-align: center;"> <thead> <tr> <th></th> <th colspan="3">Learning Objectives</th> </tr> <tr> <th>Assessment methods</th> <th>(1)</th> <th>(2)</th> <th>(3)</th> </tr> </thead> <tbody> <tr> <td>Class Participation</td> <td>30</td> <td>10</td> <td>30</td> </tr> <tr> <td>Position Briefs</td> <td>10</td> <td>10</td> <td>10</td> </tr> <tr> <td>Weight on Final Grade</td> <td>40</td> <td>20</td> <td>40</td> </tr> </tbody> </table>				Learning Objectives			Assessment methods	(1)	(2)	(3)	Class Participation	30	10	30	Position Briefs	10	10	10	Weight on Final Grade	40	20	40

2025 Spring Term

Course	Schedule code ITC1080	Course title Data-Driven Organization	
Name of Instructor	Zaw Zaw Aung		Credits 2
Instructor's contact Information	Office#	Office Hours 13:00- 15:00	E-mail:
Class Schedule Day / Time	TBC		

Course Description	<p>We live in a constantly changing world. The pace of change is just going to increase and is now a constant that we all need to live and work with. Companies are embracing Digital Transformation (DX) as their main agenda. Yet being more “digital” or collecting more data won’t get the companies very far if there aren’t methods and tools to better the management process. Businesses need to be able to adapt their own operating model, organization and people strategy, not only to respond to these changes, but to pre-empt them. Key to being able to do this is having access to live data that can help inform the changes that could be made, quickly identify the business benefits of doing so and equally the implications of not doing them.</p> <p>Take a legacy company that has over the years collected and continues to collect data. The company is siloed by products because that's the way companies were organized back then it made sense at the time. Now however the structure is not working. Customers are not just interfacing with one part of the company. They purchased multiple products, have multiple interactions across multiple channels and expect the company to know them well and cater to their unique needs. The only way to achieve data integrity to serve customers well is to connect siloed data.</p> <p>In every organization, there are already a few good data analysts in the respective functional areas. Collectively they have deep database skills thorough understanding of how data is organized and they understand the business domain well. They use tools to visualize the siloed data and create charts and plots to show trends to management who can then make decisions on. This siloed analysis is useful but not good enough to get a better view across these areas. We need more data experts who can look across multiple areas and logically consolidate all the data so more value can be derived from them collectively. This calls for</p>
--------------------	---

	<p>a different set of skills such as the ability to explore data, transform, cross-correlate, merge and interpret the data.</p> <p>In this course, students will learn the topics of</p> <ul style="list-style-type: none"> • Understanding the elements of a successful Data-Driven Organization • Creating Data-Driven Organization Culture • Alignment of Data Strategy with Business Strategy • Data Engineering, Self-service Data Platform and Data Mesh • Data Project Management & Data Stewardship • Data Quality, Data Literacy, Data Governance • Data Democratization
<p>Learning Objectives & Goals</p>	<p>(1) AACSB L7-2 Ability to employ suitable technology element to create a business or add competitive value to an organization.</p> <p>(2) AACSB L7-3 Ability to implement digital transformation while taking into account organizational and environmental implications.</p> <p>(3) Understand the elements of a successful Data-Driven Organization, Data-Driven Culture, Systems and Data Governance</p>
<p>Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)</p>	<p>Master of Business Administration MBA/MBA-GX/IMBA/JGDP(Management Concentration)</p> <p>LG <Problem Solving> Our students will analyze and understand the inputs in a situation and analyze, assess and use information for the purpose of forming beliefs and choosing the most appropriate solution. MP1: Able to demonstrate ability to formulate/define issues MP2: Able to demonstrate ability to analyze and compute</p> <p>LG <Functional Business Knowledge> Our students from different backgrounds will learn fundamental business knowledge so as to become a successful business managers. MF6 - Able to demonstrate understanding of Data Analysis and Digital Technology</p> <p>LG <Strategic Decision Making> Our students will assess diverse social and business contexts and make a strategic decision MD1: Able to apply the concepts of strategic management, recognizing internal and external strategic contexts MD2: Able to demonstrate ability to gather and interpret data</p>

	<p>Master of Digital Management Digital Transformation Program (DXP)</p> <p>LG <Technology and Digital Transformation> Our students will be able to apply the latest technology element to creating a new business or adding competitive value to an organization</p> <p>MT2: Able to employ suitable technology element to create a business or add competitive value to an organization MT3: Able to implement digital transformation while taking into account organizational and environmental implications</p> <p>AACSB Learning goal 7 (L7): Technology and Digital Transformation. Our Students will be able to apply the latest technology element to creating a new business or adding competitive value to an organization through digital transformation.</p> <p>This course is a core course for DXP and measures two learning objectives: L7-2 Ability to employ suitable technology element to create a business or add competitive value to an organization. L7-3 Ability to implement digital transformation while taking into account organizational and environmental implications.</p>																																				
Delivery Methods	This course includes lectures, case analysis and discussions, group presentation.

 2025 Spring Term

Course	Schedule code ITC2030101	Course title AI for Business	
Name of Instructor	Aung, Zaw Zaw		Credits 2
Instructor's contact information	Office#	Office Hours Monday - Friday 13:00-15:00	E-mail
Class Schedule Day / Period	Tue.4~5		

Course Description	<p>Artificial intelligence (AI) is rapidly emerging as the most important digital core technology of our time. Recent advances, particularly in machine learning — its ability to take over various complex human tasks - have led to widespread use of AI applications in almost all industries. This game changing technology can help accomplish many business activities with greater accuracy and at a fraction of the time it would take humans to do the same.</p> <p>AI offers a way to trace the patterns in data that are undetectable by humans and helps businesses and the managers to do many tasks in profound ways.</p> <p>The course provides you an introduction to the key concepts and techniques of machine learning and AI, to comprehend how well they fit in with your business goals. This course offers a range of methods, tools and expertise needed for young managers to optimize their approach and to enter the world of automation, and AI driven business solution.</p>
Learning Objectives & Goals	<ul style="list-style-type: none"> - A contextual understanding of AI trend and ecosystem, helping the MBA candidates to make relevant predictions for its future trajectory. - The ability to identify and assess the AI opportunities in your organization and build a business case for its implementation. - A strong conceptual understanding of underlying AI technologies such as machine learning, deep learning, neural networks, and large language models. - A hand-on experience with AI projects creating chatbot, vision and automation models.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>For MBA Students Master of Business Administration MBA/IMBA/JGDP</p> <p>LG <Functional Business Knowledge> MBA students from different backgrounds will learn fundamental business knowledge so as to become a successful business managers. MF6: Able to demonstrate understanding of Data Analysis and Digital Technology</p>

	<p>LG <Strategic Decision Making> Our students will assess diverse social and business contexts and make a strategic decision MD1: Able to apply the concepts of strategic management, recognizing internal and external strategic contexts. MD2: Able to demonstrate ability to gather and interpret data</p> <p>For DXP Students Master of Digital Management Digital Transformation Program (DXP)</p> <p>LG <Technology and Digital Transformation> DXP students will be able to apply the latest technology element to creating a new business or adding competitive value to an organization through digital transformation. MT1: Able to understand the latest technology trend MT2: Able to employ suitable technology element to create a business or add competitive value to an organization MT3: Able to implement digital transformation while taking into account organizational and environmental implications</p> <p>For ISEP Students Master of Social Entrepreneurship International Social Entrepreneurship program (ISEP)</p> <p>LG <Solutions toward Social Issues with Business Concept> Our students will identify and analyze factors of social issues, and will be able to establish sustainable solutions with business knowledge. MI4: Able to demonstrate ability to establish systems with business knowledge for providing solutions to social issues sustainably</p>
Delivery Methods	This course include lectures, case discussions, take-home exercises and experiments with AI models and tools.
Assessment	Class Participation: 40% Individual Essay: 30% AI Project (Group Report): 30% (Class participation includes - case assignment reading, discussion, take home exercise, lab sessions and attendance)
Prerequisites	No
Method of feedback from instructor to students for exams/papers	Google Classroom

2025 Spring (Special) Term

Course	Schedule code ITC2060	Course title World Landscape of Digital Industry	
Name of Instructor	Mihoko Sakurai		Credits 1
Instructor's contact information	Office#	Office Hours (upon request)	E-mail
Class Schedule Day / Period	June 25 th (Wed) 3, 4 and 5 periods June 27 th (Fri) 3, 4 and 5 periods June 30 th (Mon) 3 and 4 periods		

Course Description	<p>This course serves as the capstone of the DXP program, with the primary objective of applying the knowledge and skills acquired over the past year to address real-world challenges. Specifically, students will engage in either individual or group projects to propose solutions for digital transformation (DX) at IUJ, incorporating insights gathered from stakeholders on the ground.</p> <p>In parallel, the course will feature guest speakers who will share practical examples of DX initiatives in both the public and private sectors. These speakers will offer perspectives from both national and local levels, discussing policies, strategies, on-the-ground challenges, and digital solutions currently being implemented.</p> <p>As needed, the course will also provide an overview of regulatory frameworks related to digital technologies—particularly personal data protection—in Japan, the United States, and the European Union.</p>
Learning Objectives & Goals	<p>By the end of this course, students will be able to:</p> <ol style="list-style-type: none"> 1. Apply and demonstrate the knowledge and skills acquired throughout the DXP program. 2. Identify and analyze key challenges related to digital transformation (DX) at IUJ. 3. Develop and propose concrete solutions by engaging with real-world practitioners and incorporating insights from on-the-ground perspectives.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)	<p>DXP - MT1 Able to understand the latest technology trend</p> <p>ISEP - MI3 Able to demonstrate ability to connect different ideas for creating new solutions toward factors of social issues</p> <p>MBA - MF6 Able to demonstrate understanding of Data Analysis and Digital Technology</p>

Delivery Methods	This course consists of guest lectures by practitioners and individual or group work aimed at developing solution proposals. The instructors will present primary materials or invite a guest lecturer, and you are expected to examine the materials as well as bring in relevant materials to contribute to the discussion.

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Spring Term

Course	Schedule code ITC3010101	Course title Japan's Frontier of Digital Society	
Name of Instructor	Sakurai, Mihoko		Credits 1
Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	Class schedule Day 1: Tue. May 27, 13:00-14:30 / 14:40 - 16:10 Day 2: Fri. May 30, 13:00-14:30 / 14:40 - 16:10 Day 3: Tue. June 3, 13:00-14:30 / 14:40 - 16:10 Day 4: Fri. June 6, 13:00-14:30 / 14:40 - 16:10		

Course Description	<p>This course provides cases and insights from digital frontiers of Japanese society. Japan faces various social problems such as aging population, natural disasters, population shrink, and population concentration to Tokyo etc. The national government has launched the concept of "Society 5.0", which integrates cyber and physical aspects of people's everyday life. It envisions further economic growth, and expects to create new way of solving social problems. While the social problems are getting more complex and increasing, Japanese society is in transition towards a highly digitalized, so-called "Society 5.0". We will discuss the state of the art of Japan's digital society, identify problems we need to deal with, and discuss the way to tackle social problems through use of information technologies under the concept of "Society 5.0". Specifically, we look into topics from government (IT policy), industry (blockchain and organizational decentralization), and consumer (technology acceptance and robotics in nursing care) sectors.</p>
Learning Objectives & Goals	<p>To get an overview of Japan's society and information technologies To understand Japan's current social problems and emerging social risks To understand Japanese IT policy and management To discuss novel means for approaching various social problems, especially through use of information technologies</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>For DXP MT1:Able to understand the latest technology trend</p> <p>For MBA MF6:Able to demonstrate understanding of Data Analysis and Digital Technology</p>
Delivery Methods	The classes include lecture and case discussions.
Assessment	<p>(1) class contribution up to 80%.</p> <p>This course has 8 sessions. Each session shall hold 10% split of the class participation. Students are expected to actively engage the class activities. Your</p>

	<p>attendance, attentiveness, sharing relevant info, knowledge and experience, constructive questions, comments and discussion will earn better scores. For each class day, class instructor will evaluate your participation independently and their score will be proportionally weighted on your final score and grade.</p> <p>(2) final presentation (either individual or groups) up to 20%.</p>
Prerequisites	
Method of feedback from instructor to students for exams/papers	Feedback to the final presentation will be given after the last session.
Textbook(s)	<p>Required:</p> <p>Reference Books / Journal Articles:</p>
Note on Textbooks and Reference Books	<p>Two case materials will be necessary to be purchased.</p> <p>1)HBS case - Akira Fukabori and Kevin Kajitani at avatarin (A) (https://hbsp.harvard.edu/product/421089-PDF-ENG?Ntt=Japan%20Digital%20)</p> <p>2)USC Marshall case - SOOOUL: Navigating the Hype Cycle (https://hbsp.harvard.edu/product/SCG602-PDF-ENG?Ntt=Japan%20Digital%20)</p> <p>Reference papers:</p> <p>Chapter 2 Science, Technology, and Innovation Policy for the Realization of Society 5.0,pp.15-51 Government of Japan (2021) The 6th Science, Technology, and Innovation Basic Plan. https://www8.cao.go.jp/cstp/english/index.html</p> <p>Prereading materials for session 3 and 4:</p> <p>1)Wright, J. International University of Japan
 Graduate School of International Management
2025 Spring Term

Course	Schedule code JDP2030	Course title Monozukuri (Manufacturing) Management in Japan	
Name of Instructor	FUJIMOTO, Takahiro HELLER, Daniel HIGASHI, Hidetada FUKUZAWA, Mitsuhiro KOBAYASHI, Mizuki YASUMOTO, Masanori YOKOZAWA, Kodo	Credits 2	
Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	Saturday 3rd period and 4th period (13:00-14:30, 14:40-16:10)		

Course Description	Japanese manufacturing has become synonymous with high quality, low cost, and timely delivery. In this course, we will examine how and why Japanese firms are able to achieve the right mix of QCD, while also pursuing the flexibility and continuous improvement needed to be competitive over the long term. We will introduce the Japanese word, <i>monozukuri</i> (which covers product development, manufacturing, and sales), to provide a unifying view of customer-centric management that extends beyond a narrow understanding of simply "making things" (the literal meaning of monozukuri) into service management and innovation. The course will be taught through lectures and class discussion.
Learning Objectives & Goals	<ol style="list-style-type: none"> (1) Be able to describe what sets leading Japanese companies apart from their competitors (2) Be able to explain the essential elements of monozukuri and its historical roots in manufacturing industries in Japan (3) Be able to grasp the challenges facing Japanese companies today and tomorrow, as well as be able to describe possible routes forward (4) Be able to apply lessons from monozukuri to non-Japanese companies and contexts
Contribution to the Diploma Policy (knowledge, skills and attitude which	(MBA, MBA-GX, JGDP) MF3: Able to demonstrate understanding of IT/OM/SCM Knowledge MJ1: Able to demonstrate understanding of Japanese industries and manufacturing strategy

<p>can be acquired through this course for obtaining the degree concerned)</p>	<p>MJ2: Able to demonstrate understanding of Japanese employment practice MJ3: Able to demonstrate understanding of Japanese corporate governance and management philosophy MJ4: Able to demonstrate understanding of Japanese society and business environments</p> <p>(ISEP)</p> <p>MI4: Able to demonstrate ability to establish systems with business knowledge for providing solutions to social issues sustainably</p> <p>Through this class students will engage in discussion about the strengths of Japanese companies that have helped Japan achieve and maintain its place as a leading economic powerhouse in the world. Students will integrate the perspectives from five faculty members covering different industries to write a term paper expressing what they and an organization from their home country can learn from monozukuri.</p>																																																						
<p>Delivery Methods</p>	<p>Lecture and in-class discussion, primarily through in-person classes, with some classes held on-line due to the inability of faculty to go to the IUJ campus. We expect all students to engage actively the readings and lecture material during class. Each week, the course will be assessed (50% of grade) by active participation in class, including submitting a written question and comment at the beginning of class about that week's reading. This submission will show that the student has carefully read the assigned reading and engaged with its content. A term paper (50% of grade), which will cover the content of the whole course, will be due on Saturday, May 24. Details about the term paper will be given in the first class.</p>

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Spring Term

Course	Schedule code JDP2050101	Course title Primer for Industrial Development Policy	
Name of Instructor	Funabashi, Gaku		Credits 2
Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	Mon.2~3		

Course Description	<p>Development of industries has large impacts on the economic development of a country. Hence, the government of many countries have attempted to form a strategy/policy for stimulating industries/enterprises. The industrial development is a result of performances by enterprises in each industry. Hence, it is necessary to grasp all the aspects surrounding industries including operations by enterprises for extracting necessary support actions by the government. For this purpose, this course first discusses background theories, then sees the development experiences of several Japanese industries to understand elements to be considered for industrial development including policies implemented by the Japanese government. These parts are mainly discussed focusing on the catch-up model of manufacturing industry. In addition, recent discussions mainly by international organizations are also introduced to understand the global trend of industrial development and support. Students are expected to consider the development of a specific industry of own and another country using experiences in Japan and other countries through assignments and a group work.</p>
Learning Objectives & Goals	<p>This course contributes to the achievement of 4 objectives of 3 learning goals mentioned below. For the purpose of accomplishment of these objectives, this course covers various issues related to industrial development in Japan and other countries.</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>MP1 (for 2-year MBA, JGDP): Able to demonstrate ability to formulate/define issues. MP2 (for 2-year MBA, JGDP): Able to demonstrate ability to analyze and compute. MF1 (for 2-year MBA, JGDP): Able to demonstrate understanding of management knowledge. MJ1 (for 2-year MBA, for JGDP): Able to demonstrate understanding of Japanese industries and manufacturing strategy.</p>
Delivery Methods	<p>Classroom and online lectures and discussions (hybrid class). But students are required to participate at a classroom except for the special cases.</p>
Assessment	<p>Final grades will be based on individual Weekly Assignments (10% x 3 assignments), Group Presentation (20%), Final Report (35%) and Class participation including discussions (15%). It is not prohibited to use generative AI. But students need to add more consideration to meet requirements of assignments.</p>
Prerequisites	None
Method of feedback from instructor to	Feedback will be sent to students individually by mail.

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Spring Term

Course	Schedule code JDP3060101	Course title Agriculture Business and Policy in Japan	
Name of Instructor	Yokose, Tsutomu, Yamaguchi, Noboru		Credits 1
Instructor's contact information	Office#	Office Hours Tuesday, 9:00-18:00 Wednesday, 9:00-18:00 Other date: By appointment	E-mail
Class Schedule Day / Period	Fri.4~5		

Course Description	<p>In every country around the world, Agriculture and Food Industry is the fundamental and important industry which enhance the stability in country economy and the regional asset for the future growth. Also, due to the rapid change within today's global business environment, in the areas of Agriculture and Food also, a leader must have the future scope of the industry by applying the technology movement, environmental concerns, social responsibility, national security, politics and other human rights issues.</p> <p>As an orthodox concept until 20th Centuries, Agriculture and Food industry was recognized as a regulated and protected industry. On the other hand, in the new movement after 20th Centuries, Agriculture and Food industry was just applying new concept and technology, without identifying and applying the essential elements of the industry which are inherited from the past as the wealth of Agriculture and Food. It must be important for us to see how we should identify the core competencies of Agriculture and Food Industry and how we should apply 21st Century new technology to the industry by installing the hereditary technology, concept, experience, accumulated knowledge and traditional way of the business. By examining of the development stage of Agriculture and Food Industry in Japan, students will understand the veritable elements of the industry and how the Japan's accumulated knowledge and experience in Agriculture and Food Industry should be applied to their home countries/regions for the future opportunities in the industry.</p>
Learning Objectives & Goals	<p>In this course, students will gain the following learning objectives</p> <ul style="list-style-type: none"> • Understand the essential elements of the success in Agriculture and Food industry • Learn the accumulated knowledge, experience and history of Japan Practice of Agriculture and Food Industry • Comprehend the connection between Agriculture & Food Industry and Local society for the development of the business • Outline the strategy and implementation plan in the commercialization of Agriculture products through field studies and trips in Minami Uonuma area • Embody the knowledge and concept of the application in new digital Technology for the future development in Agriculture and Food industry. • Analyze the competitive advantages in Agriculture Business through new technology and regional branding concept and design the application of those

	advantages into own countries/regions			
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>This course is elective course among JGDP and will contribute to the following Learning Goal/Learning Objectives</p> <p>For MBA</p> <p>MS1: Able to clearly identify the central problem/issue to demonstrate understanding of socially responsible leadership concepts and practices</p> <p>MS2: Able to outline strategies for socially responsible companies</p> <p>MS3: Able to demonstrate ability to illustrate key reasons why socially responsible leadership is integrated into mainstream business operations through global value chain</p> <p>MF1: Able to demonstrate understanding of Management Knowledge</p> <p>MJ1: Able to demonstrate understanding of Japanese industries and manufacturing strategy</p> <p>MJ3: Able to demonstrate understanding of Japanese corporate governance and management philosophy</p> <p>MJ4: Able to demonstrate understanding of Japanese society and business environments</p> <p>For ISEP</p> <p>MS1: Able to clearly identify the central problem/issue to demonstrate understanding of socially responsible leadership concepts and practices</p> <p>MI-1: Able to demonstrate ability to identify social issues</p> <p>MI-2: Able to demonstrate ability to analyze fundamental factors of social issues</p>			
Delivery Methods	Lecture, interactive discussion, field trips and studies, guest speech in real practices			
Assessment	<p>Overall grading assessment</p> <ul style="list-style-type: none"> • 20% Contribution to the class discussion • 20% Group presentation • 20% Case memo (2 times) • 40% An individual final report

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Spring Term

Course	Schedule code MGT1330102	Course title Field Study	
Name of Instructor	Funabashi, Gaku		Credits 4
Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	unfixed		

Course Description	<p>The objective of Field Study is to create a local network to realize the business plan of own program for solving social issues, verify with prototypes of products and services as a solution, and clarify points for improvement. The focus is on reducing the risks of working as a full-fledged social entrepreneur by preparing to start a business while still in the graduate school. Although it is named “study”, it is not research for the study of writing an academic paper.</p> <p>Prior to the field study, it is necessary for students to first formulate a business plan to implement ideas for solving social issues at the place of activity through Advanced Seminar in which students receives individual guidance from a supervisor.</p> <p>In addition, the location of Field Study will be decided according to students’ own interest and activities either in Japan or overseas.</p>
Learning Objectives & Goals	<p>This course contributes to the achievement of 7 objectives of 2 learning goals mentioned below. For the accomplishment of these objectives, this course covers issues needed to be implemented in establishing actual businesses for solving social issues.</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>ML1 ML2 MM1 (for ISEP): Able to demonstrate the sensitivity to different perspectives and opinions of those from different international backgrounds. MM2 (for ISEP): Able to identify and articulate common viewpoints among different and possibly conflicting opinions of those from different international backgrounds. MM3 (for ISEP): Able to acquire skills to communicate with people from diverse international backgrounds. MI1 (for ISEP): Able to demonstrate ability to identify social issues. MI2 (for ISEP): Able to demonstrate ability to analyze fundamental factors of social issues. MI3 (for ISEP): Able to demonstrate ability to connect different ideas for creating new solutions toward factors of social issues. MI4 (for ISEP): Able to demonstrate ability to establish systems with business knowledge for providing solutions to social issues sustainably</p>
Delivery Methods	<p>Field Study is an independent activity. Students will receive online support by a supervisor.</p>
Assessment	<p>Final grades will be based on periodical consultation to a supervisor as well as Completion Report. Standard format of Completion Report will be provided by the program director of ISEP.</p>
Prerequisites	

Method of feedback from instructor to students for exams/papers	Feedback and support will be provided online during Field Study			
Textbook(s)	Required: Reference Books / Journal Articles:			
Note on Textbooks and Reference Books				
Class Outline	Class	Topic	Required preparation /homework	Required post-study
		Total		0h
Others	It is necessary to have consultation prior to Field Study well in advance with the program director of ISEP regarding the venue of the study.			

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Spring Term

Course	Schedule code MGT2010101	Course title Human Resource and Global Talent Management	
Name of Instructor	Hirose, Shinichi		Credits 2
Instructor's contact information	Office#	Office Hours By ad-hoc appointment (flexible). You can also ask questions etc., during the lunch break or after the class	E-mail
Class Schedule Day / Period	Fri.4~5		

Course Description	<p>This course covers fundamental human resource management (HRM) and global talent management (GTM) concepts, especially in globally deployed organizations. It provides a practical understanding of significant issues and typical challenges.</p> <p>The contents of human resource management (HRM) lay the foundations for people management practices. Likewise, the materials included in global talent management (GTM) expose the class participants to international organizations' most contemporary people management challenges.</p> <p>Another focal point of this course is assessing and developing globally diversified people. We examine various methods for people evaluation and training.</p> <p>[CAUTIONARY NOTICES]</p> <p>** Actual HRM practices are quite different from organization to organization. ** Also, due to the differences in regularity laws among countries, the detailed applicability of specific HRM practices differs from country to country. ** Therefore, this course provides fundamental topics that are highly similar worldwide. We do not have time to discuss country- or organization-specific issues outside this course's scope. ** Topics on GTM are primarily applicable worldwide compared with HRM topics.</p>
Learning Objectives & Goals	<p>Under the umbrella concept of human resource management, we learn the following four topics:</p> <ul style="list-style-type: none"> - Job Grading and Compensation Structure - Succession Planning and Advancement Procedures - People and Organization Development (OD) - People Analytics <p>Under the umbrella concept of global talent management, we learn the following three topics:</p> <ul style="list-style-type: none"> - Global Mobility - Expatriate Management - Local Workforce Management

	<p>Associated with the assessment and development of people, we consider the following aspects:</p> <ul style="list-style-type: none"> - Assessment Techniques and Procedures - Ensuring Fairness <p>[Career Relevance]</p> <p>This course is suitable for students who seek a more profound understanding of people and organization management in a global context. The knowledge and skills expected to be acquired in this course are also highly relevant to those pursuing general management and human resource careers.</p> <p>[Course Context and Rationalization]</p> <p>Global organizations today face competitive challenges regarding the speed of their people's deployment worldwide. As a result, organizations can no longer rely on their headquarters for global mobility management (hub-and-spoke structure). Still, they must operate under a "distributed network" so that regional operations can directly access other regions' resources without interacting with their headquarters.</p> <p>Another critical issue is assessing and developing a highly diverse group of people. Organization members should perceive any assessment as fair and provide management with valid and non-biased findings. Similarly, people development activities must appropriately and adequately impact diverse people with customized approaches.</p>
<p>Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses</p>	<p>[For 2MBA and IMBA]</p> <p>MM1: Able to demonstrate the sensitivity to different perspectives and opinions of those from different international backgrounds</p> <p>MM2: Able to identify and articulate common viewpoints among different and possibly conflicting opinions of those from different international backgrounds</p> <p>MM3: Able to acquire skills to communicate with people from diverse international backgrounds</p> <p>MD1: Able to apply the concepts of strategic management, recognizing internal and external strategic contexts</p> <p>MD3: Able to demonstrate ability to make a strategic decision under pressure</p> <p>MF1: Able to demonstrate understanding of Management Knowledge</p> <p>[For DXP]</p> <p>MF7: Able to demonstrate understanding of Business Knowledge</p> <p>MT3: Able to implement digital transformation while taking into account organizational and environmental implications</p>
<p>Delivery Methods</p>	<p>Delivery Methods:</p> <ol style="list-style-type: none"> 1. Case discussions <ol style="list-style-type: none"> 1.1. Group discussion <ol style="list-style-type: none"> 1.1.1. ALL students MUST join the breakout with individual preparation by reading and analyzing the case material(s) 1.2. Class-wide discussion, where each student is expected to speak up individually

	2. Lectures (includes critical concepts of the week, supplementary topics, and the case wrap-up)				
Assessment	<ul style="list-style-type: none"> - Weekly Case Memos (submit 1 to 3 pages of analysis memo, with a minimum of 300 words of original writing), for Weeks 2, 3, 4, 5, 6, and 7 (six submissions): 18% - Class Participation (active involvement in discussions, in terms of quality and impact): 20% - Peer Evaluation (discussion group member survey, conducted during the final class): 20% - Week 7 Post-lecture Report (Week 7, submission due AFTER the class) 20% - Final Essay due before Week 8 session: 22% 				
Prerequisites	The Organizational Behavior course or equivalent upfront.				
Method of feedback from instructor to students for exams/papers	<ul style="list-style-type: none"> - Pass/Fail for Case Memos - The criteria for others are based on the predefined Rubrics available on Google Classroom before the assignment. <p>Case Memos, the WK7 Report, and the Final Essay should be submitted to the designated locations on Turnitin. Feedback for these outputs will also be given on Turnitin.</p> <ul style="list-style-type: none"> - Participation and Peer Evaluation results are reported on Google Classroom.

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Spring Term

Course	Schedule code MGT2060101	Course title Competing in Emerging Markets	
Name of Instructor	Zhang Zhang, Yingying		Credits 2
Instructor's contact information	Office#	Office Hours After class or by appointment.	E-mail
Class Schedule Day / Period	Wed.2~3		

Course Description	<p>Emerging Markets stand at the forefront of international business interest, not only due to their vast market potential but also the increasing influence of enterprises within these regions. This course delves into the intricacies of navigating the challenges and capitalizing on the opportunities inherent in conducting business and managing operations in emerging markets.</p> <p>A comprehensive exploration of the social, economic, and institutional factors unique to emerging markets forms the core of this course. It critically analyzes specific organizational strategies essential for overcoming obstacles and leveraging opportunities within these dynamic environments. The curriculum also delves into the ascendance of multinational corporations from emerging markets, with a particular emphasis on the management philosophies and practices of Chinese enterprises and their leaders.</p> <p>The course utilizes a case-based approach, drawing on diverse scenarios from different global regions and pivotal industries. Pedagogically, the emphasis is on the case method, seamlessly integrating lectures, interactive participation, real-time news presentations, and guest speakers to bridge theoretical concepts with practical business applications. Participants can expect a nuanced understanding of the complexities associated with competing in emerging markets and gain valuable insights into effective managerial approaches.</p>
Learning Objectives & Goals	<p>This course aligns with the overarching learning objectives of multicultural awareness, problem-solving, functional business knowledge, and strategic decision-making. It is designed to facilitate the achievement of the following specific learning goals:</p> <p>1. Multicultural Awareness:</p> <ul style="list-style-type: none"> - Develop a heightened understanding of the diverse social, economic, and institutional factors that characterize emerging markets. - Explore and appreciate the cultural nuances and implications influencing business operations and management practices within these markets. - Foster an awareness of the global business landscape by examining case studies from various regions and industries. <p>2. Problem Solving:</p> <ul style="list-style-type: none"> - Equip students with the analytical tools and frameworks necessary to identify and

	<p>address challenges specific to emerging markets.</p> <ul style="list-style-type: none"> - Cultivate critical thinking skills through the analysis of real-world cases, enabling students to devise effective solutions to complex business problems. - Encourage the application of problem-solving strategies in a multicultural context, considering the unique challenges and opportunities presented by emerging markets. <p>3. Functional Business Knowledge:</p> <ul style="list-style-type: none"> - Acquire a comprehensive understanding of organizational strategies tailored for emerging markets, encompassing areas such as market entry, resource allocation, and risk management. - Explore the management philosophies and practices of multinational corporations, with a specific focus on the Chinese business landscape. - Develop a nuanced perspective on the dynamics of different industries and regions, enhancing functional business knowledge applicable in diverse global settings. <p>4. Strategic Decision Making:</p> <ul style="list-style-type: none"> - Enhance strategic decision-making skills by synthesizing theoretical concepts with practical insights from case studies and real-world examples. - Foster an ability to assess and capitalize on opportunities in emerging markets while effectively mitigating associated risks. - Encourage a forward-thinking approach to strategic decision making, aligning business strategies with the evolving landscape of emerging markets. <p>By addressing these learning objectives, the course aims to empower students with the knowledge and skills required to navigate the complexities of business and management in emerging markets, contributing significantly to their overall academic and professional development.</p>
<p>Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses</p>	<p>MM1 Able to demonstrate the sensitivity to different perspectives and opinions of those from different international backgrounds.</p> <p>MM2 Able to identifying and articulating common viewpoints among different and possibly conflicting opinions of those from different international backgrounds.</p> <p>MM3 Able to acquire skills to communicate with people from diverse international backgrounds.</p> <p>MP1 Able to demonstrate ability to formulate/define issues.</p> <p>MP2 Able to demonstrate ability to analyze and compute.</p> <p>MP3 Able to demonstrate ability to interpret concepts and data.</p> <p>MP4 Able to demonstrate ability to evaluate and make choices among alternatives.</p> <p>MF1 Able to demonstrate understanding of Management Knowledge.</p> <p>MD1 Able to apply the concepts of strategic management, recognizing internal and external strategic contexts.</p> <p>MD2 Able to demonstrate ability to gather and interpret data.</p>
<p>Delivery Methods</p>	<p>The course mainly uses case method for the pedagogy purpose, combining lectures, interactive participation, presentation of actual news, and guest speaker to tie theories to business practices.</p>
<p>Assessment</p>	<ol style="list-style-type: none"> 1. Class participation (40%) 2. Case report (30%) 3. Presentation (20%)

	<p>4. Quizzes (10%)</p> <p>Class Participation Grading Criteria: Each student will be graded in terms of participation in each session. The grade is 1-4 scale. 4 is excellent, 3 is good, 2 is poor while 1 is very poor. 1: Participation of a student has negatively impacted the class; A student arrives 15 minutes late to the class without any justified reason; A student leaves the class before the time without any justified reason. 2: A student is present but hasn't participated; Participation of a student is insignificant; A student is second-time justified absent. 3. Participation of a student has positively impacted the class. 4: Participation of a student has significantly and positively impacted the class.</p> <p>Notes: - Participation includes (not an exhaustive list) participating in discussions, asking questions, adding comments, or providing feedback. - Frequency of participation is not counted in a class with more than 15 students. - If a student is first-time (per day, not per session) justified absent, the grade will use the average of her/his overall participation. - If a student is absent without any justification, the grade will be 0.</p>
Prerequisites	No specific prerequisite. The basic knowledge on International Management is preferable but it is not a prerequisite.
Method of feedback from instructor to students for exams/papers	Feedback will be communicated by the instructor via digital means when necessary.

 Graduate School of International Management (Master's Program)
 2025 Spring Term

Course	Schedule code MGT2080101	Course title Corporate Strategy in a Technology and Digital Era	
Name of Instructor	Zhang Zhang, Yingying		Credits 2
Instructor's contact information	Office#	Office Hours After class or by appointment.	E-mail
Class Schedule Day / Period	Thu.2~3		

Course Description	<p>Navigating the intricacies of corporate strategy in the Technology and Digital Era is a paramount challenge for businesses seeking to create value across diverse industries. This course delves into the fundamental questions of where to compete and how to strategically position a firm, with a keen focus on the transformative effects of technology and digitalization on society and industry.</p> <p>The curriculum equips participants with effective analytical tools tailored for corporate-level decision-making, transcending individual business units. Beyond competitive strategy, the course addresses crucial considerations such as investment choices, business portfolio development, resource and capability cultivation, organizational structure design, and the alignment of corporate functions. Central to this exploration is the pivotal role played by technology and digitalization in shaping and executing corporate strategy.</p> <p>This course offers practical insights into the dynamic realm of Corporate Strategy in the Technology and Digital Era, catering to firms of all sizes and sectors. Participants will gain a holistic understanding of the analytical tools and strategic considerations essential for navigating the complexities of the digital landscape, empowering them to craft effective and forward-thinking corporate strategies.</p>
Learning Objectives & Goals	<p>This course aligns with the overarching learning objectives of problem-solving, functional business knowledge, and strategic decision-making. It is designed to facilitate the achievement of the following specific learning goals:</p> <ol style="list-style-type: none"> 1. Problem Solving: <ul style="list-style-type: none"> - Develop advanced problem-solving skills by addressing real-world challenges faced by corporations in the dynamic landscape of technology and digitalization. - Apply various frameworks and analytical tools to diagnose and resolve complex issues encountered in corporate strategic management. - Foster critical thinking in evaluating the impact of technology on business strategies and formulating effective solutions. 2. Functional Business Knowledge: <ul style="list-style-type: none"> - Acquire a deep understanding of how technology and digitalization influence corporate strategy, including business portfolio development, resource allocation, and capability building. - Explore the nuances of managing businesses in diverse sectors, from startups to

	<p>established IT giants, in the context of the digital era.</p> <ul style="list-style-type: none"> - Gain insights into the practical application of functional business knowledge within the specific challenges posed by technological advancements. <p>3. Strategic Decision Making:</p> <ul style="list-style-type: none"> - Enhance strategic decision-making skills by analyzing case studies and real-world examples that illustrate the strategic choices made by corporations in response to technological changes. - Evaluate the role of corporate headquarters in steering strategic decisions and fostering synergy across diverse businesses in a technology-driven environment. - Develop a forward-thinking approach to strategic decision making, aligning corporate strategies with the rapidly evolving landscape of technology and digitalization. <p>By addressing these learning objectives, the course aims to empower participants with the knowledge and skills required to navigate the complexities of strategic management at the corporate level in the Technology and Digital Era. Through the discussion of various frameworks, case studies, and practical applications, participants will be well-prepared to tackle challenges, make informed decisions, and contribute strategically to the success of their organizations.</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>MP1 Able to demonstrate ability to formulate/define issues. MP2 Able to demonstrate ability to analyze and compute. MP3 Able to demonstrate ability to interpret concepts and data. MP4 Able to demonstrate ability to evaluate and make choices among alternatives. MF1 Able to demonstrate understanding of Management Knowledge. MD1 Able to apply the concepts of strategic management, recognizing internal and external strategic contexts. MD2 Able to demonstrate ability to gather and interpret data.</p>
Delivery Methods	The case method and group presentations.
Assessment	<p>The assessment will be based on:</p> <ol style="list-style-type: none"> 1. Class participation (30%) 2. Case report (30%) 3. Group Presentation (20%) 4. Quizzes (20%)
Prerequisites	No specific prerequisite. The basic knowledge on Strategic Management is preferable but it is not a prerequisite.
Method of feedback from instructor to students for exams/papers	Feedback will be sent by mail from an instructor.

Others	<p>Note: The sessions are subject to adjustments in accordance with learning progress and guest speaker session arrangement.</p> <p>Team Work: Three or four members will be organized into teams in the class in the first week class to analyse a company for cases and actual company project, and present their findings.</p> <p>Class Participation Grading Criteria: Each student will be graded in terms of participation in each session. The grade is 1-4 scale. 4 is excellent, 3 is good, 2 is poor while 1 is very poor. 1: Participation of a student has negatively impacted the class; A student arrives late or leaves the class earlier without any justified reason; A student leaves the class before the time without any justified reason. 2: A student is present but hasn't participated; Participation of a student is insignificant; A student is second-time justified absent. 3. Participation of a student has positively impacted the class (good contribution). 4: Participation of a student has significantly and positively impacted the class (excellent contribution).</p> <p>Notes: Participation includes (not an exhaustive list) participating in discussions, asking questions, adding comments, or providing feedback. If a student is first-time (per day, not per session) justified absent, the grade will use the average of her/his overall participation. If a student is absent without any justification, the grade will be 0.</p> <p>Other references:</p> <p>Reference books: Grant, R. M. (2016). Contemporary Strategy Analysis. Course	Schedule code MGT2210101	Course title Strategies for Digital Disruption	
Name of Instructor	Wakayama, Toshihiro		Credits 2
Instructor's contact information	Office#	Office Hours By appointment	E-mail
Class Schedule Day / Period	Thu.4~5		

Course Description	<p>Course Concept</p> <p>-----</p> <p>The core concept of this course rests on the following dual competitive realities driven by increasingly pervasive digital infrastructure that underlie today's economic and related activities:</p> <ul style="list-style-type: none"> • New generations of digital technologies impact the whole value chain of business activities from branding to marketing to operations to organizational capability building. These impacts throughout the value chain are collectively enabling a host of new strategies that are often disruptive to conventional, pre-digital businesses. • Incumbent businesses, however, are not standing still (e.g., Walmart taking on Amazon): while leveraging their core strengths, they often embrace their own digitization initiatives in response to threats posed by born-digital players or sometimes preemptively to exploit digital opportunities. <p>The course aims to uncover the forefront of such competitive realities and thereby better prepare students for their managerial responsibilities.</p>
Learning Objectives & Goals	<p>Learning Objectives</p> <p>-----</p> <ul style="list-style-type: none"> • To understand strategic impacts of new digital technologies (e.g., Blockchain, AI, two-sided digital platforms). • To gain insights on how digitally-enabled strategies are often disruptive to conventional businesses. • To be able to analyze and assess strategic options available to incumbent businesses to counter disruptive moves of digitally equipped competitors.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>MP1(MBA): Able to demonstrate ability to formulate/define issues.</p> <p>MP2(MBA): Able to demonstrate ability to analyze and compute.</p> <p>MP3(MBA): Able to demonstrate ability to interpret concepts and data.</p> <p>MP4(MBA): Able to demonstrate ability to evaluate and make choices among alternatives.</p> <p>MF1(MBA, JGDP, DXP): Able to demonstrate understanding of Management Knowledge.</p> <p>MF6(MBA): Able to demonstrate understanding of Data Analysis and Digital Technology.</p> <p>MD3(IMBA): Able to demonstrate ability to make a strategic decision under pressure.</p>

	<p>MT2(DXP): Able to employ suitable technology element to create a business or add competitive value to an organization</p> <p>MT3(DXP): Able to implement digital transformation while taking into account organizational and environmental implications.</p>				
Delivery Methods	Case-based, supplemented by mini lectures on core concepts such as blockchain.				
Assessment	<p>Final Exam (Case Analysis): 60%</p> <p>Class Participation: 40%</p>				
Prerequisites	None.				
Method of feedback from instructor to students for exams/papers	<p>Comments and further questions in class on the case analysis assignment.</p> <p>Detailed feedback, written or online session, upon request on the final exam.</p>				
Textbook(s)	<p>Required:</p> <p>Reference Books / Journal Articles:</p> <p>a) Title: The Blockchain and the New Architecture of Trust, b) Edition: , c) Author: , d) Publisher: MIT Press, e) Year: 2018, f) ISBN:</p> <p>a) Title: Competing in the Age of AI, b) Edition: , c) Author: , d) Publisher: HBR Press, e) Year: 2020, f) ISBN:</p> <p>a) Title: Blockchain Science, b) Edition: 3, c) Author: , d) Publisher: Inverted Forest, e) Year: 2019, f) ISBN:</p>

Course	Schedule code MGT2240	Course title Global Strategy in the Digital Age	
Name of Instructor	Toshiro Wakayama		Credits 1
Instructor's contact information	Office#	Office Hours By appointment	E-mail
Class Schedule Day / Period	6/20 (Friday, 3&4 periods), 6/21 (Saturday, 3&4 periods), 6/23 (Monday, 4&5 periods) and 6/24 (Tuesday, 4&5 periods)		

Course Description	<p>Today, competitions in many industries and in many parts of the world are becoming increasingly global due to the rapid rise of emerging economies, continuously integrated world economies, and more recently game-changing advances in digital technologies. Global strategy is about winning such competitions and it takes place on the “global chess board” where the scope of actual or intended business engagement is the entire globe. In such competitive circumstances, even a domestic competition would not complete its story unless interpreted in the context of global-scale competitive advantage. This course examines the forefront of such global competitions by focusing on industries where the impacts of digital technologies are most prominent.</p> <p>Analytically, the overarching framework deployed throughout the course is the conflicting/competing strategic objectives of global integration (driver for uniformity) and local adaptation (driver for variation). These competing strategic priorities, however, can coexist and can be even mutually reinforcing in actual competitive pursuits of global or globalizing firms. The three pillars of capabilities to cultivate throughout the course are:</p> <ul style="list-style-type: none"> • To understand impacts of digital technologies on how firms compete globally. • To gain insights on how firms succeed in turning global presence into global competitive advantage, particularly through active deployment of digital technologies. • To appreciate what it takes to pursue both global integration and local adaptation to compete effectively in the digitally-powered business environment today.
Learning Objectives & Goals	
Contribution to the Diploma Policy (knowledge, skills)	<p>This course fulfills the following MEXT learning objectives:</p> <p>MBA, MF6: Able to demonstrate understanding of Data Analysis and Digital Technology</p>

and attitude which can be acquired through this course for obtaining the degree concerned)	DXP, MT1: Able to understand the latest technology trend DXP, MT2: Able to employ suitable technology element to create a business or add competitive value to an organization DXP, MT3: Able to implement digital transformation while taking into account organizational and environmental implications

Course	Schedule code MGT2320	Course title Leadership Boot Camp	
Name of Instructor	Tsutomu Yokose		Credits 1
Instructor's contact information	Office#	Office Hours Upon request	E-mail
Class Schedule Day / Period	June 16 (Mon)- 13:00-14:30, 14:40-16:10 June 17 (Tue)- 13:00-14:30, 14:40-16:10 June 18 (Wed)- 10:30-12:00, 13:00-14:30, 14:40-16:10 June 19 (Thu) - 13:00-14:30, 14:40-16:10, 16:20-17:50		

Course Description	<p>Through this course, students will experience “Assessment Center” program which is a standard leadership development program in global companies. By experiencing the real-world practice, students can see how their capability as a leader will be measured and how the development plan for leadership capability will be set up with ownership, which is aligned with a corporate strategy. This experience will give students an opportunity to see how they will be developed in a business organization after graduation.</p>
Learning Objectives & Goals	<p>One of the single-most important capabilities of a Leader is the ability to make informed strategic decisions without having access to perfect and complete information. This course is meant to serve as a “Capstone” course within the 1-Year MBA curriculum, bringing together all of the hard and soft skills students have learned to become effective global leaders, and put these into practice through real-time interactions with the senior leadership team of a chosen company. This course will focus on enabling participants to develop to practical skills and capabilities to analyze imperfect and incomplete information within a constantly changing and real business environment.</p> <p>Also, students will Understand the strength and development areas of own leadership competencies, how those competencies will be measured, and how to develop own competency in the real business occasion to be a competent business leader.</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course)	<p>Following Learning Objectives are defined for the completion of degree</p> <p><IMBA></p> <p>MM-1 Able to demonstrate the sensitivity to different perspectives and opinions of those from different international backgrounds</p> <p>MM-2 Able to identify and articulate common viewpoints among different and</p>

for obtaining the degree concerned)	<p>possibly conflicting opinions of those from different international backgrounds</p> <p>MM-3 Able to acquire skills to communicate with people from diverse international backgrounds</p> <p>ML-1 Able to demonstrate understanding of leadership concepts and practices</p> <p>ML-2 Able to listen well and have empathy with other people.</p> <p>MD-1 Able to apply the concepts of strategic management, recognizing internal and external strategic contexts</p> <p>MD-3 Demonstrate ability to make a strategic decision under pressure</p> <p><DXP></p> <p>ML-1 Able to demonstrate understanding of leadership concepts and practices</p> <p>ML-2 Able to listen well and have empathy with other people.</p> <p>ML-3 Able to take a strategic initiative and lead an organizational transformation</p> <p>ML-7 Able to demonstrate understanding of fundamental business knowledge</p>

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Spring Term

Course	Schedule code MGT2340101	Course title Business Presentation	
Name of Instructor	Ahmed, Mohammed Khurshid		Credits 2
Instructor's contact information	Office#	Office Hours By appointment	E-mail
Class Schedule Day / Period	Tue.4~5		

Course Description	<p>Presentation is the killer skill we take into the real world.”--The McKinsey Mind. "Presentation...[is] a core skill for the twenty-first century."--Chris Anderson, Head of TED.</p> <p>This course could also be seen as a course on “Power Presentation.”</p> <p>Both GSIM and GSIR students can take this course.</p> <p>The ability to present persuasively has become a key to successful professional career in today’s world, particularly careers involving management and leadership positions.</p> <p>This course will be offered in a F2F (Face-to-Face) classroom setting. It will help you develop a clear understanding of and skills for primarily face-to-face presenting; it will also provide opportunities for virtual presenting.</p> <p>In this course, you will learn about both content and delivery in presenting. You will learn about how to create a powerful core message, and how to develop your core message through clear logical structuring. You will also develop skills for story telling—a powerful way in presenting. You will learn how to emotionally engage your audience and then logically convince them, with the aim to effectively persuade them to take the action you want them to.</p> <p>Additionally, you will develop understanding of and skills for natural delivery. You will develop your ability to talk to your audience directly, simply, and confidently. You will also learn about effectively giving peer feedback on the presentations of your classmates, as well as, receiving feedback as a presenter yourself from your classmates and the instructor. Giving and receiving feedback on presentations greatly helps you develop yourself as an effective presenter.</p> <p>Fundamentally, this course is designed to increase your understanding and awareness of the importance of persuasive communication, to learn more about the concepts and theories associated with it and how to apply them in a simple, practical, logical, and thoughtful way. Fundamental to this is influence, or how you move people to your way of thinking with or without formal authority. The success of anything you set out to achieve in business or profession will depend largely on your ability to influence others to support, act, fund, buy, vote, etc.</p>
--------------------	--

	<p>This is an intensive and fast-paced course. It has highly interactive and enjoyable classroom dynamics. Students will actively participate and make positive contributions to the class.</p> <p>The short-term benefit of this course will be your ability to formulate and deliver effective class presentations during your IUJ study. In the long run, you will develop communication skills vital for your professional development and advancement.</p>
<p>Learning Objectives & Goals</p>	<p>This is both a deeply conceptual and a highly practical course. It focuses on developing “presenter’s mindset,” “psychological presence,” and “audience empathy,” as well as, practical skills for effective presentations. It builds up your confidence as a presenter in front of an audience (face-to-face or virtual).</p> <p>At the conclusion of this course, students will:</p> <ul style="list-style-type: none"> ○ be able to speak simply, logically and assertively; ○ be more confident, understand nervousness and be able to work to overcome it; ○ be able to structure and deliver a clear, logical, prepared presentation to an audience, based on value to the audience; ○ understand the concept of messaging, and know how to find, construct and deliver a strong and sticky message; ○ understand how, and be able, to constructively address emotion in an audience through verbal and nonverbal communication; ○ be able to deliver naturally in a conversational style; ○ be able to talk to the audience directly in virtual space; ○ be able to give and receive constructive feedback on classmates’ presentations.
<p>Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses</p>	<p>[For MBA/IMBA/JGDP]</p> <p>MM3: Able to acquire skills to communicate with people from diverse international backgrounds.</p> <p>ML2: Able to listen well and have empathy with other people.</p> <p>[For IDP_ID]</p> <p>DK5: Be able to articulate and communicate messages to policymakers that are major influences on the issues concerned.</p> <p>DS4: Demonstrate capacity to communicate main messages on development policies and reforms to all stakeholders, including policy makers, academia, and civil society, in an easy language to facilitate the process of economic reforms</p> <p>DA1: Enthusiastic and great initiative to think development issues in logical, critical, and creative ways</p> <p>[For IDP_Econ]</p> <p>ES4: With effective communication skills for formulating economic arguments, providing insight and advice to both government and private sector stakeholders on economic and public issues</p> <p>EA1: Enthusiastic and great initiative to think in logical, critical, and creative ways</p>

<p>Delivery Methods</p>	<p>Classes will be offered F2F (Face-to-Face) in a classroom setting. There will be sixteen 90-minute sessions. In addition, separate feedback and consultation sessions will be provided for the team presentations in group meetings outside the classroom setting. There will be interactive lectures, group discussions, and presentation activities. Google Classroom will be used to share course information and materials and participate in any written class discussions and communications. In addition, a suitable presentation tool, easily accessible, will be used for virtual presenting.</p> <p>Since this course is designed to develop both sound conceptual understanding and practical skills, presentation training occupies 50% of the classroom time. The training part is highly individualized.</p> <p>The course consists of lectures, group discussions, interactive exercises, and a series of individual & team presentations with immediate constructive feedback. In addition to text materials from various sources, the course will make use of a series of selected TED-talks for modelling and in-class discussions. Examples of expert presenters and presentation commentators from YouTube and other video sources will also be used. Links to expert websites, TED talks, YouTube videos, and some other online sources will be provided for follow-up self-study and development after the course.</p> <p>Each week, the sessions will usually begin with individual presentation activities, applying the learning and the giving and receiving of feedback. There is as much practice as possible in speaking in group environment, and receiving helpful feedback from peers and the instructor. These activities will be followed by interactive lectures and active discussions, leading to assigned presentation and discussion activities for the following week.</p>
<p>Assessment</p>	<p>Demonstrating persistent efforts and development in individual and team presentations, active class participation, and positive contributions to class dynamics & group work are crucial parts of the learning experience in this course. Regular and timely attendance would greatly contribute to all these achievements.</p> <p>The final grade will be based on:</p> <ul style="list-style-type: none"> o Team presentations (mid-term and final): 50% o Individual presentations (both F2F and virtual): 30% o Engagement, as demonstrated by consistent and clear presence in the classroom, preparedness based on assigned readings, active involvement in and positive contributions to class activities and discussions, giving and receiving peer feedback comments, and doing positive group work for team presentations: 20%
<p>Prerequisites</p>	<p>This course does not require any prior training or experience in oral presentations. However, students with prior training or experience will also find this course useful to further develop their conceptual understanding and practical skills.</p> <p>This course is offered to all the IUJ students. Students in any GSIM or GSIR program (including exchange programs) may enroll.</p>

<p>Method of feedback from instructor to students for exams/papers</p>	<p>Given the focus of this course on oral presentations, peer feedback and instructor's feedback in real time on individual presentations will be given. Feedback will be based on clear assessment criteria. Instructor will also provide video feedback. For the mid-term and the final team presentations, group meetings with the instructor outside the classroom setting will be held. The instructor will provide feedback based on clear grading criteria. After the course has ended, through individual meetings, the instructor will provide opportunities for detailed feedback on a student's performance in terms of their individual presentation activities, team presentations, and engagement. Recommendations for future development of presentation skills through self-learning will be provided.</p>

International University of Japan
Graduate School of International Management
2025 Summer Term

Course	Schedule code MGT3020	Course title International Career Development (ICD)	
Name of Instructor	Yoshitaka Yamazaki/ Mohamed Ahmed		Credits 1
Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	ICD sessions are scheduled on June 19, June 20, June 23 and June 30.		

Course Description	<p>This course introduces concepts/ideas of international career development and their application to your own career. It covers the basic knowledge of career vision and that of learning skills and demands in international work settings. The uniqueness of this course is to focus on yourself and others in class. As such, you are strongly required not only to think about yourself but also to communicate with your classmates as well. Assuming that you pursue various managerial positions in organizations, you will have to manage your own career and develop others as a leader/manager. In the process of making your career vision and goals, you are required to evaluate yourself with regard to who you are and what you want to become. In this respect, the course provides you useful assessment tools and techniques that are important to know yourself. After completing the course, you are expected to have a live document of your career development plan and embark on your journey towards an established destination with confidence.</p>
Learning Objectives & Goals	<p>This course provides international career development knowledge to business program students. Particularly, it contributes to the achievement of AACSB Learning Goals for 1-year IMBA students.</p> <p>Upon completion of this course, students will be able to:</p> <ol style="list-style-type: none"> (1) demonstrate understanding of international career development knowledge. (2) discuss career development issues properly in a group meeting and class. (3) listen well and have empathy with others (4) analyze own career development (5) demonstrate the sensitivity to different perspectives and opinions of those from different backgrounds.
Contribution to the Diploma Policy (knowledge, skills and attitude which	<p>This course fulfills the following MEXT learning objectives:</p> <p>MM1 (IMBA): Demonstrate sensitivity to different perspectives and opinions of those from different backgrounds</p> <p>ML2 (IMBA): Listen well and have empathy with others</p>

can be acquired through this course for obtaining the degree concerned)	MF1 (MBA): Demonstrate understanding of international career development knowledge																																																												
Delivery Methods	There will be short lectures, case studies, feedback sessions, and active workshops. Google Classroom will be mainly used for materials, assignment instructions, and communications, whereas Gmail delivery methods are also used if necessary. The recording function in Ppt. Slideshow will be used for asynchronous virtual presentations.																																																												
Assessment	<p>In determining grades, specific assignments will be weighted as follows:</p> <ul style="list-style-type: none"> • My career development plan—final paper (50%) • Presentations (30%) • Participation (20%) <table border="1"> <thead> <tr> <th></th> <th colspan="5">Learning Objectives</th> </tr> <tr> <th>Assessment methods</th> <th>(1)</th> <th>(2)</th> <th>(3)</th> <th>(4)</th> <th>(5)</th> </tr> </thead> <tbody> <tr> <td>Class Participation</td> <td></td> <td>100%</td> <td>100%</td> <td></td> <td>100%</td> </tr> <tr> <td>Group Presentation</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>Midterm Exam</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>Final Exam</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>Peer Review</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>Final Report</td> <td>62.5%</td> <td></td> <td></td> <td>62.5%</td> <td></td> </tr> <tr> <td>Individual Presentations</td> <td>37.5%</td> <td></td> <td></td> <td>37.5%</td> <td></td> </tr> <tr> <td>Weight on Final Grade</td> <td>40</td> <td>10</td> <td>5</td> <td>40</td> <td>5</td> </tr> </tbody> </table>		Learning Objectives					Assessment methods	(1)	(2)	(3)	(4)	(5)	Class Participation		100%	100%		100%	Group Presentation						Midterm Exam						Final Exam						Peer Review						Final Report	62.5%			62.5%		Individual Presentations	37.5%			37.5%		Weight on Final Grade	40	10	5	40	5

Prerequisites	None																																																												
Method of Feedback for Exams/Papers	The instructor will return graded papers with written feedback comments. Also, the instructor will give oral feedback to students on their presentations.																																																												
Required Textbook(s)	This course uses ICD course packet that includes articles and assessments. In addition, the course plans to use the following case: Martha Goldberg: Leadership Decisions at Mid-Career, (2005), No.9-406-017, Harvard Business School.																																																												
Reference Books	TBA																																																												
Other Materials	<p>(1) Assignment documents: Nos. 1 to 3.</p> <p>(2) Learning skills and demands' questionnaires. These questionnaires are provided in advance of this course. Participants are required to answer them by a fixed date.</p>																																																												

Class Outlines	Class	Contents	
	1	Topic	Introduction and Career Vision
Required preparation		Read “Full Steam Ahead” (pp. ix-xii, & 1-27).	1 h
Required post-study		Think about your “Big rocks in your life”, and write them down.	1 h
2	Topic	Creating Positive Self-Image	
	Required preparation	Think about what your positive image is and what you want to become.	1 h
	Required post-study	Extract your career component from the Catch-A-Dream exercise, and write it down clearly.	1 h
3	Topic	Significant Purposes and Goal Settings	
	Required preparation /homework	Read “Full Steam Ahead” (pp. 28-56). Prepare “Assignment No. 1”.	3 h
	Required post-study	Complete your significant purposes and career goals, and incorporate them into your career development plan	1 h
4	Topic	Learning Skills and Demands in International Work Settings	
	Required preparation /homework	Read “Expatriate Adaptation: A Fit between Skills and Demands among Japanese Expatriates in USA” <u>OR</u> “Using a Competency Approach to Understand Host Country National Managers in Asia.”	3 h
	Required post-study	Explain your learning skills and demands, and incorporate your skills and demands into your career development plan.	1 h
5	Topic	Career Anchors and Mid-life Career (move to topic 6, if possible)	
	Required preparation /homework	Prepare “Assignment No. 2.” Read “Career Anchor.” Read “Martha Goldberg: Leadership Decisions at Mid-Career”, and answer the case question.	3 h
	Required post-study	Incorporate your career anchor into the career development plan. Make a short self-introductory presentation (asynchronously in virtual space)	3 h
6	Topic	Core Values and Future Picture	
	Required preparation /homework	Read “Full Steam Ahead” (pp. 57-84). Prepare “Assignment No. 3”	3 h
	Required post-study	Incorporate your values and vivid picture of your future into the career development plan.	1 h
7	Topic	Career Development Plan	

	Required preparation /homework	Check progress of your career development plan, and figure out which portions should be improved in the career development plan. Start to write about Introduction and Conclusion of your career development plan.	3 h
	Required post-study	Incorporate Introduction and Conclusion into your career development plan. Improve descriptions in the career development plan.	1 h
	8	Topic	In-Class Presentations: Sharing Your Career Development
	Required preparation	Prepare individual presentations with (optional) power point slides	7 h
	Required post-study	Integrate your presentation into your career development plan. Complete your career development plan. Prepare and make the last (wrap-up) presentation (asynchronously in virtual space)	15 h
	Total		
Others	Y. Yamazaki is responsible for teaching sessions 1-4. M. Ahmed is responsible for teaching sessions 5-8.

International University of Japan
Graduate School of International Management
2025 Spring (Special)

Course	Schedule code MGT3030	Course title Strategy Simulation	
Name of Instructor	Mark Roeske		Credits: 1
Instructor's contact information	Office# n/a	Office Hours: arrange by email or in person during class	E-mail
Class Schedule Day / Period	Pre-sessions: June 24 and 25 (2 & 3 periods) June 27 – July 2 (2 & 3 periods) and July 3 (2 period)		

Course Description	<p>Strat Sim is an intensive one-week interactive course where you compete in an online simulation to achieve the best profitability, stock price and market share amongst other critical measurements. Students will be divided into teams of three to five based on class size.</p> <p>Each team will be assigned a fictional automotive company. Playing the role of board members, your job is to make strategic decisions for your company across a wide range of areas.....marketing, operations, product development, finance, etc.</p> <p>Course Context: You will be utilizing StratSim as the backbone of the course but also utilizing tools, learnings and theory from other courses prior. Strategy frameworks AAA, 5-forces, CAGE, etc; SWOT analysis, financial modeling, organizational behavior, negotiation and teamwork, operations research, Research and Development needs, and marketing platforms.</p>
Learning Objectives & Goals	<p>This course is to give you some insight into what it is like using the skills studied in prior classes but now in a 'live' situation. The following understanding would hopefully be achieved:</p> <ol style="list-style-type: none"> 1. How different disciplines are integrated into managerial, tactical and strategic decisions 2. Difficulty of making decisions with varying levels of information 3. Importance of trade-offs between competing needs – finance, vs. time, vs. operational issues, vs. product development and product lifecycles 4. Key roles that personal and leadership skills play in running a company – teamwork
Contribution to the Diploma Policy (knowledge, skills	<p>This course fulfills the following MEXT learning objectives:</p> <p>MM1 : Able to demonstrate the sensitivity to different perspectives and opinions of</p>

<p>and attitude which can be acquired through this course for obtaining the degree concerned)</p>	<p>those from different international backgrounds.</p> <p>MM2 : Able to identifying and articulating common viewpoints among different and possibly conflicting opinions of those from different international backgrounds.</p> <p>MM3 : Able to acquire skills to communicate with people from diverse international backgrounds.</p> <p>ML1 : Able to demonstrate understanding of leadership concepts and practices</p> <p>ML2 : Able to listen well and have empathy with other people</p> <p>MP1 : Able to demonstrate ability to formulate/define issues</p> <p>MP2 : Able to demonstrate ability to analyze and compute</p> <p>MP3 : Able to demonstrate ability to interpret concepts and data</p> <p>MP4 : Able to demonstrate ability to evaluate and make choices among alternatives</p> <p>MF1 : Able to demonstrate understanding of Management Knowledge</p> <p>MF2 : Able to demonstrate understanding of Finance Knowledge</p> <p>MF3 : Able to demonstrate understanding of OM Knowledge</p> <p>MF4 : Able to demonstrate understanding of Marketing Knowledge</p> <p>MF6 : Able to demonstrate understanding of Data Analysis</p> <p>MD1 : Able to apply the concepts of strategic management, recognizing internal and external strategic contexts.</p> <p>MD2 : Able to demonstrate ability to gather and interpret data</p> <p>MD3 : Able to demonstrate ability to make a strategic decision under pressure.</p>
<p>Delivery Methods</p>	<p>How will we operate during the class and team sessions?</p> <p>You will spend most of your time with your team</p> <p>During the course of each day, you and your team will encounter decision moments – totaling 10 – see daily calendar</p> <p>Each decision moment corresponds to a full year’s worth of strategy</p> <p>For each moment, your team I asked to analyze and decide on many attributes of running a real business – just like execs/managers/board members would normally do</p> <p>Your decisions will be made by entering data into the online program which you are to download</p> <p>Based on the combined decisions of all competing firms, the simulation program calculates the results, e.g. market share, sales, profits etc.</p> <ol style="list-style-type: none"> 1. Once these results are tabulated – you will then use them to prepare your next set of decisions 2. Each day typically has 2/3 decisions depending on the speed of the class decision making, 10:30am, 1pm. There will be after hours homework to be completed – mainly to create presentations and documents. 3. Teams will be asked to make two presentations, Wednesday and Friday to present your strategies, your results, and future strategy/plans. These are to mimic shareholder meetings – other teams being your shareholders. 4. On Thursday the winning team will be announced. It will be based on growth

	<p>in both profitability and market cap. Whether you win or not has no bearing on the grade you receive.</p> <p>As a helpful aide, you will receive a link from Interpretive and are encouraged to log on, read the case study and familiarize yourself with the screens. In addition, you will be given time to prepare and familiarize yourself with StratSim where it's functions and simulations will be demonstrated during the pre-sessions on the June 24 and 25. You will go through practice sessions as a warm up prior to the official competition/game start on Friday June 27. There will be no other instructor led sessions after this 'demo' period is finished on the 24/25th.</p>																																																												
Assessment	<p>This is a pass/fail course. Students are assessed based on peer-evaluations from team members as well as attendance at the introductory sessions and the team meetings. Introductory sessions are mandatory, as is participation with teams during the week. Students are not allowed to take part in team discussions from home or via internet since teamwork and group dynamics are a crucial element of the learning process. Instructor will be visiting each group regularly to assess teamwork and progress. Again, all students are required to participate in their groups 100% of the time, zoom during main group sessions is not allowed. Dominant vs. timid personalities should be balanced in each group, allowing all members to participate. However, if some students are found absent and not participating a fail grade will be applied.</p> <table border="1" data-bbox="432 1070 1378 1612"> <thead> <tr> <th></th> <th colspan="5">Learning Objectives</th> </tr> <tr> <th>Assessment methods</th> <th>(1)</th> <th>(2)</th> <th>(3)</th> <th>(4)</th> <th></th> </tr> </thead> <tbody> <tr> <td>Class Participation</td> <td>30</td> <td>30</td> <td>30</td> <td>30</td> <td></td> </tr> <tr> <td>Group Presentation</td> <td>30</td> <td>30</td> <td>30</td> <td>30</td> <td></td> </tr> <tr> <td>Midterm Exam</td> <td>15</td> <td>15</td> <td>15</td> <td>15</td> <td></td> </tr> <tr> <td>Final Exam</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>Peer Review</td> <td>P/NP</td> <td>P/NP</td> <td>P/NP</td> <td>P/NP</td> <td></td> </tr> <tr> <td>Final Report</td> <td>25</td> <td>25</td> <td>25</td> <td>25</td> <td></td> </tr> <tr> <td>Any other methods</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>Weight on Final Grade</td> <td>25</td> <td>25</td> <td>25</td> <td>25</td> <td>Total 100</td> </tr> </tbody> </table>		Learning Objectives					Assessment methods	(1)	(2)	(3)	(4)		Class Participation	30	30	30	30		Group Presentation	30	30	30	30		Midterm Exam	15	15	15	15		Final Exam						Peer Review	P/NP	P/NP	P/NP	P/NP		Final Report	25	25	25	25		Any other methods						Weight on Final Grade	25	25	25	25	Total 100

Prerequisites	Theoretical knowledge of Marketing, Finance, Accounting, Strategy, Org Behavior and Ops Mgmt, or equivalent																																																												
Method of Feedback for Exams/Papers	Given the speed and group nature of the course – the instructor will be making brief assessments on the quality of the work being completed throughout the class. There will be daily written assignments given as well as a mid-week presentation and final project presentation by each group.																																																												
Required Textbook(s)	<p>Required:</p> <ol style="list-style-type: none"> 1. StratSim simulation program 2. StratSim Manual 																																																												

	Both to be downloaded from the homepage of the Interpretive.com, (www.interpretive.com). You will receive an email/s from Interpretive with further info on how to pay and download the materials.
Reference Books	n/a
Other Materials	n/a

Pre-Session:

Required Preparation/Homework before June 24: Time Required estimated to be one hour

- Log into StratSim and familiarize yourself with the screens

Required Preparation/Homework for June 25: Time required est. three hours

- Read case study and complete the case quiz
- Continue working on Decisions 1 & 2
- Complete the following written assignments in your group:
 - o Strategy Assignment (1)
 - o Strategy Assignment (2)
 - o Market Attractiveness/Business Position Assignment
 - o SWOT Analysis
- After the game is reset on Thursday (graduation) night – Please complete Decision 1 before Friday (27th) morning 10:30am start of class – submit your decisions online in the program (StratSim)

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Spring Term

Course	Schedule code MKG2040101	Course title Customer Relationship Management	
Name of Instructor	Sheehan, Benjamin		Credits 2
Instructor's contact information	Office#	Office Hours Student consultation is available anytime, however, please email me to arrange an appointment where possible.	E-mail
Class Schedule Day / Period	Fri.4~5		

Course Description	<p>The strategic management of customer relationships is a critical activity for all enterprises. Over the last two decades, organizations have learned that building relationships and sustaining them is usually more important than activities focused on customer acquisition. This course customer relationship management, which involves an enterprise-wide customer-centric approach to maximizing customer value. It is aimed at creating long-lasting and profitable relationships with individual customers - in both B2B and B2C contexts. Developments in technology have allowed organizations to look at their customers as individuals and to gather, store and analyze customer-based information. An outcome is an increase in the use of direct marketing techniques such as those for designing and managing consumer databases and customer service centers. Topics include CRM strategy development; value creation through CRM; multichannel integration; information and technology management; and CRM performance assessment. Participants will be exposed to a range of relationship-building strategies and techniques, as well as software and CRM technologies.</p>
Learning Objectives & Goals	<p>Students will understand the key principles of relationship marketing and how a Customer Relationship Management program should be formulated and implemented. The course will emphasize developing the knowledge and skills needed for strategic customer management. Organizations are now discovering that the cost of gaining new customers requires a substantial investment. However, not all customers are profitable, and therefore organizations need to assess which ones are, and discover how to keep them. Consolidation and testing of lessons and principles learned will be achieved through the assessment items.</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>FOR MBA: MP1: Able to demonstrate ability to formulate/define issues MP2: Able to demonstrate ability to analyze and compute MP3: Able to demonstrate ability to interpret concepts and data MP4: Able to demonstrate ability to evaluate and make choices among alternatives MF4: Able to demonstrate understanding of Marketing Knowledge MD1: Able to apply the concepts of strategic management, recognizing internal and external strategic contexts MD2: Able to demonstrate ability to gather and interpret data</p>

	<p>FOR DXP: MF7: Able to demonstrate understanding of fundamental business knowledge MT2: Able to employ suitable technology element to create a business or add competitive value to an organization</p>			
Delivery Methods	<p>Each 3-hour session is divided into 2 parts: (A) A traditional lecture, where students are introduced to topics and course material and (B) A hands-on workshop, where students will get to develop their CRM pitch, participate in group work or practice their negotiation skills in simulated negotiations.</p>			
Assessment	<p>Please note the following: (1) The assessment items are designed to be performed in small teams, (2) The assessment items build upon each other sequentially, (3) The assessment items are designed to teach practical, real-world skills, (4) team formation will occur in Week 1 – please make sure you attend. Detailed instructions and in-class demonstration of the require skills will be provided during the course.</p> <p>1. Focus Groups: 25% 2. Survey Design: 25% 3: Group Presentation: 25% 4: Peer Evaluation: 25%</p>			
Prerequisites	<p>Nil.</p>			
Method of feedback from instructor to students for exams/papers	<p>Students will receive feedback in various forms throughout the semester:</p> <ul style="list-style-type: none"> • Informal: worked examples, such as verbal feedback in class, personal consultations – before or after class or on-campus or via Zoom by appointment • Formal: in writing, such as comments addressing specific marking criteria • Direct: to individual students, either in written form or via consultation • Indirect: to the whole class <p>At the end of the course, students will be asked to complete a survey, providing feedback to the instructor, which may be used to enhance future course delivery. Students can also provide feedback to their team members via assessment item 4 (peer evaluation).</p>			
Textbook(s)	<p>Required:</p> <p>Reference Books / Journal Articles: a)Title: Customer Relationship Management. , b)Edition: , c)Author: Buttle, F., & Maklan, S., d)Publisher: Routledge., e)Year: 2019, f)ISBN:</p>

Class Schedule Day / Period	Wed.2~3		

Course Description	Digital marketing is attracting attention from a wide range of stakeholders because of its ability to target customers precisely and show the results of its activities. It is a cost-effective marketing tool to inform, persuade and engage customers, mostly through digital media. However, companies need to understand that digital marketing is not limited to social media. The digital marketing manager needs to develop a wide range of skills and abilities related to managing activities, understanding market developments and tools, delivering results, using different media, interacting with stakeholders and providing learning.
Learning Objectives & Goals	<p>The aim of this course is to provide you with a framework for developing and launching digital marketing campaigns.</p> <ol style="list-style-type: none"> 1. Be able to describe the target customer journey and the touchpoints used by the target segment. 2. Understand which offline and online media are important to achieve specific objectives. 3. Create effective campaigns that can be automated and measured at every step.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>This course covers the basic concepts of digital marketing. Tools, techniques and processes will be presented during the course and students will have the opportunity to apply them to their digital marketing plan. This will allow students to have a holistic view of how digital marketing works and how it can be used in an organisation.</p> <p>[MBA] MF4: Able to demonstrate understanding of Marketing Knowledge MF6: Able to demonstrate understanding of Data Analysis and Digital Technology MD1: Able to apply the concepts of strategic management, recognizing internal and external strategic contexts MD2: Able to demonstrate ability to gather and interpret data</p> <p>[DXP] MF7: Able to demonstrate understanding of fundamental business knowledge MT1: Able to understand the latest technology trend MT2: Able to employ suitable technology element to create a business or add competitive value to an organization MT3: Able to implement digital transformation while taking into account organizational and environmental implications</p>
Delivery Methods	The course uses interactive sessions supported by discussion, class exercises and

	<p>presentations. Most lessons are divided into two parts:</p> <ol style="list-style-type: none"> 1. Lectures: basic concepts, theories and frameworks are presented to introduce and familiarize students with the topics. 2. Workshop: Students apply the concepts discussed in the first part to their own project. This session involves group work. <p>The group work will be based on the collaborative platform Miro.com</p>					
Assessment						
Prerequisites	None					
Method of feedback from instructor to students for exams/papers	Presentation feedback

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Spring Term

Course	Schedule code OPR3010101	Course title Digital Supply Chain Management	
Name of Instructor	Li, Wenkai	Credits 2	
Instructor's contact information	Office#	Office Hours After class or by appointment	E-mail
Class Schedule Day / Period	Wed.4~5		

Course Description	<p>The emergence of digital technologies such as AI, big-data, IoT, and blockchain, across all aspects of supply chain has shaped new operational dynamics and business opportunities. Decision making process in digital era has been dramatically changed.</p> <p>This course will teach students to master fundamental techniques that are useful in making business decisions related to digital supply chain management, i.e., the ability to manage and optimize the flow of goods, fund, and information throughout supply chains in a digital era.</p> <p>This course starts from introducing the key concepts of a typical supply chain and supply chain strategies, followed by in-depth discussions on topics such as how to design a digital supply chain network and how to use digital technologies to form omni-channels to interact with customers and fulfill their orders. Topics such as big-data driven supply chain management, AI, block-chain and supply chain management will also be discussed.</p> <p>The course aims to provide students with the following knowledge:</p> <ul style="list-style-type: none"> (i) Acquired knowledge on digital supply chain management; (ii) Practical ability to apply digital supply chain management theory to actual business settings; and (iii) Recognition of the importance of digital supply chain management research and modeling for successful business operations. <p>This course is helpful for students seeking careers such as consultants, supply chain managers, operational managers, general managers, financial analysts, and policy makers in manufacturing and service industries.</p>
Learning Objectives & Goals	<p>This course contributes to the achievement of one course objective. Upon completion of this course, all students will be able to:</p> <ul style="list-style-type: none"> (1) Demonstrate understanding of digital supply chain management knowledge.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this	<p>[For MBA]</p> <p>MP1:Able to demonstrate ability to formulate/define issues MP2:Able to demonstrate ability to analyze and compute MP3:Able to demonstrate ability to interpret concepts and data MP4:Able to demonstrate ability to evaluate and make choices among alternatives</p>

course for obtaining the degree concerned) N/A for language courses	<p>MF6:Able to demonstrate understanding of Data Analysis and Digital Technology</p> <p>[For IMBA]</p> <p>MD1: Able to apply the concepts of strategic management, recognizing internal and external strategic contexts.</p> <p>MD3: Able to demonstrate ability to make a strategic decision under pressure.</p> <p>[for DXP]</p> <p>MF7:Able to demonstrate understanding of fundamental business knowledge</p> <p>MT1:Able to understand the latest technology trend</p> <p>MT2:Able to employ suitable technology element to create a business or add competitive value to an organization</p> <p>MT3:Able to implement digital transformation while taking into account organizational and environmental implications</p> <p>[For ISEP]</p> <p>MI4:Able to demonstrate ability to establish systems with business knowledge for providing solutions to social issues sustainably.</p>
Delivery Methods	Lectures, in-class case discussions, and in-class beer game. Field trips (e.g.: Toyota or Nissan) may also be arranged.
Assessment	<p>Learning Objectives</p> <p>Assessment methods (1)</p> <p>Overall Class Participation 15%</p> <p>In-class group discussions 25%</p> <p>Peer review 20%</p> <p>Home works 10%</p> <p>Final report 30%</p> <p>Weight on Final Grade 100%</p>
Prerequisites	General knowledge of Operations Management will be helpful.
Method of feedback from instructor to students for exams/papers	By email or face-to-face appointment with course instructor.

Course Description	<p>This course is for year-long research seminars. It is designed to lay the foundations of research writing and help students to conduct their own research. In the Fall term, there will be joint seminars with all students. In Winter and Spring semesters, however, the seminar will be conducted as an individual consultation based on each person's topic and progress.</p> <p>After taking this course, students become acquainted with research format, research designs, and quality issues. They can develop their own research projects and execute them properly. They are expected to produce a preliminary draft by the end of the term. The draft will be expanded in the subsequent terms and eventually become the final research report.</p>
Learning Objectives & Goals	The objective of the Advanced Seminar is to improve the quality of work by each student toward drafting Thesis / Research Report. Advice will be provided through face-to-face consultations as well as advice through comments on drafts. Additional knowledge and information will be provided based on students' research interests.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	
Delivery Methods	Advanced Seminar will be conducted through individual supervision and advice to students' Thesis/Research Report drafting. During Fall and Winter terms, students are expected to make presentations of their research progress 1~2 times.

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Spring Term

Course	Schedule code SEM6010110	Course title Advanced Seminar I	
Name of Instructor	Sheehan, Benjamin		Credits 2
Instructor's contact information	Office#	Office Hours Student consultation is available anytime, however, please email me to arrange an appointment where possible.	E-mail
Class Schedule Day / Period	unfixed		

Course Description	<p>IUJ students are required to produce a piece of independent research as part of their course requirements. This seminar series provides access to 1-on-1 supervision and training - to help you along your research journey. The seminar series is designed to provide personalized guidance - based on your existing skills and research topic.</p> <p>In broad terms, the seminars will examine key concepts and methods for marketing research - helping you to apply methodological and analytical tools to the topic of your choice. Throughout the supervision process, you will learn basic techniques of research in marketing, including problem definition, research design, questionnaire construction, experimental design, sampling strategies, data collection, data analysis, and result presentation. During our personalized sessions, we will also discuss how marketing research can help managers make business decisions and how we can transform research findings into actionable business insights. Students are expected to define the research problem, develop a research plan, collect and analyze data on their own (with assistance), and present findings and theoretical and practical implications of their work.</p>
Learning Objectives & Goals	<p>The goal of the seminar series is to provide supervision and guidance to students as they learn:</p> <ol style="list-style-type: none"> 1. The fundamentals sufficient to define a quantitative marketing research problem. 2. The types of variables used in quantitative marketing models 3. How to develop testable hypotheses 3. How to find and use quantitative measurement instruments to collect data 4. How to design a sound, rigorous survey or experiment 5. How to collect and analyze data using SPSS or PSPP 6. How to write-up research results in APA format, inline with discipline norms 7. How to communicate theoretical and practical research contributions and the limitations of their work
Contribution to the Diploma Policy (knowledge, skills and attitude which can be	

acquired through this course for obtaining the degree concerned) N/A for language courses									
Delivery Methods	<p>Weekly meetings - either face-to-face or via Zoom.</p> <p>Please note: Student research is to be driven by the student. I will be available to provide as much guidance and supervision as is needed e.g., we can meet more than once per week, but students should take the initiative to seek additional help as required.</p>								
Assessment	The goal is to produce a piece of research of publishable quality - although publication is not necessary. 100% of students grade is awarded based on progress towards this goal.								
Prerequisites	<p>Nil.</p> <p>However, it is strongly recommended that students take or plan to take Consumer Behavior and Marketing Research courses (in their first year if 2 year students). The Consumer Behavior course will provide you with an overview of marketing theory - from which you can develop your research ideas. The Marketing Research course will provide you will the fundamental skills required to complete a Master's level research project.</p>								
Method of feedback from instructor to students for exams/papers	<p>Students will receive feedback in various forms throughout the semester:</p> <ul style="list-style-type: none"> • Informal: worked examples, such as verbal feedback in meetings, personal consultations etc. • Formal: in writing, such as comments on drafts of your manuscript and research plan. • Direct: to individual students, either in written form or via consultation. • Indirect: on occasion, all students will meet together - to learn as a group and from each-other. <p>Note: The research project is the students project. The student should manage the project and ask for help as needed. Help will be given whenever it is asked for. But it is not for the supervisor to chase the student.</p>								
Textbook(s)	<p>Required:</p> <p>a) Title: SPSS Statistics: A Practical Guide, b) Edition: , c) Author: Allen, Bennett & Heritage, d) Publisher: , e) Year: 2018, f) ISBN:</p> <p>a) Title: Marketing Scales Handbook, b) Edition: , c) Author: Bruner, d) Publisher: , e) Year: 2022, f) ISBN:</p> <p>Reference Books / Journal Articles:</p>

 2025 Spring Term

Course	Schedule code SEM6010111	Course title Advanced Seminar I	
Name of Instructor	Zhang Zhang, Yingying		Credits 2
Instructor's contact information	Office#	Office Hours After class or by appointment.	E-mail
Class Schedule Day / Period	unfixed		

Course Description	The Advanced seminar I aims to clarify the basic knowledge on research, including what research is, what academic writing consists of, what plagiarism is, what is the common sense language and research terms. At a later stage of term, personalization of research project of each will be customized during the research seminar in one-to-one base. Some of the activities during each individual research meetings, including but not limited to, literature review and search methodology, data source setting, research design consistency, advices on theoretical framework setting and refinement, research method refinement, interview protocol and semi-structured question design, questionnaire definition, etc. depending on the nature of research project of each student.		
Learning Objectives & Goals			
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses			
Delivery Methods	Punctual specific advanced seminars with lecture format, with frequent use of individual research meetings for tutorial and research progress advices and monitoring.		
Assessment	A final research paper is requested to delivery by the end of term, simulating the final delivered research report or thesis. The content includes research title, research question, objective, theoretical framework or literature review, methodology and preliminary findings. For case report or other research report types, more structure flexibility is allowed, but a preliminary draft version is also required.		
Prerequisites	No.		
Method of feedback from instructor to students for exams/papers			
Textbook(s)	Required: a)Title: How to Design and Develop a Business Research Project, b)Edition: ,		

	c)Author: BART CAMBRÉ et al., d)Publisher: Edward Elgar, e)Year: 2023, f)ISBN: Reference Books / Journal Articles:

Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	unfixed		

Course Description	<p>In this course, students will learn how to structure their research. Starting with forming research interests, defining research question, choosing research methodology and setting expected outcome of your research.</p> <p>Research can be done through desktop activities, but I strongly recommend to have some interactions i.e., a research interview with practitioners either in your country or in Japan during your research activities.</p> <p>Depending on the number of students, we will do a round of reading (read by turns) during the course.</p>
Learning Objectives & Goals	<p>Define research question</p> <p>Choose research methodology</p> <p>Set research outcome</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	
Delivery Methods	Reading by turns with all students, research presentations and feedback
Assessment	<p>Student must submit a research plan at the end of the semester. The goal is to determine the scope of your case study or feasibility study and plan the research activities for the Advanced seminar2.</p> <p>Conducting preliminary research is recommended to accomplish this goal.</p>
Prerequisites	N/A
Method of feedback from instructor to students for exams/papers	Feedback will be provided for a round of reading and research presentations through face-to-face and online meetings

Course Description	<p>IUJ students are required to produce a piece of independent research as part of their course requirements. This seminar series provides access to 1-on-1 supervision and training - to help you along your research journey. The seminar series is designed to provide personalized guidance - based on your existing skills and research topic.</p> <p>In broad terms, the seminars will examine key concepts and methods for marketing research - helping you to apply methodological and analytical tools to the topic of your choice. Throughout the supervision process, you will learn basic techniques of research in marketing, including problem definition, research design, questionnaire construction, experimental design, sampling strategies, data collection, data analysis, and result presentation. During our personalized sessions, we will also discuss how marketing research can help managers make business decisions and how we can transform research findings into actionable business insights. Students are expected to define the research problem, develop a research plan, collect and analyze data on their own (with assistance), and present findings and theoretical and practical implications of their work.</p>
Learning Objectives & Goals	<p>The goal of the seminar series is to provide supervision and guidance to students as they learn:</p> <ol style="list-style-type: none"> 1. The fundamentals sufficient to define a quantitative marketing research problem. 2. The types of variables used in quantitative marketing models 3. How to develop testable hypotheses 3. How to find and use quantitative measurement instruments to collect data 4. How to design a sound, rigorous survey or experiment 5. How to collect and analyze data using SPSS or PSPP 6. How to write-up research results in APA format, inline with discipline norms 7. How to communicate theoretical and practical research contributions and the limitations of their work
Contribution to the Diploma Policy (knowledge, skills and attitude which can be	

acquired through this course for obtaining the degree concerned) N/A for language courses									
Delivery Methods	<p>Weekly meetings - either face-to-face or via Zoom.</p> <p>Please note: Student research is to be driven by the student. I will be available to provide as much guidance and supervision as is needed e.g., we can meet more than once per week, but students should take the initiative to seek additional help as required.</p>								
Assessment	The goal is to produce a piece of research of publishable quality - although publication is not necessary. 100% of students grade is awarded based on progress towards this goal.								
Prerequisites	<p>Nil.</p> <p>However, it is strongly recommended that students take or plan to take Consumer Behavior and Marketing Research courses (in their first year if 2 year students). The Consumer Behavior course will provide you with an overview of marketing theory - from which you can develop your research ideas. The Marketing Research course will provide you will the fundamental skills required to complete a Master's level research project.</p>								
Method of feedback from instructor to students for exams/papers	<p>Students will receive feedback in various forms throughout the semester:</p> <ul style="list-style-type: none"> • Informal: worked examples, such as verbal feedback in meetings, personal consultations etc. • Formal: in writing, such as comments on drafts of your manuscript and research plan. • Direct: to individual students, either in written form or via consultation. • Indirect: on occasion, all students will meet together - to learn as a group and from each-other. <p>Note: The research project is the students project. The student should manage the project and ask for help as needed. Help will be given whenever it is asked for. But it is not for the supervisor to chase the student.</p>								
Textbook(s)	<p>Required:</p> <p>a) Title: SPSS Statistics: A Practical Guide, b) Edition: , c) Author: Allen, Bennett & Heritage, d) Publisher: , e) Year: 2018, f) ISBN:</p> <p>a) Title: Marketing Scales Handbook, b) Edition: , c) Author: Bruner, d) Publisher: , e) Year: 2022, f) ISBN:</p> <p>Reference Books / Journal Articles:</p>

Graduate School of International Management
2025 Fall Term

Course	Schedule code ACT1010	Course title Financial Accounting	
Name of Instructor	Lee, Hyunkoo		Credits 2 credits
Instructor's Contact Information	Office#	Office Hours Tue 3:00-4:00 PM or by appointment	E-mail
Class Schedule Day / Period	Wednesday session: Wed 10:30AM- noon and 1:00-2:30PM Thursday session: Thu 10:30AM- noon and 1:00-2:30PM		

Course Description	<p>This course introduces basic knowledge of financial accounting. It covers fundamental concepts, bookkeeping skills, and related financial reports. Although you will learn production, reporting, and interpretation of financial accounting information, the main focus will be the interpretation of accounting data. By the time you complete this course, you will feel more comfortable with dealing with financial reports.</p> <p>This course tries to lay a foundation for being a leader as a corporate executive, an entrepreneur, and a public officer. We will pay a considerable amount of attention to the business analysis: understanding business models, checking key performance indicators, and evaluating future prospects. You can learn how corporate value is created. You can also learn about various financial institutions and their roles in the capitalistic financial system. On the other hand, this course does not train you as a professional accountant or help you pass a professional examination such as CPA, ACCA, or CFA.</p> <p>If you have no background in accounting or business, it may take considerable time for you to study this course. Given the quantity of core content and the fast speed of the course delivery, the burden of taking this course can be fairly high.</p> <p>In order to acquire the basic accounting skills, working on hand-on exercises is a very effective approach. Memorizing formulae and accounting rules might improve your test score but that won't help you advance your learning.</p>
Learning Objectives & Goals	<p>This course provides basic accounting knowledge to business program students. Particularly, it contributes to the achievement of AACSB Learning Goal 5-5 for 2 year MBA and JGDP students.</p>

	<p>Upon completion of this course, students will be able to:</p> <p>(1) demonstrate understanding of accounting knowledge (LG5-5).</p> <p>(2) discuss accounting issues competently in a group meeting and a class.</p> <p>(3) conduct a basic financial statement analysis of a real company.</p>
<p>Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)</p>	<p>This courses fulfills the following MEXT learning objectives:</p> <p>MF5 (MBA, JGDP): Demonstrate understanding of Accounting Knowledge</p> <p>MF7 (DXP): Able to demonstrate understanding of fundamental business knowledge</p> <p>MD2 (MBA): Able to demonstrate ability to gather and interpret data</p> <p>MI4 (ISEP): Able to demonstrate ability to establish systems with business knowledge for providing solutions to social issues sustainably</p>
<p>Delivery Methods</p>	<p>The course will use lectures, problem solving, and case discussion in workshop style as main pedagogical methods. In each class, a short review, student discussion and problem-solving activities will follow. Before you come to a class, please complete pre-class quizzes.</p> <p>To excel in this course, you have to be more active and lead you study for yourself. For each class session, you are expected to review the required topic, assignment, and pre-class quizzes in advance. We meet in the class to review key ideas and check your progress.</p> <p>The class will be held face-to-face in a classroom. But quizzes and office hour may use online tools.</p>
<p>Prerequisites</p>	<p>None</p>
<p>Required Textbook(s)</p>	<p>The course uses the following book as the main reference. Multiple copies will be reserved in the library.</p> <p>[1] Libby, Libby, and Hodge [2022]: Financial Accounting, 11th ed, (International Student Edition, paperback, 978-1-26508392-2; McGraw-Hill Education.) [RESEVED]</p> <p>The hard-cover or e-book version is <u>not</u> recommended.</p> <p>It is okay to get a 10th or 9th version as the content is largely the same.</p>
<p>Reference Books / Database</p>	<p>[2] Berman and Knight [2013]. Financial Intelligence: A Manager's Guide to Knowing What the Numbers Really Mean. (Harvard Business Review Press, 978-1-42214411-4) [RESEVED]</p>

	[3] Standard & Poors (S&P) Global Capital IQ. This financial database is one of main data sources for the course. There will be a further guide on how to use it.																																				
Other Materials	The course will introduce additional reference articles from the business press, especially from Week 5. The purpose of these readings is to place the concepts we discuss into perspective and to examine the impact of accounting information on decision making. Reading these articles will not only improve your understanding of the financial accounting but also will broaden your knowledge of business. That is also a good way to prepare for a case question in the final examination.																																				
Assessment	<table border="1"> <thead> <tr> <th></th> <th colspan="3">Learning Objectives</th> </tr> <tr> <th>Assessment methods</th> <th>(1)</th> <th>(2)</th> <th>(3)</th> </tr> </thead> <tbody> <tr> <td>Class Participation</td> <td></td> <td>25%</td> <td></td> </tr> <tr> <td>Peer Evaluation</td> <td></td> <td>25%</td> <td></td> </tr> <tr> <td>Pre-class Quizzes</td> <td>15%</td> <td></td> <td></td> </tr> <tr> <td>Final Exam</td> <td>85%</td> <td></td> <td></td> </tr> <tr> <td>Case Report</td> <td></td> <td>50%</td> <td></td> </tr> <tr> <td>Final Report</td> <td></td> <td></td> <td>100%</td> </tr> <tr> <td>Weight on Final Grade</td> <td>60%</td> <td>25%</td> <td>15%</td> </tr> </tbody> </table>		Learning Objectives			Assessment methods	(1)	(2)	(3)	Class Participation		25%		Peer Evaluation		25%		Pre-class Quizzes	15%			Final Exam	85%			Case Report		50%		Final Report			100%	Weight on Final Grade	60%	25%	15%

Final Report			100%																																		
Weight on Final Grade	60%	25%	15%																																		
Method of Feedback for Exams/Papers	The instructor will return graded papers or allow students to inspect their paper.																																				
Group Assignments	There are two required group works. Students are asked to work together to carry out group assignments. Group work is important as a real workspace simulation. The goal is to create an environment where group members are encouraged to interact and support each other. That is not necessarily easy for students who just start their first semester. But that will become a hallmark of your MBA experience. The details of group formation, assignments, and assessment plan will be announced later.																																				
Tutorial	There will be a weekly tutorial class. This arrangement is mainly for students without accounting background. Attendance is optional. Further information on the schedule and format will be announced later.																																				
Fairness and Integrity	Fairness and integrity of the class should be maintained. It is our responsibility to facilitate these principles. Please don't do anything unfair to other students or ask the instructor to make exceptions that are not fair to other students.																																				

	<p>Quizzes and examinations will be done individually. Copying another student’s paper or giving/receiving verbal assistance to/from another student during an exam is considered cheating.</p> <p>Students who are found cheating on a quiz or an exam will receive a score of zero. In addition, the student will be referred to the applicable authorities for further disciplinary action. Students who didn’t follow the proctor’s direction on the exam site will also be penalized the same way.</p> <p>Students are encouraged to use AI tools like Gemini as a learning tool. For example, students may use Gemini to generate an idea or improve their writing skills. However, creating a majority part of your report only with AI output is considered cheating. If an AI detector program issues a red flag, there will be a hefty penalty to the report. As for the more detailed AI policy, please see below.</p> <p>All assignments are group-based. Members of the same group are encouraged to cooperate. But copying another group’s work or plagiarizing other illegitimate sources is considered cheating. All guilty parties will receive a zero for that assignment. In addition, the students will be referred to the applicable authorities for further disciplinary action.</p> <p>All assignments should be handed in by the scheduled deadlines. Failure to turn in by the deadline will result in a penalty.</p>
<p>AI Policy</p>	<p>This policy augments, not replace, the points addressed in the University-wide Guidelines and the Policies stipulated in the Students’ Handbook.</p> <p>1. Ethical Use of AI You must use AI tools ethically and responsibly. This includes avoiding misuse that may harm academic standards, fairness, or honesty. AI tools should be used to enhance learning, not to replace personal effort or critical thinking.</p> <p>2. Permissible AI Use</p> <ul style="list-style-type: none"> • Generating ideas or brainstorming • Summarizing notes or readings • Assisting with grammar and language checks <p>3. Prohibited AI Use</p> <ul style="list-style-type: none"> • Do not submit AI-generated content as your own work without proper citation or acknowledgment. Do not use AI to complete exams and quizzes. • Do not input confidential or sensitive data into AI tools without approval. • Do not copy content from AI without saying it helped you. Always credit AI like you would any other source. <p>4. Disclosure and Citation</p>

	<p>When using AI for any part of your work, you must clearly disclose it. For example, include a note like: "This assignment was assisted by [AI tool name] to generate ideas or revise grammar."</p> <p>5. AI in Group Work If AI tools are used in group projects, all group members must agree on their use. Be transparent about how AI was used and document AI contributions in group work.</p> <p>6. Consequences of Misuse Misusing AI, such as submitting AI-generated work as your own or failing to disclose AI use, will result in penalties.</p> <p>7. Privacy and Data Security Be cautious when using AI tools that require uploading content. Do not share any personal or confidential information in these tools without proper authorization.</p> <ul style="list-style-type: none"> • No personal information inputs (of yourself and any other persons). • No inputs of proprietary information, such as the School and University's internal information and other organizations' internal information. • No input of copyrighted materials. <p>8. Potential Mistakes that AI May Make</p> <ul style="list-style-type: none"> • AI may come up with wrong or even imaginary answers if you give improper prompts (commands). Cross-check the factual accuracy with other reliable sources. • AI may give you copyrighted texts. Double-check their authenticity to avoid copyright infringement, which is regarded as Plagiarism. <p>9. Seeking Help If you are unsure how to use AI responsibly, ask me for further guidance.</p> <p>In conclusion, all AI use must be responsible, transparent, and aligned with academic integrity. By following these guidelines, you can benefit from AI technology while maintaining high ethical standards.</p>
Course Cap	45, GSIM 1 st year students only.

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Fall Term

Course	Schedule code FIN2040301	Course title Portfolio Management	
Name of Instructor	Chow, Yuen Leng		Credits 2
Instructor's contact information	Office#	Office Hours By appointment	E-mail
Class Schedule Day / Period	Mon.2~3		

Course Description	<p><Course Description & Learning Objectives></p> <p>The primary purpose of this course is to explore concepts in and approaches to portfolio management in financial markets. Throughout the term, we will examine the theory of portfolio optimization and management for the public equities portfolio. Emphasis will be placed on using real-world data to further understand how the theories relate to practice. Upon completion of the course, you should have a good understanding of portfolio optimization, objectives and constraints in portfolio management, and portfolio performance evaluation. Also, you will obtain skills to implement theories in real financial markets.</p> <p><Course Context></p> <p>The understanding of the theory of modern portfolio analysis provides a bridge between knowledge and practice in financial markets. This course will help you extend your knowledge of individual financial assets such as stocks and bonds to a portfolio context. Basic knowledge of investments and capital markets is required for this course (e.g., definitions of stocks, bonds, and basic understanding of the financial market system).</p> <p><Career Relevance></p> <p>This course is primarily designed to help students pursue a future career in financial markets such as portfolio (fund) manager, security analyst, and financial engineer in asset management company, securities firm, investment bank, and investment advisory company. To pursue these professions, getting the designations of the CFA (Chartered Financial Analyst) or the CMA (Chartered Member of the Security Analysts Association of Japan) is essential. Portfolio Management is the most important topic in the CFA and CMA examinations.</p>
Learning Objectives & Goals	This course contributes to two of the four learning goals: (1) Functional Business Knowledge; and (2) Strategic Decision Making
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>At the end of the course, students should be:</p> <p>MF2: Able to demonstrate understanding of finance knowledge</p> <p>MF6: Able to demonstrate understanding of data analysis and digital technology</p> <p>MD1: Able to apply the concepts of strategic management, recognising internal and external strategic contexts</p> <p>MD2: Able to demonstrate ability to gather and interpret data</p>

Delivery Methods	This course will consist of lectures, discussions, case studies, assigned readings, and two quizzes (mid-term & week 8). Students are expected to read text chapters and assigned reading materials before class and actively participate in discussions.					
Assessment	<p>Learning Objectives</p> <p>Assessment methods MF2 MF6 MD1 MD2</p> <p>Second Quiz (Individual) 25% 25%</p> <p>Mid-Term Quiz (Individual) 5% 5%</p> <p>Case Analysis (Group) 10% 10% 10% 10%</p> <p>Weight on Final Grade 40% 10% 10% 40%</p>					
Prerequisites	This course will build on general computational skills you should have acquired individually or through other courses. This course will require significant amounts of data analysis using Microsoft Excel.					
Method of feedback from instructor to students for exams/papers	<p>Quizzes – results known immediately after completion</p> <p>Case Analysis – feedback given in class discussions</p>

 Graduate School of International Management (Master's Program)
 2025 Fall Term

Course	Schedule code FIN2050301	Course title Entrepreneurial and Venture Finance	
Name of Instructor	Chow, Yuen Leng		Credits 2
Instructor's contact information	Office#	Office Hours By appointment	E-mail
Class Schedule Day / Period	Tue.4~5		

Course Description	<p><Roles and purpose></p> <p>This course goes through the financial metrics that entrepreneurs need to pay attention to in the early stages of their business, to monitor the business performance and pivot, if necessary. This course explores possible financing choices for entrepreneurs, and discusses exit strategies available to the entrepreneur. This course guides potential entrepreneurs through the basics of finance, valuations, dilution and non-dilutive funding sources. Financing for start-ups are further differentiated between early-stage and later-stage financing. While this course focuses on the financial aspects of entrepreneurship, we will briefly discuss how to develop the business model to understand the nature of venture businesses and also the key aspects of effectively pitching your enterprise to investors.</p> <p><Learning Objectives></p> <p>Upon completion of this course, students will be able to:</p> <ol style="list-style-type: none"> (1) Identify the kinds of investors required at different funding stages (2) Learn about different fundraising options (3) Understand how to make pro-forma financial statements; (4) Understand how Venture Corporations choose their deal structures; and (5) Understand the pros and cons of different exit strategies. <p><Overview></p> <p>This course is primarily designed to provide the analytical tools and conceptual framework which are useful for entrepreneurs. Entrepreneurs first of all should be able to critically analyze their business model. Entrepreneurs also need to understand how and how much funds they should raise, the rational value of the startups, additional funding strategy, and harvesting strategy. In order to deliver these tools and concepts, cases and textbook chapters are used. All students are expected to prepare for case discussions and participate actively in discussing the business problems and solutions.</p> <p><Career Relevance></p> <p>Entrepreneurial Finance helps prospective entrepreneurs to make decisions regarding the financing, deal structures, and exits. Additionally, officers in financial institutions such as venture capital, private equity, and investment bank, might find entrepreneurial finance beneficial to understand the valuation of the startup using various methods. This course also covers briefly business model canvas in order to develop and evaluate the business model.</p>

Class Schedule Day / Period	Session 1: Monday 2:40pm-5:50pm Session 2: Tuesday 2:40pm-5:50pm		

Course Description	<p>This course aims to study the basic knowledge of data analytics skills, in particular, statistical skills, which will be applied in various business areas. It is a fundamental core required course for two-year MBA and DXP, and a core elective course for IMBA and ISEP students.</p> <p>This course provides students with fundamental knowledge for various business areas such as Corporate Finance, Investment, Risk Management, Big Data Analytics, and Marketing etc. It is helpful for students seeking careers such as consultants, financial analysts, general managers, policy makers, and operational managers. This course is the prerequisite for several other courses.</p>
Learning Objectives & Goals	<p>This course contributes to the achievement of two learning objectives of the AACSB Learning Goal 4 as mentioned below. Upon completion of this course, student will be able to:</p> <ol style="list-style-type: none"> (1). Demonstrate ability to analyze and compute (L4-2) (2). Demonstrate ability to evaluate and make choices among alternatives (L4-4) (3). Demonstrate understanding of data analytics knowledge in business. <p>For the purpose of accomplishment of these learning objectives, this course provides</p> <ol style="list-style-type: none"> (i). The basic knowledge in probability theories, such as expected values, variance, and probability distributions, which is essential in understanding other MBA, DXP, or ISEP courses; (ii). Background in statistical principles in order for you to be a good user of statistical data analysis. Students will learn how to describe data effectively, how to run a simple regression using Excel, how to interpret the data results, and how to do hypothesis testing.

<p>Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)</p>	<p>MF3 (for MBA and JGDP): Able to demonstrate understanding of IT/OM/SCM Knowledge</p> <p>MF6 (for MBA): Able to demonstrate understanding of Data Analysis and Digital Technology</p> <p>MF7 (for DXP): Able to demonstrate understanding of fundamental business knowledge</p> <p>MD2 (for IMBA): Able to demonstrate ability to gather and interpret data</p> <p>MI3 (for ISEP): Able to demonstrate ability to connect different ideas for creating new solutions toward factors of social issues</p> <p>MI4 (for ISEP): Able to demonstrate ability to establish systems with business knowledge for providing solutions to social issues sustainably.</p>																								
<p>Delivery Methods</p>	<p>Teaching methodology includes lectures and in-class exercises in computer lab. Students are required to use Excel for data manipulation and analysis.</p> <p>This course has no group work.</p>																								
<p>Assessment</p>	<table border="1" data-bbox="518 840 1273 1137"> <thead> <tr> <th></th> <th colspan="3">Learning Objectives</th> </tr> <tr> <th>Assessment methods</th> <th>(1)</th> <th>(2)</th> <th>(3)</th> </tr> </thead> <tbody> <tr> <td>Home Works</td> <td></td> <td></td> <td>25%</td> </tr> <tr> <td>Midterm Quiz</td> <td></td> <td></td> <td>10%*</td> </tr> <tr> <td>Final Exam</td> <td>100%</td> <td>100%</td> <td>65%</td> </tr> <tr> <td>Weight on Final Grade</td> <td>15%</td> <td>15%</td> <td>70%</td> </tr> </tbody> </table> <p>Notes:</p> <p>(1). Learning objectives (1) and (2) will be evaluated by selected questions from Final Exam.</p> <p>(2). Learning objective (3) will be evaluated by home works, Midterm Quiz, and exam questions in the Final Exam.</p> <p>(3). The last row lists the weights of each learning objective on the final grade.</p> <p>(4). Midterm Quiz may or may not be conducted, depending on the progress of the classes. In case Midterm Quiz is not conducted, its weight (10%) is aggregated to “Final Exam”.</p>		Learning Objectives			Assessment methods	(1)	(2)	(3)	Home Works			25%	Midterm Quiz			10%*	Final Exam	100%	100%	65%	Weight on Final Grade	15%	15%	70%

Class Outlines	Class	Contents	
		1	Topic
Required preparation /homework			Preview textbook Chap. 3.1 1.0 h
Required post-study			1). Review Week 1 lecture notes (1 hr). 2). Do Week 1 TA session exercises (1.5 hrs). 3). Attend Week 1 TA session (1.5 hrs) 4.0 h
2		Topic	Probabilities (Chap. 3.2~3.3)
		Required preparation /homework	Preview textbook Chap. 3.2~3.3 1.0 h
		Required post-study	1). Review Week 1 lecture notes (1 hr). 2). Do Week 1 TA session exercises (1.5 hrs). 3). Attend Week 1 TA session (1.5 hrs) 4.0 h
3		Topic	Describing Data I: Tables and graphs, histogram, mean, median, mode (Chap. 1.2,1.3)
		Required preparation /homework	Preview textbook Chap. 3.2~3.4; Chap. 1.2,1.3 1.0 h
		Required post-study	1). Review Week 2 lecture notes (1 hr). 2). Do Week 2 TA session exercises (1.5 hrs). 3). Attend Week 2 TA session (1.5 hrs) 4.0 h
4		Topic	Describing Data I: Tables and graphs, histogram, mean, median, mode (Chap. 1.3,1.5)
		Required preparation /homework	Preview textbook Chap. 1.3,1.5 1.0 h
		Required post-study	1). Review Week 2 lecture notes (1 hr). 2). Do Week 2 TA session exercises (1.5 hrs). 3). Attend Week 2 TA session (1.5 hrs) 4). Start to work on HW#1 (2.0 hrs) 6.0 h
5	Topic	Describing Data II: Variance, standard deviation, CV, and others (Chap. 2.1)	
	Required preparation /homework	Preview textbook Chap. 2.1 1.0 h	
	Required post-study	1). Review Week 3 lecture notes (1 hr). 2). Do Week 3 TA session exercises (1.5 hrs). 3). Attend Week 3 TA session (1.5 hrs) 4.0 h	

	6	Topic	Describing Data II: Variance, standard deviation, CV, and others (Chap. 2.2)	
		Required preparation /homework	Preview textbook Chap. 2.2	1.0 h
		Required post-study	1). Review Week 3 lecture notes (1.0 hr). 2). Do Week 3 TA session exercises (1.5 hrs). 3). Attend Week 3 TA session (1.5 hrs) 4). Complete and submit HW#1 (2.0 hrs)	6.0 h
	7	Topic	Summarizing Relationships among variables I: Covariance, Correlation coefficient, OLS (Chap. 2.4)	
		Required preparation /homework	Preview textbook Chap. 2.4	1.0 h
		Required post-study	1). Review Week 4 lecture notes (1.0 hr). 2). Do Week 4 TA session exercises (1.5 hrs). 3). Attend Week 4 TA session (1.5 hrs)	4.0 h
	8	Topic	Summarizing Relationships among variables II: Covariance, Correlation coefficient, OLS (Chap. 2.4)	
		Required preparation /homework	Preview textbook Chap. 2.4	1.0 h
		Required post-study	1). Review Week 4 lecture notes (1.0 hr). 2). Do Week 4 TA session exercises (1.5 hrs). 3). Attend Week 4 TA session (1.5 hrs) 4). Start to work on HW#2 (2.0 hrs).	6.0 h
	9	Topic	Summarizing Relationships among variables III: OLS (Chap. 11, 12,13)	
		Required preparation /homework	Preview textbook Chap. 11, 12,13	1.0 h
		Required post-study	1). Review Week 5 lecture notes (1.0 hr). 2). Do Week 5 TA session exercises (1.5 hrs). 3). Attend Week 5 TA session (1.5 hrs)	4.0 h
10	Topic	Summarizing Relationships among variables IV: OLS (Chap. 11, 12,13)		
	Required preparation /homework	Preview textbook Chap. 11, 12,13	1.0 h	
	Required post-study	1). Review Week 5 lecture notes (1.0 hr). 2). Do Week 5 TA session exercises (1.5 hrs). 3). Attend Week 5 TA session (1.5 hrs)	6.0 h	

		4). Complete and submit HW#2 (2.0 hrs).	
11	Topic	Discrete Random Variables and Probability Distributions I (Chap. 4)	
	Required preparation /homework	Preview textbook Chap. 4	1.0 h
	Required post-study	1). Review Week 6 lecture notes (1.0 hr). 2). Do Week 6 TA session exercises (1.5 hrs). 3). Attend Week 6 TA session (1.5 hrs)	4.0 h
12	Topic	Discrete Random Variables and Probability Distributions II (Chap. 4)	
	Required preparation /homework	Preview textbook Chap. 4	1.0 h
	Required post-study	1). Review Week 6 lecture notes (1.0 hr). 2). Do Week 6 TA session exercises (1.5 hrs). 3). Attend Week 6 TA session (1.5 hrs)	4.0 h
13	Topic	Continuous Random Variables and Probability distribution I (Chap. 5)	
	Required preparation /homework	Preview textbook Chap. 5	1.0 h
	Required post-study	1). Review Week 7 lecture notes (1.0 hr). 2). Do Week 7 TA session exercises (1.5 hrs). 3). Attend Week 7 TA session (1.5 hrs)	4.0 h
14	Topic	Continuous Random Variables and Probability distribution II (Chap. 5)	
	Required preparation /homework	Preview textbook Chap. 5	1.0 h
	Required post-study	1). Review Week 7 lecture notes (1.0 hr). 2). Do Week 7 TA session exercises (1.5 hrs). 3). Attend Week 7 TA session (1.5 hrs) 4). Start to work on HW#3 (2.0 hrs)	6.0 h
15	Topic	Sampling Distribution and Estimation (Chap. 6,7,8), Hypothesis testing I (Chap. 9,10)	
	Required preparation /homework	Preview textbook Chap. 6,7,8, 9,10	1.0 h
	Required post-study	1). Review Week 8 lecture notes (1.0 hr). 2). Do Week 8 TA session exercises (1.5 hrs) 3). Attend Week 8 TA session (1.5 hrs)	4.0 h
16	Topic	Hypothesis testing II (Chap. 9,10)	

	Required preparation /homework	Preview textbook Chap. 9,10	1.0 h
	Required post-study	1). Review Week 8 lecture notes (1.0 hr). 2). Do Week 8 TA session exercises (1.5 hrs). 3). Attend Week 8 TA session (1.5 hrs) 4). Complete and submit HW#3 (2.0 hrs) 5). Do Week 9 TA session exercises (3.0 hrs) 6). Attend Week 9 TA session (3.0 hrs) 7). Do Week 10 TA session exercises (3.0 hrs) 8). Attend Week 10 TA session (3.0 hrs) 9). Complete and submit HW#4 (4.0 hrs)	22.0 h
	Total		108.0 h
Others	1) Competency goals and objectives for GSIM programs are available at: https://www.iuj.ac.jp/im-info/learning_goals/ 2) Lecture notes, schedule changes, homework questions, exam information, and other materials for this course will be updated by one of the channels below: i). The course folder (accessible at IUJ campus only): \\iuj-home\IM materials\2025-2026\Fall\Data-Analytics-for-Business Students should visit this folder frequently for newly posted course materials. ii). The course Google Classroom (you will be added later before the class starts). iii). Emails from the instructor. 3) You are advised to utilize not only class time but also TA (Teaching Assistants) session hours and other office hours to address any questions and unclear matters. You can also ask TAs for consultations. 4) Course policies: (a) All assignments and exams should be completed to receive a passing grade for this course. (b) No late assignment submissions will be accepted. (c) As outlined in the IUJ Honor Code, students are reminded not to engage in acts of plagiarism or other forms academic dishonesty. see: http://en.wikipedia.org/wiki/Plagiarism for more information. (d) No tolerance to any other academic misconduct.

	Class Schedule Day / Period Thursday 2 & 3		

Course Description	<p>Knowing where to start and what it takes to transform digitally is one of the biggest challenges leaders of successful organizations face. Not all companies are digital born, but all must offer customers new digital value proposition - or risk disruption from those that will. Sound knowledge of digital business and digital platform shall help companies of all sizes including the 'big, old' companies reimagine a digital future where the rapid innovation fuels growth.</p> <p>Digital business promises to usher in an unprecedented convergence of people, business and things that disrupts existing business models - even those born of the Internet and e-business eras. This course uses the framework of five building blocks outlined in the text "Designed for Digital" and guide the students through the compelling and proven concepts of digital business. Among many other, platform business is unique in that they can connect and match people in an increasingly efficient manner.</p> <p>Over the past 20 years, we have witnessed how platform business like eBay and Uber unlocked the power of communities and created enormous value for millions of people. Yet launching a platform takes a lot of work and are notoriously difficult to scale. For organizations centered around digital technology, it is important to harness the potential to become a digital platform or utilizing preexisting digital platforms from complementor organizations. This course shall address on the specific opportunities and challenges that arise in digital ecosystem and find the solution for a new successful digital business.</p>
Learning Objectives & Goals	<p>At the end of this course, the students should be able to:</p> <ul style="list-style-type: none"> • Understand today's technologies enabling Digital Businesses • Understand the concepts of Digital Business Models • Understand the Digital Platform Ecosystem and its implications • Design and develop a new digital business (or transform from an old one) <p>AACSB Learning goal 7</p>

	<p>(L7):</p> <p>Technology and Digital Transformation. Our students will be able to apply the latest technology element to creating a new business or adding competitive value to an organization through digital transformation.</p> <p>This course is a core course for DXP and measures two learning objectives:</p> <p>L7-1 Ability to understand the latest technology trend.</p> <p>L7-3 Ability to implement digital transformation while taking into account organizational and environmental implications.</p>
<p>Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)</p>	<p>MEXT</p> <p>For MBA</p> <p><Problem Solving></p> <p>MP1 - Able to demonstrate ability to formulate/define issues</p> <p>MP2 - Able to demonstrate ability to analyze and compute</p> <p>MP3 - Able to demonstrate ability to interpret concepts and data</p> <p>MP4 -Able to demonstrate ability to evaluate and make choices among alternatives</p> <p><Functional Business Knowledge></p> <p>MF6 - Able to demonstrate understanding of Data Analysis and Digital Technology</p> <p>For IMBA</p> <p><Strategic Decision Making></p> <p>MD1 - Able to apply the concepts of strategic management, recognizing internal and external strategic contexts.</p> <p>MD2 - Able to demonstrate ability to gather and interpret data</p> <p>For DXP</p> <p><Technology and Digital Transformation></p> <p>MT1 - Able to understand the latest technology trend</p> <p>MT2 - Able to employ suitable technology element to create a business or add competitive value to an organization</p> <p>MT3 - Able to implement digital transformation while taking into account organizational and environmental implications</p> <p>For ISEP</p> <p><Solutions toward Social Issues with Business Concept></p> <p>MI3 - Able to demonstrate ability to connect different ideas for creating new solutions toward factors of social issues</p> <p>MI4 - Able to demonstrate ability to establish systems with business knowledge</p>

	for providing solutions to social issues sustainably																												
Delivery Methods	The classes include lecture, case discussions, and group case presentation.																												
Assessment	<p>Students are required to read assigned textbook chapters and reference materials well every week before coming to the class. Students are required to actively participate in-class discussions, off-class group meetings and group presentations.</p> <p>Learning goal 7 (L7): Technology and Digital Transformation.</p> <p>Students' ability to apply the latest technology element to creating a new business or adding competitive value to an organization through digital transformation. (AACSB)</p> <p>L7-1 Ability to understand the latest technology trend = Case Analysis (50%) + Class Participation (50%)</p> <p>L7-2 Ability to employ suitable technology element to create a business or add competitive value to an organization. = Company Case Analysis and Presentation (50%) + Final Essay (50%)</p> <p>CLG-1 Course Learning Goal: Understand Digital Platform and Digital Business Models = Class Participation 30% + Group Case Analysis & Presentation 20% + Company Analysis and Presentation 20% + Individual Report 30%</p> <p>Weight on Final Grade = L7-1 30% + L7-2 30% + CLG-1 40%</p> <table border="1" data-bbox="429 1028 1370 1568"> <thead> <tr> <th></th> <th colspan="3">Learning Objectives</th> </tr> <tr> <th>Assessment methods</th> <th>(L7-1)</th> <th>(L7-2)</th> <th>(CLG-1)</th> </tr> </thead> <tbody> <tr> <td>Class Participation, Learning point memo</td> <td>50%</td> <td></td> <td>30%</td> </tr> <tr> <td>Group Case Analysis & Presentation, Individual case memo</td> <td>50%</td> <td></td> <td>20%</td> </tr> <tr> <td>Company Analysis and Presentation</td> <td></td> <td>50%</td> <td>20%</td> </tr> <tr> <td>Individual Report</td> <td></td> <td>50%</td> <td>30%</td> </tr> <tr> <td>Weight on Final Grade</td> <td>30%</td> <td>30%</td> <td>40%</td> </tr> </tbody> </table> <p>Notes</p> <ol style="list-style-type: none"> i. International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Fall Term

Course	Schedule code ITC2040301	Course title Data Analysis with Python	
Name of Instructor	Chuang, Hongwei		Credits 2
Instructor's contact information	Office#	Office Hours by appointment	E-mail
Class Schedule Day / Period	Wed.4~5		

Course Description	This course provides a comprehensive introduction to data analysis using the Python programming language. Students will learn the fundamental concepts and techniques for working with real-world datasets, from data collection and cleaning to exploration, visualization, and modeling. The course emphasizes hands-on application through practical examples and projects, equipping students with the skills necessary to derive insights and make data-driven decisions.		
Learning Objectives & Goals	Our primary goal is to empower you with practical data analysis skills using Python, fostering a strong understanding of the entire data analysis workflow. We aim to build your proficiency in essential Python data science libraries and cultivate your critical thinking and problem-solving abilities within data contexts. This course will lay a solid foundation for those wishing to pursue more advanced topics in data science.		
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	Contribution to the diploma policy, for [DXP] students, they will be able to understand the latest technology trend (MT1).		
Delivery Methods	Our course structure includes engaging lectures, practical homework assignments, and collaborative group projects. The instructor will provide comprehensive lecture notes and programming exercises to help you apply the concepts learned in class.		
Assessment	Grades are based on total points earned on: participation & hands-on exercise (20%) + one group project (40%) + one on-site quiz (40%)		
Prerequisites			
Method of feedback from instructor to students for exams/papers

Course	Schedule code ITC2100301	Course title Machine Learning and Text Analytics in Business		
Name of Instructor	Chuang, Hongwei			Credits 2
Instructor's contact information	Office#	Office Hours by appointment		E-mail
Class Schedule Day / Period	Thu.2~3			

Course Description	This course provides a practical and business-focused exploration of Machine Learning (ML) and Text Analytics techniques, equipping students with the skills to extract valuable insights, automate processes, and make data-driven decisions from this rich, often overlooked, data source.					
Learning Objectives & Goals	You will learn how to leverage the power of machine learning algorithms to understand, categorize, summarize, and predict from textual data, directly addressing real-world business challenges. The course emphasizes hands-on application using popular Python libraries, bridging theoretical concepts with practical implementation.					
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	Contribution to the diploma policy, they will be able to demonstrate understanding of Fundamental Business Knowledge (MF7).					
Delivery Methods	Our course structure includes engaging lectures, practical homework assignments, and collaborative group projects. The instructor will provide comprehensive lecture notes and programming exercises to help you apply the concepts learned in class.					
Assessment	Grades are based on total points earned on: participation & hands-on exercise (20%) + one group project (40%) + one on-site quiz (40%).					
Prerequisites						
Method of feedback from instructor to students for exams/papers						
Textbook(s)	Required: Reference Books / Journal Articles:					
Note on Textbooks and Reference Books						
Class Outline	Class	Topic	Required preparation /homework		Required post-study	
	1	Orientation	Slide	1h		2h

Course	Schedule code MGT 1120	Course title Strategic Management	
Name of Instructor	Gaku Funabashi		Credits 2
Instructor's contact information	Office#	Office Hours Please contact by mail	E-mail
Class Schedule Day / Period	(1) Monday 10:30~12:00, 13:00~14:30 (2) Tuesday 10:30~12:00, 13:00~14:30		

Course Description	<p>The objective of this course is to introduce the concept of strategic management with an understanding of both external business environment and internal management resources. Graduates from MBA program are expected to know theories and frameworks as well as ability using them in analysis. In many cases, several famous frameworks are used as templates without grasp of their roles in big picture, although view of synthesis is needed in Strategic Management. Through this course, various concepts are introduced for understanding each theory as well as its position in the whole process.</p> <p>Each week, we discuss what should be considered and why they are critical for fitting into the conditions related to customers' needs, competitive structure, accumulation of resources including technology, and psychological aspects influencing strategy implementation. Each issue is discussed further in how actual firms apply in real businesses. Many actual examples will be shown to see the application of concepts; students are expected to consider other examples in different countries through discussions and assignments.</p> <p>Sessions in the seventh week will be used for the presentations of group work.</p>		
Learning Objectives & Goals	MP1	Able to demonstrate ability to formulate/define issues.	
	MP2	Able to demonstrate ability to analyze and compute.	
	MP3	Able to demonstrate ability to interpret concepts and data.	
	MP4	Able to demonstrate ability to evaluate and make choices among alternatives.	
	MF1	Able to demonstrate understanding of Management Knowledge.	
	MF7	Able to demonstrate understanding of fundamental business knowledge.	
	MD3	Able to demonstrate ability to make a strategic decision under pressure.	
	MT3	Able to implement digital transformation while taking into account organizational and environmental implications.	
	MI4	Able to demonstrate ability to establish systems with business knowledge for providing solutions to social issues sustainably.	
Contribution to the Diploma Policy	This course contributes to the achievement of 8 goals of 5 learning objectives mentioned above. For the purpose of accomplishment of these objectives, this course

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Fall Term

Course	Schedule code MGT2020301	Course title Service Management	
Name of Instructor	Hirose, Shinichi		Credits 2
Instructor's contact information	Office#	Office Hours By ad-hoc appointment (flexible). You can also ask questions etc., during the lunch break or after the class	E-mail
Class Schedule Day / Period	Fri.4~5		

Course Description	<p>In today's economy, the majority of GDP is created from the service sector—more than 70% in developed countries and above 50% in developing countries. So we cannot ignore the importance of service business management anymore.</p> <p>This course provides an essential and practical understanding of service businesses. The concepts and frameworks of service management also apply to public services. We learn how to manage modern service organizations and the people delivering services effectively.</p>
Learning Objectives & Goals	<p>Characteristics of human-centric service operations compared to manufacturing practices. You will also learn how service operations should be conceptualized, designed, implemented, and monitored. Also, you will learn the practical techniques for managing, motivating, and empowering the front-line employees (FLEs) who deliver services to your clients.</p> <p>This course is relevant to those who will engage in various service operations for business and public services.</p> <p>Also, many manufacturers in the contemporary environment are aggressively seeking opportunities to expand their business scope into the service domain. Such movements are dubbed "servitization." Therefore, this course will also add significant value for those who will work for manufacturers.</p> <p>This course specializes in providing a keen understanding of service activities. The topics include strategic service model design, service marketing, service operations, customer-centricity, and organization management/leadership issues.</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	MP1, MP2, MP3, MP4, MF1, MF7, MD1, MT3
Delivery Methods	<p>Lecture on each week's topic, then group and class discussion on the issues of the case material.</p> <p>For questions that cannot be handled within the class hour, the instructor can talk</p>

	<p>before and after the class or flexibly arrange appointments.</p> <p>Course delivery consists of a) your text/subtext reading, b) your weekly case analysis (individual homework), c) group case discussion within the classes, d) class-wide case discussion, and e) supplementary lectures related to the topics of each week.</p> <p>You will belong to a group discussion and presentation work team. The instructor will determine the team's formation during Weeks 1-2 with consideration of diversity, and the team members will be fixed throughout the course. The size of the team members will be four to six, depending on the class size. With your teammates, you will discuss the issues of the case every week.</p> <p>* Every week, we will have a breakout time for each group to discuss among members.</p> <p>* Also, each team is asked to make a group presentation in Weeks 4 and 6.</p> <p>This course builds on the understanding of Organizational Behavior concepts. 1-year program students who did not have the opportunity to take the OB before this class may have difficulty fully grasping the implications of the content presented in this course. However, the instructor will support these students by inputting key underlying OB concepts through weekly supplementary lectures.</p>
Assessment	<p>- Case Memo Preparation and Submission: Submit a 1-page (or up to 3 pages if you want), more than 300 words of analysis memo by 23:59 JST, one day before the class. It is individual work, and do not discuss to develop your memo: 10%</p> <p>*The submission of this type of individually prepared report is due in Weeks 2, 3, 5, and 7 (four times).</p> <p>The instructor will explain the report format and submission method in Week 1 and on the Classroom platform.</p> <p>* You submit your case memo to Turnitin (registration instructions will be given beforehand)</p> <p>* Key questions will be uploaded to the Classroom site for these cases (Weeks 1, 2, 3, 5, and 7). You can use these keys as compasses to consider the issues in each case and prepare the memo.</p> <p>* Key questions will not be offered for cases in Weeks 4 and 8, so such anchors will not constrain your thoughts.</p> <p>- Impactful Class Participation (active involvement in discussions, in terms of speak-up quality/impact rather than mere frequency): 25%</p> <p>- Peer Evaluation (discussion group member survey, conducted during and soon after the week eight session): 15%</p> <p>- Week 4 Group Presentation: 15%</p> <p>- Week 6 Group Presentation: 10%</p> <p>- Week 8 Final Essay (case analysis and essay, individual work): 25% - There is no minimum or maximum number of pages for your Report/Essay. However, considering the importance of this output, which is meant to be your wrap-up for this course, most likely, you will need to develop three to five pages of the document. Submission guidance and instructions will be given on the Classroom site around Week 5.</p>
Prerequisites	<p>None. However, this is an advanced course based on the Organizational Behavior course. 2nd-year students in a 2-year course and 1-year Program students are eligible</p> <p>[STRONGLY ADVISED] 1st-year students in the 2-year Programs are advised to</p>

	enroll in this class in their 2nd year. [GSIR Students] The instructor encourages GSIR students to contact the instructor before taking this course.				
Method of feedback from instructor to students for exams/papers	Case Memos: Pass/Fail Significant Assignments, such as Group Presentation and Final Essay: Feedback comments and score points				
Textbook(s)	<p>Required:</p> <p>a) Title: Service Management: an integrated approach (http://www.amazon.co.jp/gp/search/?field-isbn=9780273732037), b) Edition: 3rd, c) Author: Looy, B. v., Dierdonck, R. v., & Gemmel, P., d) Publisher: Financial Times Prentice Hall, e) Year: 2013, f) ISBN: 9780273732037</p> <p>Reference Books / Journal Articles:</p> <p>a) Title: Services Marketing: People, Technology, Strategy, b) Edition: 9th, c) Author: Jochen Wirts and Christopher Lovelock, d) Publisher: World Scientific, e) Year: 2022, f) ISBN: 9781944659806</p> <p>a) Title: Management Lessons from Mayo Clinic: Inside One of the World's Most Admired Service Organizations, b) Edition: 1st, c) Author: Leonard L. International University of Japan
Graduate School of International Management
2025 Fall Term

Course	Schedule code MGT2090	Course title Resilient System Design and Management	
Name of Instructor	Mihoko Sakurai		Credits 2
Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	Wednesday, 4-5 periods		

Course Description	<p>This course will cover a design and management of information systems within an organization that plays a central role in promoting digital transformation (DX) practice. The course will be provided by a mixture of lectures, case discussions, group exercises and reflection report writing.</p> <p>A lecture part covers concepts of “Resilience”, “System” and “Design thinking” which are followed by associated system development methodologies such as “Agile”. The “Design thinking” is a problem-oriented approach for the system development. A case discussion part consists of four case materials which will provide problems in an organization and system design processes in practice.</p> <p>There are a four series of group exercises where students will be asked to design and draw an architecture of an information system for an organization of their choice. Each exercise will provide practical methods and techniques of system design – i.e., <i>user stories, user cases, system requirements, domain modeling, use case modeling, design principles and user interface etc.</i>- based on the textbook. The architecture includes the design of interaction between a company and its customer, what technology will be used, what data will be exchanged, how the data will be processed, and how it will ultimately lead to value creation – “Resilience” in this course’s context. Students are expected to polish their ideas through feedback given in each exercise, mid-term presentation and final presentation.</p> <p>Students will be asked to submit a short report after the course finishes. This report should reflect your learnings and describe how the suggested solution by your team can be related to the concept of “Resilience”.</p>
Learning Objectives & Goals	<ol style="list-style-type: none"> 1. To understand basic concepts of resilience and design thinking 2. To understand how information systems interact and integrate with the organization and their problems 3. To acquire practical methods and techniques of system design for problem solving 4. To produce documents needed in the system development process

	5. To get knowledge for relating the concept of resilience and system design																																																												
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)	<p>For DXP</p> <p>MF7: Able to demonstrate understanding of fundamental business knowledge</p> <p>MT2: Able to employ suitable technology element to create a business or add competitive value to an organization</p> <p>MT3: Able to implement digital transformation while taking into account organizational and environmental implications</p> <p>For ISEP</p> <p>MI1: Able to demonstrate ability to identify social issues</p> <p>MI2: Able to demonstrate ability to analyze fundamental factors of social issues</p> <p>MI3: Able to demonstrate ability to connect different ideas for creating new solutions toward factors of social issues</p> <p>MI4: Able to demonstrate ability to establish systems with business knowledge for providing solutions to social issues sustainably</p>																																																												
Delivery Methods	The classes include lecture, case discussions and group exercises.

Class Outlines	Class		Contents	
	Class	Topic	Introduction	
			Introduction - Introduction of the course - Introduction of essential concepts: “Resilience”, “System”, and “Design thinking”	
	1	Required preparation /homework	N/A	0h
	1	Required post-study	Read a textbook’s chapter and referenced papers to reflect what you learned in the class. Readings: <ul style="list-style-type: none"> ● Chapter 3. Why Systems Work So Well: Resilience, Self-Organization, and Hierarchy from “<i>Thinking in systems: A primer</i>” ● Brown, T. (2008). Design thinking. Harvard business 	2h

		<p>review, 86(6), 84.</p> <ul style="list-style-type: none"> Fiksel, J. (2003). Designing Resilient, Sustainable Systems. <i>Environmental Science & Technology</i>, 37 (23), 5330-5339. 	
2	Topic	<p>World café and group formation</p> <ul style="list-style-type: none"> - Share your ideas and thoughts on what “system design” is with other students - Experience the “World café” method for bringing people together around questions that matter 	
	Required preparation /homework	N/A	0h
	Required post-study	<p>Read a chapter from referenced books to reflect what you experienced in the class.</p> <p>Readings:</p> <ul style="list-style-type: none"> Chapter 11. Conversational Leadership: Cultivating Collective Intelligence – The results are in the relationships; Hewlett-Packard and Designing organizational infrastructures for dialogue: Philip Morris USA from “<i>The world cafe</i>”. 	1h
3	Topic	<p>Case discussion 1: IDEO 【Topic: Design Process】</p> <ul style="list-style-type: none"> - Explore IDEO’s prestigious design and innovation process - Discuss how “prototyping” is important in IDEO’s innovation 	
	Required preparation /homework	<p>Readings: (the material should be purchased)</p> <ul style="list-style-type: none"> HBS case: IDEO 	2h
	Required post-study	Reflect the class discussion and essential concepts learned in the class.	1h
4	Topic	<p>Introductory lecture + Group exercise 1</p> <ul style="list-style-type: none"> - Create <i>user stories</i> and <i>user cases</i> (use Event table) - Define <i>system requirements</i> 	
	Required preparation /homework	Prepare for the group exercise: exercise materials will be provided based on the text book “ <i>Systems Analysis and Design</i> ”.	1h
	Required post-study	<p>Reflect the group exercise and feedback from an instructor.</p> <p>Prepare for the next group exercise.</p>	1h
5	Topic	<p>Case discussion 2: SUICA 【Topic: Problem Definition】</p> <ul style="list-style-type: none"> - Explore how SUICA was implemented during the 2024 Noto Peninsula Earthquake 	

		- Discuss what problems in the field were and how they were solved by the SUICA's system	
	Required preparation /homework	Readings: (the material will be provided) ● SUICA: Digital solutions through public-private partnerships	2h
	Required post-study	Reflect the class discussion and essential concepts learned in the class.	1h
6	Topic	Introductory lecture + Group exercise 2 - <i>Domain modeling</i> - <i>Use case modeling</i>	
	Required preparation /homework	Prepare for the group exercise: exercise materials will be provided based on the text book " <i>Systems Analysis and Design</i> ".	1h
	Required post-study	Reflect the group exercise and feedback from an instructor. Prepare for the next group exercise.	1h
7	Topic	Case discussion 3: DBS 【Topic: Solution Design】 - Explore DBS's system design process and their DX strategy Discuss design principles behind DBS's digital solutions	
	Required preparation /homework	Readings: (the material should be purchased) IVEY case: DBS Bank Ltd: How to Accelerate Digitalization	2h
	Required post-study	Reflect the class discussion and essential concepts learned in the class.	1h
8	Topic	Mid-term group presentation - Present the results of group exercises and get feedback	
	Required preparation /homework	Prepare presentation of what you have done through group exercise 1 and 2.	4h
	Required post-study	Reflect feedback from an instructor.	1h
9	Topic	Case discussion 4: Nicigas 【Topic: Solution Design】 - Explore Nicigas's system architecture - Discuss how each solution can be designed for solving the problems	
	Required preparation /homework	Readings: (the material will be provided) ● NICIGAS 3.0: DX energy platform for a sustainable future	2h
	Required post-study	Reflect the class discussion and essential concepts learned in the class.	1h
10	Topic	Case discussion 4: Nicigas (continued)	

		<ul style="list-style-type: none"> - Explore Nicigas’s DX strategy - Discuss Nicigas’s future vision and how information systems will impact that vision 	
	Required preparation /homework	Readings: (the material will be provided) <ul style="list-style-type: none"> ● NICIGAS 3.0: DX energy platform for a sustainable future 	0h
	Required post-study	Reflect the class discussion and essential concepts learned in the class.	1h
11	Topic	Guest lecture (Narita International Airport) 【Topic: System Requirements】 <ul style="list-style-type: none"> - Explore how an enterprise system within an organization is designed and managed - Discuss system requirements of the enterprise system given in the lecture and its definition process 	
	Required preparation /homework	N/A	0h
	Required post-study	Reflect the class discussion and essential concepts learned in the class.	1h
12	Topic	Introductory lecture + Group exercise 3 <ul style="list-style-type: none"> - Define <i>design principles</i> - Design <i>user interface</i> 	
	Required preparation /homework	Prepare for the group exercise: exercise materials will be provided based on the text book “ <i>Systems Analysis and Design</i> ”.	1h
	Required post-study	Reflect the group exercise and feedback from an instructor. Prepare for the next group exercise.	1h
13	Topic	Lecture: Frugal, Agile and Resilience <ul style="list-style-type: none"> - Explore the relationship of concepts “Resilience”, “Frugal”, and “Agile” - Discuss how interactions of those concepts can enable an organization to design a resilient information system 	
	Required preparation /homework	Read referenced papers to prepare for the lecture. <ul style="list-style-type: none"> ● Watson, R. T., Kunene, K. N., & Islam, M. S. (2013). Frugal information systems (IS). <i>Information Technology for Development</i>, 19(2), 176-187. ● Heeks, R., & Ospina, A. V. (2019). Conceptualising the link between information systems and resilience: A developing country field study. <i>Information Systems Journal</i>, 29(1), 70-96. 	3h

International University of Japan
 Graduate School of International Management (Master's Program)
 2025 Fall Term

Course	Schedule code MGT2110301	Course title Entrepreneurship and Innovation	
Name of Instructor	Zhang Zhang, Yingying		Credits 2
Instructor's contact information	Office#	Office Hours After class or by appointment.	E-mail
Class Schedule Day / Period	Fri.2~3		

Course Description	This course aims to provide students with a comprehensive understanding of entrepreneurship and innovation, with the specific goal of preparing a business plan for a new venture launch. The focus will be on identifying business opportunities, developing innovative solutions, and creating new ventures. Students will learn about the entrepreneurial process, including ideation, business modeling, resource acquisition, and growth strategies. Additionally, the course will explore how entrepreneurship can be applied within corporate settings as intrapreneurship to drive and inspire positive changes in corporations, society, and culture through social entrepreneurship.		
Learning Objectives & Goals	By the end of this course, students will be able to: 1. Understand the key concepts and theories of entrepreneurship and innovation. 2. Identify and evaluate entrepreneurial opportunities. 3. Develop and validate innovative business ideas. 4. Create and present a comprehensive business plan. 5. Understand the financial aspects of starting and running a new venture. 6. Develop skills for managing and scaling a startup or social enterprise., and/or apply entrepreneurial thinking within a corporate context to drive change		
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	[For MBA] MP1 Able to demonstrate ability to formulate/define issues. MP2 Able to demonstrate ability to analyze and compute. MP3 Able to demonstrate ability to interpret concepts and data. MP4 Able to demonstrate ability to evaluate and make choices among alternatives. MF1 Able to demonstrate understanding of Management Knowledge. MD1 Able to apply the concepts of strategic management, recognizing internal and external strategic contexts. [For DXP] MT2: Able to employ suitable technology element to create a business or add competitive value to an organization MT3: Able to implement digital transformation while tailing into account organizational and environmental [For ISEP] MI3 Able to demonstrate ability to connect different ideas for creating new solutions toward factors of social issues		
Delivery Methods	Theoretical lecture and practical real business project		
Assessment	The assessment will be based on: 1. Class participation (20%)		

	<p>2. Weekly assignments (30%) 3. Midterm project (20%) 4. Final project (Business Plan and Pitch) (30%)</p>					
Prerequisites	No specific prerequisite.					
Method of feedback from instructor to students for exams/papers	Feedback will be provided by the instructor via email or Google Classroom.					
Textbook(s)	<p>Required:</p> <p>a) Title: Entrepreneurship and Innovation, b) Edition: , c) Author: Tim Mazzarol, Sophie Reboud, d) Publisher: Springer Singapore, e) Year: 2020, f) ISBN: 9789811394140</p> <p>Reference Books / Journal Articles:</p> <p>a) Title: People Centric Innovation Ecosystem Japanese Management and Practices, b) Edition: , c) Author: Yingying Zhang-Zhang, Takeo, d) Publisher: Cambridge University Press, e) Year: 2023, f) ISBN: 9781108981200</p> <p>a) Title: Innovation and Entrepreneurship Ecosystems, b) Edition: , c) Author: Israel Patiño – Glaván, d) Publisher: Springer, e) Year: 2023, f) ISBN:</p> <p>a) Title: Innovation and Entrepreneurship: Theory, Policy, and Practice, b) Edition: , c) Author: Elias G. International University of Japan
Graduate School of International Management
2025 Fall Term

Course	Schedule code MKG1010	Course title Marketing Management	
Name of Instructor	Alessandro Comai		Credits 2
Instructor's contact information	Office#	Office Hours Please contact by mail	E-mail
Class Schedule Day / Period	(1) Friday 10:30~12:00, 13:00~14:30 (2) Friday 14:40~17:50		

Course Description	<p>Delivering value to customers in a highly competitive environment is a challenging task for many organizations. Many managers consider it trivial, but anecdotal evidence shows that many companies fail. Managers must accurately analyze markets and customers to understand customer preferences and avoid making decisions based on their own intuition or assumptions.</p> <p>Marketing management is a key role. It provides the knowledge to launch any new business plan or to reassure the current one. It is a discipline that requires attention to details such as trends, competitors, customer segments, and their current and future needs. This is essential for developing new products and maintaining a competitive position in the marketplace. Marketing is applied not only to consumer-oriented companies, but also to business-to-business models, government agencies, and nonprofit organizations.</p>
Learning Objectives & Goals	<ul style="list-style-type: none"> - LO1 Able to demonstrate a global understanding of marketing knowledge (AACSB L5-4). - LO2 Able to analyze market opportunities as well as risks and recommend the best marketing strategy according to corporate objectives. - LO3 Able to define a marketing mix and to prepare a marketing plan.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)	<p>This core course provides the basic concepts of marketing and enables students to create an initial marketing plan. It provides a foundation from which students interested in marketing can progress to a more advanced level. The learning objectives of each program are as follows:</p> <p>(For MBA and JGDP)</p> <ol style="list-style-type: none"> 1. MF4: Able to demonstrate understanding of marketing knowledge. <p>(For IMBA)</p> <ol style="list-style-type: none"> 1. MD1: Able to apply the concepts of strategic management, recognizing internal and external strategic contexts. 2. MD2: Able to demonstrate ability to gather and interpret data. <p>(For ISEP)</p> <ol style="list-style-type: none"> 1. MI4: Able to demonstrate understanding of Japanese society and business environments

Delivery Methods	<p>The course uses interactive sessions supported by class discussion, short case studies, group hands-on activities, and presentations. The course is divided into two parts:</p> <ol style="list-style-type: none"> Lecture: Concepts, frameworks, and examples introduce students to the weekly topic (Please review the reading material provided by the instructor to make this class more interactive and interesting. For example, you can share your own experiences in your industry or country). Workshop: Students apply the concepts discussed in class by presenting some case studies and working on their group project. Students will be divided into groups - usually 5 members per group - and will use the collaborative platform Miro.com to create the marketing plan. Each group will select a product or service to market in Japan. The product/service can be either Japanese or from another country, and can be an existing or a new product/service. 																																										
Assessment	<table border="1" data-bbox="432 875 1254 1267"> <thead> <tr> <th></th> <th colspan="3">Learning Objectives</th> </tr> <tr> <th>Assessment methods</th> <th>LO1</th> <th>LO2</th> <th>LO3</th> </tr> </thead> <tbody> <tr> <td>Class participation</td> <td>20%</td> <td>50%</td> <td></td> </tr> <tr> <td>Weekly assignment</td> <td>30%</td> <td>50%</td> <td>20%</td> </tr> <tr> <td>Group presentation</td> <td>20%</td> <td></td> <td>40%</td> </tr> <tr> <td>Group final report</td> <td>30%</td> <td></td> <td>40%</td> </tr> <tr> <td>Weight on final grade</td> <td>30%</td> <td>20%</td> <td>50%</td> </tr> </tbody> </table> <table border="1" data-bbox="432 1305 1254 1697"> <thead> <tr> <th>Assessment methods</th> <th>Grade</th> </tr> </thead> <tbody> <tr> <td>Class participation</td> <td>10%</td> </tr> <tr> <td>Weekly personal assignment</td> <td>15%</td> </tr> <tr> <td>Weekly group work*</td> <td>15%</td> </tr> <tr> <td>Group presentation</td> <td>20%</td> </tr> <tr> <td>Group final report</td> <td>20%</td> </tr> <tr> <td></td> <td>100%</td> </tr> </tbody> </table> <p>(*) Weekly Assessment. Each group must complete the weekly assignment using the weekly template provided on Miro.com before the start of class.</p> <p>Note: The course relies heavily based on group work. Each student is strongly encouraged to take an active part by discussing and adding his/her own contribution to the class and the group.</p>		Learning Objectives			Assessment methods	LO1	LO2	LO3	Class participation	20%	50%		Weekly assignment	30%	50%	20%	Group presentation	20%		40%	Group final report	30%		40%	Weight on final grade	30%	20%	50%	Assessment methods	Grade	Class participation	10%	Weekly personal assignment	15%	Weekly group work*	15%	Group presentation	20%	Group final report	20%		100%

Method of Feedback for Exams/Papers	<ul style="list-style-type: none"> Feedback on group work will be provided directly on the Miro.com platform (comments or notes). This will happen throughout the course. Groups will be peer reviewed. There will be 3 peer reviews: Mid-term (week 4), after presentation (week 8), after submission of the final report (week 10). <p>NOTE: Special assistance or additional support will be provided to students or groups who may have some difficulty in completing the assignments. Students are encouraged to report difficulties experienced by group members, especially if a student is not attending group meetings or is not committed to the group.</p>
Required Textbook(s)	<p>There is no required textbook.</p> <p>However, in order to prepare for each class, students are required to read the student book "Marketing Plan in Practice: A Step-by-Step Guide to Success" in advance. This reading material is provided by the instructor and describes some basic marketing management concepts. This will help students prepare for class and group work, enabling them to maximize their learning from each class and discussion.</p>
Reference Books	Kotler, P. and K. L. Keller (2015) Marketing Management, 15th Ed. Global Edition, Pearson.
Other Materials	<p>The instructor provides the following material</p> <ol style="list-style-type: none"> Marketing plan framework (using MIRO collaborative platform). This template, developed by the instructor, provides a step-by-step framework for students to follow when applying the concepts discussed in class. Marketing plan report template (using google doc).

Class Outlines	Class	Contents	
	1	Topic	Introduction to marketing management and organization analysis
Required preparation /homework		Read Foreword, chapter 1 and 2 of the student book, "Marketing Plan in Practice: A Step-by-Step Guide to Success."	1.5h
Required post-study		Review the content introduced in class and apply the concepts to the group meeting.	0.5h
Topic		Case discussion about marketing in a SME	
Required preparation /homework		<ul style="list-style-type: none"> Read case study "Genbei a Japanese company manufacturing beach sandals" + watch Youtube video "Genbei - A story of a Beach Sandal Company" (2:58 min). Submit the answers to the case using the Google form (link will be available in Google Classroom) before the start of class. 	2.0h
Required post-study		Group meeting: define product and brand for the group project. Analyze the actual company (brief history, mission, vision and state corporate objective).	3.0h

3	Topic	Marketing intelligence: trend & competitor analysis	
	Required preparation /homework	Read chapter 3 and 4 of the student book, "Marketing Plan in Practice: A Step-by-Step Guide to Success."	1.5 h
	Required post-study	Review the content introduced in class and apply the concepts to the next group meeting.	0.5 h
4	Topic	Case discussion about marketing intelligence application	
	Required preparation /homework	<ul style="list-style-type: none"> Select 1 (only one) case between <i>Metso Automation</i>, <i>Perlos</i> and <i>Nokian Tires</i> and read it. Submit the answers to the case using the Google form (link will be available in Google Classroom) before the start of class. 	1.0 h
	Required post-study	Group meeting: analyze trends (STEEP), direct, potential and substitute competitors (6 angles of competitions) and direct competitor's product offering for the group project.	3.0 h
5	Topic	Segmentation and customer behavior	
	Required preparation /homework	Read chapter 5 and 6 of the student book, "Marketing Plan in Practice: A Step-by-Step Guide to Success."	1.5 h
	Required post-study	Review the content introduced in class and apply the concepts to the next group meeting.	0.5 h
6	Topic	Case discussion about segmentation and preferences application	
	Required preparation /homework	<ul style="list-style-type: none"> Read Case: <i>Pink Lady Apples</i>. Submit the answers to the case using the Google form (link will be available in Google Classroom) before the start of class. 	2.0 h
	Required post-study	Group meeting: define customer characteristics (segment) and describe how the segment take decision during the entire buying process (customer behavior)	3.0 h
7	Topic	Customer preferences and perceptual map	
	Required preparation /homework	Read chapter 6 and 7 of the student book, "Marketing Plan in Practice: A Step-by-Step Guide to Success."	1.5 h
	Required post-study	Review the content introduced in class and apply the concepts to the next group meeting.	0.5 h
8	Topic	Market estimation	
	Required preparation /homework	Read chapter 6 of the student book, "Marketing Plan in Practice: A Step-by-Step Guide to Success."	1.0 h
	Required post-study	Group meeting: define product/service attributes using a perceptual map.	3.0 h

9	Topic	Marketing Mix: product and price	
	Required preparation /homework	Read chapter 8 and 9 of the student book, "Marketing Plan in Practice: A Step-by-Step Guide to Success."	1.5 h
	Required post-study	Review the content introduced in class and apply the concepts to the next group meeting.	0.5 h
10	Topic	Case discussion and application of marketing mix	
	Required preparation /homework	<ul style="list-style-type: none"> • Read Case: <i>Supreme: the billion-dollar streetwear brand</i>. • Submit the answers to the case using the Google form (link will be available in Google Classroom) before the start of class. 	2.0 h
	Required post-study	Group meeting: describe the final product/service offered and define price policy.	3.0 h
11	Topic	Marketing Mix: promotion and place	
	Required preparation /homework	Read chapter 10 and 11 of the student book, "Marketing Plan in Practice: A Step-by-Step Guide to Success."	1.5 h
	Required post-study	Review the content introduced in class and apply the concepts to the next group meeting.	0.5 h
12	Topic	Case discussion and application of marketing mix	
	Required preparation /homework	<ul style="list-style-type: none"> • Read Case: <i>Ogasaka Ski: Japanese ski and snow board manufacturing firm</i> + watch Youtube video (5:31 min). • Submit the answers to the case using the Google form (link will be available in Google Classroom) before the start of class. 	2.0 h
	Required post-study	Group meeting: define promotional plan and channels.	3.0 h
13	Topic	Implementation of the Marketing Plan	
	Required preparation /homework	Read chapter 12 of the student book, "Marketing Plan in Practice: A Step-by-Step Guide to Success."	1.0 h
	Required post-study	Review the content introduced in class and apply the concepts to the next group meeting.	0.5 h
14	Topic	Review of the marketing plan and the managerial financial statement.	
	Required preparation /homework	Review of project group.	3.0 h
	Required post-study	Group meeting: prepare the marketing plan presentation.	6.0 h

	15	Topic	Group presentation: marketing plan	
		Required preparation /homework	Group presentation preparation Note: Groups can prepare the presentation using MS Power Point or similar, but they must include all the content developed in Miro. Students can use screenshots from Miro or create their own.	1.0 h
		Required post-study	Review presentation with feedback provided by the instructor	1.0 h
	16	Topic	Group presentation: marketing plan	
		Required preparation /homework	Group presentation preparation Note: Groups can prepare the presentation using MS Power Point or similar, but they must include all the content developed in Miro. Students can use screenshots from Miro or create their own.	1.0 h
		Required post-study	Write and prepare the group marketing plan report NOTE: The plan must be emailed as a soft copy (.doc) by the end of week 10 (2 weeks after the presentation date). There is no minimum or maximum number of pages. However, groups must include all content developed in Miro with a reasonable explanation. Please bear in mind that figures and tables must be explained. Further details will be provided by the instructor.	10.0 h
	Total			63.5 h
Others	Students must subscribe to the Miro.com platform. The subscription is free but limited to 3 boards (projects). For enrolled students, Miro.com offers a free full subscription valid for 2 years. It is not necessary to use the full subscription for Marketing Management as you will only use one board. However, if you use Miro for other activities, it is recommended to extend the subscription. More information will be provided at the beginning of the course and in Google Classroom.

 2025 Fall Term

Course	Schedule code MKG2010301	Course title Marketing Intelligence	
Name of Instructor	Comai, Alessandro		Credits 2
Instructor's contact information	Office#	Office Hours Wen-Fri 10.00-18.00	E-mail
Class Schedule Day / Period	Tue.2~3		

Course Description	<p>More and more companies require a formalized and advanced Marketing Intelligence (MI) function to provide timely insights for strategic and marketing decision making. It has been proven that environmental and organizational factors are directly related to the success and growth of an MI function (Comai, 2016). Therefore, organizations need to identify and monitor them carefully. To do this, key information needs to be collected, organized, analyzed, shared across the organization, and ultimately applied to develop a market-oriented organization. The goal of this course is to develop managers with a greater understanding and knowledge of how MI works. Participants will understand not only how to produce intelligence, but also how to use it.</p>
Learning Objectives & Goals	<ol style="list-style-type: none"> 1. Build foundational and advanced competencies for developing, deploying, and managing a marketing intelligence (MI) function. 2. Understand how to identify the organization's intelligence needs, select the right sources, analyze data and information to gain insights, and prepare actionable recommendations. 3. Identify possible techniques for creating a proactive organization and anticipating events.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>MF4 Able to demonstrate understanding of Marketing Knowledge MF7 Able to demonstrate understanding of fundamental business knowledge MD1 Able to apply the concepts of strategic management, recognizing internal and external strategic contexts MD2 Able to demonstrate ability to gather and interpret data MT1 Able to understand the latest technology trend</p>
Delivery Methods	<p>The course is hands-on and uses interactive sessions supported by discussion. Each student is highly encouraged to take an active participation by discussing and adding his/her own contribution to case studies. Each session is usually divided into two parts: lecture and workshop.</p>
Assessment	<p>Group Project (60% of total grade) Students will be divided into small groups during the first week and asked to prepare a case study of an organization (can be a company, technology institute, industry association, government agency) in Japan or in another country (due and short</p>

	<p>presentation in week 10).</p> <p>Personal Participation (40% of total grade) Class discussion and in-class group or individual exercises. Student contributions will be evaluated through: questions, comments, differing viewpoints, presentations, etc.</p>
Prerequisites	None
Method of feedback from instructor to students for exams/papers	Weekly group follow-up.

2025 Fall Term

Course	Schedule code TBD	Course title Energy Transition (Tentative)	
Name of Instructor	Ayako Kameda		Credits 1
Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	12/5 (sessions 1 and 2) 12/6 (sessions 3 and 4) 12/12 (sessions 5 and 6) 12/13 (sessions 7 and 8)		

Course Description	<p>This course explores the dynamic and rapidly evolving landscape of global Green Transformation (GX), with a focus on the practical, technological, and policy-driven aspects of decarbonization and Energy Transition. Students will engage with cutting-edge global trends in climate innovation, sustainable investment, and regulatory frameworks shaping the transition to a low-carbon economy. We will critically examine the gap between the ideal scenarios laid out in global climate goals and the realistic outcomes based on current trajectories. Through a blend of lectures, case studies, and discussions, students will analyze the complex interplay between technology, politics, and economic systems in shaping decarbonization strategies. A significant component of the course will be experiential: students will work in teams to tackle real-world decarbonization challenges drawn from public and private sector case studies and will be asked to role-play in a realistic scenario to solve real world energy transition problems. They will present their findings and recommendations, gaining practical experience in collaborative problem-solving and strategic communication through group presentations throughout the course. This course prepares students to be thoughtful, solution-oriented leaders in the global energy transition movement, equipped with both a deep understanding of systemic challenges and a toolkit of innovative responses.</p>
Learning Objectives & Goals	<p>Learning Objectives</p> <p>By the end of this course, students will be able to:</p> <ol style="list-style-type: none"> 1. Differentiate between idealized climate goals and the realistic constraints and trade-offs that shape practical outcomes. 2. Assess the effectiveness and limitations of current GX strategies across different countries and industries. 3. Collaborate in teams to address real-world decarbonization challenges, applying

	<p>interdisciplinary tools and perspectives.</p> <p>4. Develop and present actionable solutions and strategic recommendations to complex GX problems.</p> <p>5. Reflect critically on the societal, political, and economic dimensions of Energy Transition efforts, especially in the context of long-term climate resilience.</p> <p>Course Goals</p> <ul style="list-style-type: none"> • To equip students with a solid understanding of current global trends and innovations in decarbonization. • To bridge the gap between climate change theory and the practical challenges of implementation. • To develop students' ability to critically analyze and evaluate policy, technology, and investment strategies in the context of Green Transformation. Create and develop short term and long term strategies and recommendation for policy and private sector changes. • To foster collaborative problem-solving and strategic thinking through hands-on, real-world project work. • To cultivate effective communication and presentation skills relevant to climate and sustainability challenges.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)	<p>For MBA (GX)</p> <ul style="list-style-type: none"> <input type="checkbox"/> Able to demonstrate understanding of carbon neutrality, circular economy, and bio-diversity <input type="checkbox"/> Able to demonstrate understanding of energy transition <p>For IMBA</p> <ul style="list-style-type: none"> <input type="checkbox"/> Able to clearly identify the central problem/issue to demonstrate understanding of socially responsible leadership concepts and practices <input type="checkbox"/> Able to demonstrate ability to gather and interpret data <input type="checkbox"/> Able to demonstrate ability to make a strategic decision under pressure.
Delivery Methods	Lecture, Case Studies, Group Discussion, and Group Presentations
Assessment	-Active class participation (attendance, class preparation, and class discussion): 50% -Class presentation: 35 % -Closed note paper exam: 15%
Prerequisites	
Method of Feedback for Exams/Papers	Feedback to the final presentation will be given after the last session.
Required Textbook(s)	N/A
Reference Books	
Other Materials	

Class Outlines	Class	Contents	
		1	Topic
Required preparation /homework			N/A 3h
Required post-study			3h
2		Topic	What happens if we are faced with +4 Deg world in 2050? What are the impact to society in all aspects? Lecture and Group Discussion on macro trends. What are the barriers to achieve 1.5 Deg 2050? What are the ongoing efforts – real life examples. Group Discussion and highlight key themes and focus areas. Groups to present, followed by plenary discussion. 90 min.
		Required preparation /homework	3h
		Required post-study	Write a reflection memo, what would your home-country/town look like in 2050, and what are the key factors and levers to make a difference? 3h
3		Topic	Lecture, followed by Plenary Discussion. Discuss various blockers that impact Energy Transition. Group discussion on levers and areas that impact delivery of energy transition. Explore impact of policy, innovation, investment, technology, philanthropy, advocacy, industry solutions, etc. Divide/form groups for next rounds of group work. Get feedback from other teams in the plenary session and presentation. Total 90 min.
		Required preparation /homework	3h
		Required post-study	3h
4		Topic	Scene setting, followed by group work. Role Modeling/ Scenario Case Study kicks off. Total 90 min.
			Note, session 4 includes a closed note paper exam. 3h
		Required post-study	3h
	Required post-study	Each Group prepares a presentation. Ensure each person has a speaking part. 5h

Class Schedule Day / Period	unfixed		

Course Description	This course assist students in completing their research report, a course requirement for the completion of a Master's Degree in Business Administration				
Learning Objectives & Goals	Through the research report, students should be able to develop skills to systematically analyze a problem and make suitable recommendations.				
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	Refer to IUJ's guidelines				
Delivery Methods	One-to-one supervision and class mentoring.				
Assessment	Pass or Fail for the research report				
Prerequisites					
Method of feedback from instructor to students for exams/papers	Feedback provided during the discussions				
Textbook(s)	Required: Reference Books / Journal Articles:				
Note on Textbooks and Reference Books					
Class Outline	Class	Topic	Required preparation /homework		Required post-study
	1	Overview of the research process		2.5h	2.5h
	2	Formulation of the research problem		2.5h	2.5h
	3	Literature review		2.5h	2.5h
	4	Literature review		2.5h	2.5h
	5	Data gathering		2.5h	2.5h
	6	Data gathering		2.5h	2.5h

	7	Analysis		2.5h		2.5h
	8	Conclusions and recommendations		2.5h		2.5h

Course	Schedule code SEM6020303	Course title Advanced Seminar II		
Name of Instructor	Chuang, Hongwei			Credits 2
Instructor's contact information	Office#	Office Hours by appointment	E-mail	
Class Schedule Day / Period	unfixed			

Course Description	This course is mainly to help students to find out research questions, conduct the research agenda, and write English academic reports.				
Learning Objectives & Goals	The course will last one year until students finish their thesis/research reports.				
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses					
Delivery Methods	Generally, the seminar will be conducted as an individual consultation based on each person's topic and progress. However, that can be joint seminars with all students.				
Assessment	40% Participation 60% Final report				
Prerequisites					
Method of feedback from instructor to students for exams/papers	Assigned reading and research discussions.				
Textbook(s)	Required: Reference Books / Journal Articles: a)Title: Research Methodology - Contemporary Practices: Guidelines for Academic Researchers, b)Edition: , c)Author: Habib, Mamun, d)Publisher: Cambridge Scholars Publisher, e)Year: 2014, f)ISBN: 9781443864619				
Note on Textbooks and Reference Books	Reading materials/references will be delivered individually according to each student's research question.				
Class Outline	Class	Topic	Required preparation /homework		Required post-study
	1	Part I: Introduction to research		h	Read 1.1 What is research? 1h
	2	Part I:		h	Read 1.2 1h

	Introduction to research			Data, information and research findings	
3	Part I: Introduction to research		h	Read 1.3 Types of research	1h
4	Part I: Introduction to research		h	Read 1.4 Categorization of research papers	1h
5	Part I: Introduction to research		h	Read 1.5 Significance of research	1h
6	Part I: Introduction to research		h	Read 1.6 Scientific method of research	1h
7	Part II: Research steps		h	Read 2.1 Formulating the problem	1h
8	Part II: Research steps		h	Read 2.2 Research Design	1h
9	Part II: Research steps		h	Read 2.3 Data collection	1h
10	Part II: Research steps		h	Read 2.4 Data processing	1h
11	Part II: Research steps		h	Read 2.5 Finalizing the research draft	1h
12	Part III: Academic project writing		h	Read 3.1 Research proposal	1h
13	Part III: Academic project writing		h	Read 3.2 Research project writing	1h

Instructor's contact information	Office#	Office Hours Wen-Fri 10.00-18.00	E-mail
Class Schedule Day / Period	unfixed		

Course Description	Social science analysis is an essential skill for decision-makers who want to contribute to society as a whole. In order to better understand societal behavior, scientists must apply theories and/or models through qualitative and quantitative studies. This course will guide students in launching their own research projects by teaching them proven methodologies and processes.		
Learning Objectives & Goals	Define the problem by formulating research questions and identifying potential managerial implications. Write the research report according to the standard structure of a research paper. Conduct a literature review, collect and analyze data, and present the results in an academic style.		
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	RA1:Apply multidisciplinary approach in policy analysis and evaluation MF1: Able to demonstrate understanding of Management Knowledge		
Delivery Methods	Students attend a weekly seminar, usually held in the evening, to discuss their progress. They use Google Docs in Google Drive to track their work.		
Assessment	It is based on the quality of the research and writing activities.		
Prerequisites	None		
Method of feedback from instructor to students for exams/papers	During the seminar and personal follow-up.		
Textbook(s)	Required: Reference Books / Journal Articles:		
Note on Textbooks and Reference Books	The instructor will share readings and videos related to the various topics. Some of these resources will be personalized based on the methodology used, whether qualitative (e.g., thematic analysis and coding) or quantitative (e.g., PLS-SEM - partial least squares structural equation modeling).

Course Description	The research seminar I aims to clarify the basic knowledge on research, including what research is, what academic writing consists of, what plagiarism is, what is the common sense language and research terms. At a later stage of term, personalization of research project of each will be customized during the research seminar in one-to-one base. Some of the activities during each individual research meetings, including but not limited to, literature review and search methodology, data source setting, research design consistency, advices on theoretical framework setting and refinement, research method refinement, interview protocol and semi-structured question design, questionnaire definition, etc. depending on the nature of research project of each student.		
Learning Objectives & Goals			
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses			
Delivery Methods	Punctual specific research seminar with lecture format, with frequent use of individual research meeting for tutorial and research progress advices and monitoring.		
Assessment	A final research paper is requested to delivery by the end of term, simulating the final delivered research report or thesis. The content includes research title, research question, objective, theoretical framework or literature review, methodology and preliminary findings. For case report or other research report types, more structure flexibility is allowed, but a preliminary draft version is also required.		
Prerequisites	Advanced Seminar I.		
Method of feedback from instructor to students for exams/papers			
Textbook(s)	Required: a)Title: How to design and develop a Business Research Project, b)Edition: ,		

	c)Author: Bart Cambre, Karen Elliott, Janick Fierens, d)Publisher: Edward Elgar, e)Year: 2023, f)ISBN: Reference Books / Journal Articles:

Class Schedule Day / Period	unfixed		

Course Description	<p>As part of their degree requirements, IUJ students undertake an independent research project. This seminar series is designed to support that journey through personalized 1-on-1 supervision and tailored training. Whether you are refining your topic or finalizing your analysis, this series adapts to your needs, skill level, and research direction.</p> <p>We'll dive into the core tools and methods of marketing research—empowering you to bring your topic to life with rigor and clarity. From problem definition to data analysis, you'll gain hands-on experience in each step of the research process. Our sessions also explore how marketing research translates into real-world decisions—bridging the gap between theory and practice. By the end, you'll not only present your findings but also explain their implications for both scholarship and business.</p>
Learning Objectives & Goals	<p>This seminar series equips students with the tools and guidance to independently conduct a complete marketing research project. You will learn how to:</p> <ol style="list-style-type: none"> 1. Identify and define a quantitative marketing research problem. 2. Understand and use different types of variables in marketing models 3. Formulate clear, testable hypotheses 4. Select or adapt validated measurement instruments 5. Design surveys and experiments that are methodologically sound 6. Collect and analyze data using SPSS or PSPP 7. Write up results in APA format, consistent with disciplinary expectations 8. Communicate the theoretical and practical value of your findings—and openly discuss limitations

<p>Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses</p>	
<p>Delivery Methods</p>	<p>Weekly one-on-one meetings may be held either in person or over Zoom.</p> <p>Important: This course is student-driven. You are responsible for managing your research progress and reaching out when you need help. I am always available for support and happy to meet more than once a week—but it’s your initiative that moves the project forward. My role as research supervisor does not include chasing you to complete tasks.</p>
<p>Assessment</p>	<p>Your grade is based entirely on your progress toward producing a high-quality research paper. While publication is not required, the goal is to reach a level where it could be submitted to a peer-reviewed journal. 100% of your grade is based on your progress toward producing a publishable paper.</p>
<p>Prerequisites</p>	<p>There are no formal prerequisites.</p> <p>However, students are strongly encouraged to take (or plan to take) Consumer Behavior and Marketing Research. These courses will give you the theoretical background and technical skills needed to generate strong research ideas and carry out your project with confidence.</p>
<p>Method of feedback from instructor to students for exams/papers</p>	<p>Feedback is continuous, personalized, and delivered in multiple formats:</p> <p>Informal: Verbal feedback during meetings and consultations</p> <p>Formal: Written comments on drafts and research plans</p> <p>Direct: Individual guidance via consultations or email</p> <p>Indirect: Occasional group sessions to share progress and learn from each other</p> <p>Note: This is your project. You are expected to manage your own time and seek help when needed. Support is always available—but it must be requested.</p>
<p>Textbook(s)</p>	<p>Required:</p> <p>Reference Books / Journal Articles:</p>
<p>Note on Textbooks and Reference Books</p>	<p>There are no required books or reference books. However, we have purchased copies of the following, which are likely to be very helpful to you in your research.</p> <p>Textbook 1 Title: SPSS Statistics: A Practical Guide Authors: Allen, Bennett & Heritage (2018)</p>

Note: Available at the IUJ MLIC Library—no purchase required.

Textbook 2
 Title: Marketing Scales Handbook
 Author: Bruner (2022)
 Note: Available at the IUJ MLIC Library—no purchase required.

Delivery Methods	Research Seminar will be conducted through individual supervision and advice to students' Research Report drafting. During Fall and Winter terms, students are expected to make presentations of their research progress 1~2 times.					
Assessment	Assessment will be made based on the efforts toward drafting Research Report by each student.					
Prerequisites						
Method of feedback from instructor to students for exams/papers	Feedback will be provided to students individually through face-to-face discussions as well as comments by mail.					
Textbook(s)	Required: Reference Books / Journal Articles:

(冬学期科目)

2025年5月1日現在
国際大学

International University of Japan
 Graduate School of International Management (Master's Program)
 2026 Winter Term

Course	Schedule code ACT3020401	Course title Financial Statement and Business Analysis	
Name of Instructor	Lee, Hyunkoo		Credits 2
Instructor's contact information	Office#	Office Hours Wed 3:00-4:00 PM	E-mail
Class Schedule Day / Period	Wed.2~3		

Course Description	This course introduces standard frameworks of financial statement analysis. The primary approach is fundamental analysis. Various techniques will be introduced to extract information from financial statements, analyze them, build scenarios, and determine corporate value. Participants who would like to work as financial analysts or financial managers will get the most benefits. The course will also cover various situations through actual financial statements, cases, and current issues.
Learning Objectives & Goals	<p>Upon completion of this course, students will be able to:</p> <p>(1) learn how to extract information from financial statements, analyze it, and build a scenario.</p> <p>(2) discuss relevant issues competently and present their viewpoints in a group meeting and a class.</p> <p>(3) write an industry-level equity analysis report.</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>This course fulfills the following MEXT learning objectives:</p> <p>MF5 (MBA, JGDP): Able to demonstrate understanding of Accounting Knowledge</p> <p>MD1 (IMBA): Able to apply the concepts of strategic management, recognizing internal and external strategic contexts</p> <p>MD2 (IMBA): Able to demonstrate the ability to gather and interpret data</p> <p>MP1 (MBA): Able to demonstrate ability to formulate/define issues</p> <p>MP2 (MBA): Able to demonstrate ability to analyze and compute</p> <p>MP3 (MBA): Able to demonstrate ability to interpret concepts and data</p>
Delivery Methods	The course will start with a short lecture to introduce the core framework. The rest of the classes will be operated as discussions in workshop style. It relies heavily on participants' pre-study of reading materials. Participants are expected to perform all reading assignments and exercises prior to attending a class. Students are required to attend two lectures each week. In every class meeting, students are expected to participate in a quiz, discussion, and problem solving.
Assessment	<p>Grades are based on total points earned on quizzes, an examination, group assignments, and participation.</p> <p>Learning Objectives</p> <p>Assessment methods (1) (2) (3) Overall</p> <p>Class Discussion 19% 7%</p> <p>Group Presentation 27% 10%</p>

	Quizzes 17% 8% Final Exam 83% 40% Case Reports 54% 20% Final Report 100% 15% Weight on Final Grade 48% 37% 15% 100%					
Prerequisites	The course is mainly for 2nd-year MBA or IMBA students. I assume you have a reasonable understanding of financial accounting, corporate finance, and strategy. It would be helpful to review the accounting topics mentioned in this course while you take this course.					
Method of feedback from instructor to students for exams/papers						
Textbook(s)	Required: Reference Books / Journal Articles: a) Title: Equity Valuation and Analysis, b) Edition: 4, c) Author: Lundholm and Sloan, d) Publisher: Createspace Independent Pub, e) Year: 2017, f) ISBN: 978-1548118921 a) Title: Schweser Notes for the CFA exam 2018 level II book 3: Equity, b) Edition: 1, c) Author: , d) Publisher: Kaplan, e) Year: 2017, f) ISBN: 978-1475459807 a) Title: Value: the Four Cornerstones of Corporate Finance, b) Edition: 1, c) Author: Koller, Dobbs, and Huyett, d) Publisher: John Wiley and Sons, e) Year: 2011, f) ISBN: 978-0470424605 a) Title: , b) Edition: , c) Author: , d) Publisher: , e) Year: , f) ISBN:

International University of Japan
 Graduate School of International Management (Master's Program)
 2026 Winter Term

Course	Schedule code FIN2080401	Course title Sustainable Finance & Investment	
Name of Instructor	Chow, Yuen Leng		Credits 2
Instructor's contact information	Office#	Office Hours By appointment	E-mail
Class Schedule Day / Period	Tue.2~3		

Course Description	<p><Course Context></p> <p>Students will be given an overview of the financial markets and the new investment trends of sustainable finance. This course focuses on three core components: environment, social, and governance. Students will be provided with an understanding of the financial instruments applied fund green projects, sustainability-related projects, and social projects. The types of investment approaches applied to private and public markets will also be covered. At the end of the course, students would be guided to understand the importance of good corporate governance to firm value.</p> <p><Career Relevance></p> <p>Extreme weather patterns have increased awareness of climate change and its impact on businesses. This course provides students an overview of how ESG considerations are applied in the financial markets by both providers and users of funds. This course will be helpful for students who wish to gain an understanding of current investment tools that support green projects, sustainable projects, and social projects. This course would add-on to the knowledge base of students wishing to pursue careers in investment, asset management, and social entrepreneurship; especially those who wish to pursue careers related to sustainability.</p>
Learning Objectives & Goals	<p><Course Description & Learning Objectives></p> <p>This course aims to provide students with an understanding of the linkages between global capital markets and funding environment, social and governance (ESG) related projects. Sustainable finance plays a key role in mobilizing capital towards a greener agenda while taking into account social and governance issues. In recent years, the financial sector is increasingly prioritizing environmental, social, and governance (ESG) issues in investment decisions. The key here is to provide an overview to students to gain basic knowledge on how to tap the financial instruments or cater to investing strategies which support ESG-related projects.</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)	<p>This course contributes to two of the four learning goals: (1) Functional Business Knowledge; and (2) Strategic Decision Making</p> <p>At the end of the course, students should be:</p> <p>MF2: Able to demonstrate understanding of finance knowledge</p> <p>MD1: Able to apply the concepts of strategic management, recognizing internal and external strategic contexts</p>

N/A for language courses						
Delivery Methods	This course will consist of lectures, discussions, assignments, quizzes, and assigned readings. Students are expected to read text chapters before class and actively participate in discussions.					
Assessment	Assessment Final Exam (Individual) MF2-25%; MD1-25% Quiz MF2-5%; MD1-5% Case Analysis MF2-20%; MD1-20%					
Prerequisites	Reading widely on current issues faced in the relevant sector would be necessary.					
Method of feedback from instructor to students for exams/papers	Online quiz – results known immediately after completion Case Analysis – feedback given during class presentation					
Textbook(s)	Required: a)Title: Principles of sustainable finance, b)Edition: 8, c)Author: Dirk Schoenmaker and Willem Schramde,Schoenmaker, Dirk,Schrama, d)Publisher: Oxford University Press, e)Year: 2019,f)ISBN: 9780198869818 Reference Books / Journal Articles:

International University of Japan
 Graduate School of International Management (Master's Program)
 2026 Winter Term

Course	Schedule code FIN3020401	Course title Finance and Technology	
Name of Instructor	Chow, Yuen Leng		Credits 2
Instructor's contact information	Office#	Office Hours By appointment	E-mail
Class Schedule Day / Period	Mon.2~3		

Course Description	<p><Course Context></p> <p>In this course, you will be given an overview of finance and technology (fintech). What is fintech, when did it originate, what are the major trends going forward. What are the major enablers to facilitate fintech applications. These are some of the major questions explored and discussed. The course will also provide an introduction to digital currencies and blockchain.</p> <p><Career Relevance></p> <p>Fintech is increasingly changing the way for payments and investing. This course will help you realize the role fintech plays in facilitating transactions among businesses and consumers, and in providing an entrepreneurial solution to investments. You will gain an understanding of the complex structure of payment methods and financial regulations, and employ strategies in developing a fintech strategy for your business.</p>
Learning Objectives & Goals	<p>Course Description & Learning Objectives></p> <p>The business environment is rapidly incorporating the use of technology to improve operations, efficiency, improve customer experience, and provide innovative solutions. Increasingly, technology advances could also provide a more equitable social environment by providing much needed financial services to the underserved population. The objective of this course is to provide participants with an overview of recent fintech applications and their impact on the business and social fields.</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>This course contributes to two of the four learning goals: (1) Functional Business Knowledge; and (2) Strategic Decision Making</p> <p>At the end of the course, students should be:</p> <p>MF2: Able to demonstrate understanding of finance knowledge MF6: Able to demonstrate understanding of data analysis and digital technology MD3: Able to demonstrate ability to make a strategic decision under pressure</p> <p>The learning goals for the DXP course are:</p> <p>MS4: Able to understand the implication of technologies to social responsibilities in the creation of social and business values MT1: Able to understand the latest technology trend MT2: Able to employ suitable technology element to create a business or add competitive value to an organization</p>

Delivery Methods	This course will consist of lectures, discussions, quizzes, and assigned readings. Students are expected to read text chapters before class and actively participate in discussions.					
Assessment	Final Exam: [MF2/MT2-20%]; [MF6/MT1-30%]; [MD1/MS4-10%] Quiz: MF2/MT1-10% Case Analysis: MF2/MT2-10%; MF6/MT1-10%; MD1/MS4-10%					
Prerequisites	Reading widely on current issues in the sector would be necessary.

International University of Japan
 Graduate School of International Management (Master's Program)
 2026 Winter Term

Course	Schedule code ITC2010401	Course title Data Management and Modelling	
Name of Instructor	Aung, Zaw Zaw		Credits 2
Instructor's contact information	Office#	Office Hours Monday - Friday 13:00-15:00	E-mail
Class Schedule Day / Period	Mon.4~5		

Course Description	<p>This course introduces students to the subject of Data Management and Data Modeling, the methods and computational procedures that are helpful in solving management problems in Finance, P.O.M., Accounting, M.I.S., Marketing, Operations Management, etc. Emphasis is placed on models and their solutions. It discusses how the quantitative models can be used as tools for decision makings in various business situations. It gives students a good foundation in basic problem solving as a preparation for upper-level quantitative courses such as Big Data Analytics. The course will make full use of computer tools (Excel, Add ins, and Macros)</p>		
Learning Objectives & Goals	<p>Students shall learn how to apply mathematical models in various business situation in support of managerial decision making in an enterprise, using some of the most commonly used modeling approaches and principles. Upon completion, the student should be able to:</p> <ul style="list-style-type: none"> • Describe the business problems in mathematical models • Analyze /develop some common models analytically • Explain the modeling process for different business problems. • Interpret model results in the context of the business situation and explain in plain language • Compare and contrast different decision structuring techniques • Evaluate models applying good modeling and validation techniques 		
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>MBA/IMBA</p> <p>Functional Business Knowledge MF6: Able to demonstrate understanding of Data Analysis and Digital Technology</p> <p>Strategic Decision Making MD2: Able to demonstrate ability to gather and interpret data</p> <p>DXP</p> <p>Technology and Digital Transformation MT1 - Able to understand the latest technology trend</p>		
Delivery Methods	<p>The classes include lecture, pre-class assignments, take home exercises, quizzes and practical sessions at PC Lab.</p>		

Assessment	<p>Class Participation: 20% Homework and Quiz: 40% Final Exam: 40%</p> <p>(Final Exam will be in Week 11) (Class Participation includes attendance, question and discussions, helping classmates, etc.)</p> <p>Guidance on use of Generative AI: Strictly follow IUJ Guide and GSIM Policy.</p> <p>- GSIM GENERAL POLICY ON USAGE OF GENERATIVE AI (G-AI) - IUJ GUIDANCE ON GENERATIVE AI</p> <p>Above two document can be found on GSIM Info webpage at the link below. https://www.iuj.ac.jp/im-info/</p>					
Prerequisites	Basic knowledge of Excel and Statistics is required.					
Method of feedback from instructor to students for exams/papers	Homework and Final Exam score will be released through Google Classroom. Quizzes earn points will be released immediately after the quiz.					
Textbook(s)	<p>Required:</p> <p>Reference Books / Journal Articles:</p> <p>a)Title: Data Smart: Using Data Science to Transform Information into Insight, b)Edition: 2, c)Author: JORDAN GOLDMEIER, d)Publisher: John Wiley & Sons., e)Year: 2023, f)ISBN: 978-1119931386</p> <p>a)Title: Spreadsheet modeling and decision analysis : a practical introduction to business analytics, b)Edition: 8, c)Author: Cliff T. Ragsdale,Ragsdale, Cliff T.,, d)Publisher: Cengage Learning, e)Year: 2018, f)ISBN: 978-1305947412</p> <p>a)Title: Business intelligence, analytics, and data science : a managerial perspective, b)Edition: , c)Author: Ramesh Sharda, Dursun Delen, Efraim Turban ; with contributions, d)Publisher: Pearson, e)Year: 2018, f)ISBN: 978-0134633282</p>					
Note on Textbooks and Reference Books	More Reference materials will be shared via Course Material folder.					
Class Outline	Class	Topic	Required preparation /homework		Required post-study	
	1	Week 1. Introduction to Management Science - Managing data with Excel tool, What-if Analysis, - Extracting,	Reading: Ref 1: Chapter 1	3h	homework exercise	2h

	Manipulation and Summarizing Data(Excel formula, lookup table and Pivot Table) - Business Scenarios Analysis and Decision Analysis				
2	Week 2. Large scale Data Processing with Power Query and Excel Data Model (Data Cleaning, Transforming and Visualizing with Power Pivot)	Preparation for in-classroom quiz	3h	homework exercise	2h
3	Week 3. Optimization Linear Programming Modeling	Reading: Ref 2: Chapter 14	4h	homework exercise	2h
4	Week 4. Optimization and Sensitivity Analysis	Reading: Ref 1: Chapter 4 ref 2: Chapter 4	4h	homework exercise	2h
5	Week 5. Discrete Modeling (Yes/No type Decision making) ILP and Binary Variables	Reading: Ref 2: Chapter 6	4h	homework exercise	2h

International University of Japan
 Graduate School of International Management (Master's Program)
 2026 Winter Term

Course	Schedule code ITC2020401	Course title Big Data Analytics	
Name of Instructor	Aung, Zaw Zaw		Credits 2
Instructor's contact information	Office#	Office Hours Monday - Friday 13:00-15:00	E-mail
Class Schedule Day / Period	Thu.2~3		

Course Description	<p>This course is for those new to data science and interested in understanding why the Big Data Era has come to be. This course introduces you data-analytic thinking. You are to become conversant with the terminology and the core concepts behind big data problems, applications, and systems. It is to help you start thinking about how Big Data might be useful in your business or career. In this course, you will experience various data genres and management tools appropriate for each. You will be able to describe the reasons behind the evolving plethora of new big data platforms from the perspective of big data management systems and analytical tools linking business problems and data science solutions. It gives you a broad overview of the field of data analytics so that you can learn new ways to model, store, retrieve and analyze complex data. You will learn predictive modeling approach to identify informative attributes by supervised segmentation.</p>
Learning Objectives & Goals	<p>At the end of the course, you will be able to:</p> <ul style="list-style-type: none"> - Recognize different data elements in your own work and in everyday life problems - Explain why your team needs to design a Big Data Infrastructure Plan and Information System Design - Select a data model to suit the characteristics of your data - Retrieve data from example database and big data management systems - Process patterns needed to utilize in large-scale analytical applications - Design an approach to leverage data using the steps in the machine learning process
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p><Functional Business Knowledge> MBA students from different backgrounds will learn fundamental business knowledge so as to become a successful business managers. MF6 Able to demonstrate understanding of Data Analysis and Digital Technology</p> <p><Technology and Digital Transformation> DXP students will be able to apply the latest technology element to creating a new business or adding competitive value to an organization through digital transformation.</p> <p>MT1 Able to understand the latest technology trend MT2 Able to employ suitable technology element to create a business or add competitive value to an organization MT3 Able to implement digital transformation while taking into account organizational and environmental implications</p>

Delivery Methods	The classes include lecture, case discussions, lab sessions and big data project group presentation.
Assessment	<p>Students are required to read assigned textbook chapters and reference materials well every week before coming to the class. Students are required to actively participate in-class discussions, off-class group meetings and group presentations.</p> <p>Class Participation 40% (Pre-class Reading Assignment, Attendance, Class Discussion, Lab Session, Take-home assignments)</p> <p>Big Data Project (Group Presentation and Report): 30%</p> <p>Individual Essay 30%</p> <p>Notes</p> <p>i. Peer Evaluation scored will be weighted on Group Project and Group Presentation.</p> <p>ii. 4-page individual report dues at the end of the course.</p> <p>Guidance on use of Generative AI: Strictly follow IUJ Guide and GSIM Policy.</p> <p>- GSIM GENERAL POLICY ON USAGE OF GENERATIVE AI (G-AI) - IUJ GUIDANCE ON GENERATIVE AI</p> <p>Above two document can be found on GSIM Info webpage at the link below. https://www.iuj.ac.jp/im-info/</p>
Prerequisites	Basic knowledge of R and Statistics is desirable. But not strict prerequisites.
Method of feedback from instructor to students for exams/papers	Scores and feedback on assignments shall be released via Google Classroom and also in the following week class time.
Textbook(s)	<p>Required:</p> <p>a)Title: Data science for business, b)Edition: 1, c)Author: Foster Provost and Tom Fawcett, Provost, Foster, Fawcett, Tom., d)Publisher: O'Reilly, e)Year: 2013, f)ISBN: 9781449361327</p> <p>a)Title: Practical Data Science with R, b)Edition: 2, c)Author: Nina Zumel and John Mount, d)Publisher: Manning, e)Year: 2019, f)ISBN: 978-1617295874</p> <p>Reference Books / Journal Articles:</p> <p>a)Title: Data Strategy: How to Profit from a World of Big Data, Analytics and Artificial Intelligence, b)Edition: 2, c)Author: Bernard Marr, d)Publisher: KogaPage, e)Year: 2021, f)ISBN: 9781398602588</p> <p>a)Title: Management decision-making, big data & analytics, b)Edition: 1, c)Author: Simone Gressel, David J. International University of Japan
 Graduate School of International Management (Master's Program)
 2026 Winter Term

Course	Schedule code ITC2070401	Course title Smart City	
Name of Instructor	Sakurai, Mihoko		Credits 2
Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	Fri.4~5		

Course Description	<p>This course will cover the topic “Smart City”. The definition of Smart City in this course is “a city that increases the pace at which it provides social, economic and environmental sustainability outcomes by using data information and modern technology” (ISO37122). This ISO definition says “responding to societal challenges by delivering better services and quality of life” is fundamental. The definition itself is such a practical, so this course is designed to be practice-oriented.</p> <p>The course will be provided by a mixture of lectures, case discussions and group exercises. Group exercises contain reading assignment. A whole course is divided into two parts, social and technical parts of smart city, providing some concepts and practical cases of Japanese Smart City initiatives. Concepts include sustainability, green information systems, decentralized identification and digital twin.</p> <p>Students will plan for smart city services in Minamiuonuma City through group exercises. We will use a tool called “Miro” for identifying cause and result relationships (causal diagram) in real living environments and designing new digital services in Minamiuonuma City based on that causal diagram. Ideas will be presented in the last session of this course and feedback will be given by an instructor and other practitioners.</p>
Learning Objectives & Goals	<ol style="list-style-type: none"> 1.To get an overview of the concept of Smart City 2.To understand social and technical perspective of Smart City initiatives 3.To acquire practical methods for causal diagram 4.To plan new digital services in Minamiuonuma City 5.To discuss how smart city can solve societal challenge using Japanese cases
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>For MBA</p> <p>MS1: Able to clearly identify the central problem/issue to demonstrate understanding of socially responsible leadership concepts and practices</p> <p>MP1: Able to demonstrate ability to formulate/define issues</p> <p>MP3: Able to demonstrate ability to interpret concepts and data</p> <p>MD2: Able to demonstrate ability to gather and interpret data</p> <p>MG1: Able to demonstrate understanding of carbon neutrality, circular economy, and bio-diversity</p> <p>MG2: Able to demonstrate understanding of energy transition</p> <p>For DXP</p> <p>MT1:Able to understand the latest technology trend</p> <p>MT2:Able to employ suitable technology element to create a business or add competitive value to an organization</p>

	MT3:Able to implement digital transformation while taking into account organizational and environmental implications
Delivery Methods	The classes include lecture, case discussions and group exercises.
Assessment	<p>Learning Objectives</p> <p>Assessment methods (1) (2) (3) (4) (5)</p> <p>Class Participation 30% 30% 50%</p> <p>Group exercise/ Presentation 40% 30% 100% 50%</p> <p>Midterm report 30% 40%</p> <p>Final Report 50%</p> <p>Any other methods</p> <p>- Case discussion 50%</p> <p>Weight on Final Grade 10% 10% 20% 40% 20%</p>
Prerequisites	N/A
Method of feedback from instructor to students for exams/papers	Feedback comments will be provided through group exercises/discussions every week and final presentations.

2026 Winter Term

Course	Schedule code ITC2080	Course title Management for Digital Transformation	
Name of Instructor	Sakurai, Mihoko		Credits 2
Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	Wednesday 14:40-16:10, 16:20-17:50		

Course Description	<p>This course provides essential frameworks and associated keywords that help to understand digital transformation (DX). The course aims to investigate the following three core topics; DX process, DX structure and DX culture within an organization. Discussions around these themes are based on the notion of “sociotechnical system” which regards a work system as correlative interacting systems of the social system and the technical system. Also, in this course, we consider an organization as a capital creation system.</p> <p>Three core topics in this course consist of: process and innovation management, value chain, transformation orchestra, decision making model (waterfall/agile), platform strategy and data management. Various examples are introduced in order to understand how such frameworks are applied to practice. Students will facilitate a case discussion every two sessions. The case is associated with the topic we learned in this course. This course enables students to understand how organizational transformation is escalated through digital technologies and its management.</p>
Learning Objectives & Goals	<ul style="list-style-type: none"> ✓ To get an overview of the concept of digital transformation ✓ To understand how digital transformation is enhanced and implemented in the Japanese context ✓ To understand a sociotechnical system perspective ✓ To discuss essential concepts and structure of DX practices in organizations using various Japanese cases

			2.5h
Topic		Short case discussion and team formation - Discuss the case of Fuji film vs. Kodak - Discuss what strategical difference between them and what consequences were?	
Required preparation /homework		Read the case and be ready for group discussion You must prepare a reading material prior to the class and be ready to read it during the class. Readings: (available at online library) The cases of Fujifilm and Kodak (pp.76-80) - Chapter 3. Achieving Balance with Innovation Streams from “ <i>Lead and Disrupt: How to Solve the Innovator's Dilemma.</i> ”	
2			1h

	Required post-study	Reflect the class discussion and essential concepts learned in the previous class	1h
3	Topic	DX process - Discuss steps toward DX implementation - Explore new business model and process enabling transformation	
	Required preparation /homework	Read referenced book chapters to prepare for class discussion Readings: Chapter 1. The Transformation Dilemma and Chapter 2. Understanding Guiding Objectives from “ <i>Orchestrating Transformation</i> ”	1.5h
	Required post-study	Reflect the essential concepts for DX	1h
4	Topic	Case discussion 1: All Nippon Airways (ANA) - Explore DX strategy in the airline industry - Discuss organizational structure change within ANA and what foreseeing after COVID-19	
	Required preparation /homework	Read the case and be ready for group discussion Readings: (the material will be provided) Digital transformations in the ANA Group: Toward the fusion of human resources and the digital world	1.5h
	Required post-study	Reflect the class discussion and essential concepts learned in the previous class	1h
5	Topic	DX structure - Explore the organizational structure (rule and resource) based on structuration theory - Discuss differences of IT-enabled transformation and digital transformation	
	Required preparation /homework	Read referenced book chapters and paper to prepare for class discussion Readings: Chapter 4. The Transformation Orchestra and Chapter 5. Orchestration Competencies from “ <i>Orchestrating Transformation</i> ” Vial, G. (2019). Understanding digital transformation: A review and a research agenda. <i>The Journal of Strategic Information Systems</i> , 28(2), 118-144.	2h
	Required post-study	Reflect the essential concepts for DX	1h

	6	Topic	Case discussion 2: Panasonic - Explore business model change and its challenge for Panasonic - Discuss how a value creation system works with information technology implementation	
		Required preparation /homework	Read the case and be ready for group discussion Readings: (available at online library) Sakurai, M., and Kokuryo, J. (2018). Fujisawa Sustainable Smart Town: Panasonic's Challenge in Building a Sustainable Society. Communications of the Association for Information Systems, 42, 19.	1.5h
		Required post-study	Reflect the class discussion and essential concepts learned in the previous class	1h
	7	Topic	Case discussion 3: Miyaji-Buta - Explore SMEs business model in Japanese agriculture – livestock industry - Discuss how the existing model was changed with digital technology and entrepreneurialism	
		Required preparation /homework	Read the case and be ready for group discussion Readings: (the material will be provided) Miyaji Buta (Miyaji Pork): Food Branding Strategies	1.5h
		Required post-study	Reflect the class discussion and essential concepts learned in the previous class	1h
	8	Topic	DX culture: Guest lecture from CyberAgent, Inc. (tentative) - Discuss cultural aspects of an organization enabling DX - Explore a desirable ecosystem for various stakeholders in digital implementation	
		Required preparation /homework	Read referenced book chapters to prepare for class discussion Readings: Chapter 11. Cultivating a Digital Environment, Chapter 12. Organizing for Agility, and Chapter 13. Strength, Balance, Courage and Common Sense: Becoming Intentionally Collaborative from “ <i>The Technology Fallacy</i> ”	1.5h
		Required post-study	Reflect the talk of a guest speaker and connect to what learned in the previous classes	1h
	9	Topic	Mid-term class discussion-1 - Use the business model canvas and discuss DX strategies of different industries	
		Required	Prepare mid-term assignment	3h

	preparation /homework		
	Required post-study	Reflect the class discussion	1h
10	Topic	Mid-term class discussion-2 - Discuss a final case report and provide feedback	
	Required preparation /homework	Prepare an initial draft or structure of a final case report	3h
	Required post-study	Reflect feedback and amend a report if necessary	3h
11	Topic	Ethics, revenue model, platform strategy - Explore open platform strategies in digital businesses - Discuss the pros and cons of openness /the crowd	
	Required preparation /homework	N/A	0h
	Required post-study	Reflect the essential concepts for DX	1h
12	Topic	Case discussion 4: Weathernews - Discuss crowdsourcing, pricing, and quality control - Examine opportunities for digital online platforms	
	Required preparation /homework	Read the case and be ready for group discussion Readings: (the material should be purchased) HBS case: Weathernews	1.5h
	Required post-study	Reflect the class discussion and essential concepts learned in the previous class	1h
13	Topic	DX data management - Discuss data integration strategy - Explore the latest technology implementation in a digital industry	
	Required preparation /homework	N/A	0h
	Required post-study	Reflect the essential concepts for DX	1h
14	Topic	Case discussion 5: Recruit Japan - Investigate business model change enabled big data analysis - Understand how they employ data science to its business	

		Required preparation /homework	Read the case and be ready for group discussion Readings: (the material should be purchased) IMD case: Recruit Japan: Harnessing data to create value	1.5h	
		Required post-study	Reflect the class discussion and essential concepts learned in the previous class	1h	
	15	Topic	Case discussion 6: Nestre Japan - Explore how to tackle social problems through digital use - Discover a sociotechnical system and its role in DX		
		Required preparation /homework	Read the case and be ready for group discussion Readings: (the material should be purchased) IMD case: Nestre: developing a digital nutrition platform for Japan	1.5h	
		Required post-study	Reflect the essential concepts for DX	1h	
	16	Topic	Wrap up and course feedback - Student will discuss several questions for the final case report - The report should describe digital transformation practice on particular company or organization (not necessarily Japanese case).		
		Required preparation /homework	Prepare for questions assigned by a lecturer	2h	
		Required post-study	Polish and finish the final case report	5h

International University of Japan
 Graduate School of International Management (Master's Program)
 2026 Winter Term

Course	Schedule code JDP2020401	Course title Small to Medium-sized Firms in Japan	
Name of Instructor	Funabashi, Gaku	Credits 2	
Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	Mon.2~3		

Course Description	<p>The objective of this course is to introduce how small to medium-sized firms (or often called SMEs: small and medium enterprises) have developed in Japan. Large multi-national corporations (MNCs) are usually known as major players in the Japanese industries. However, SMEs also take essential roles behind performances by MNCs. In fact, factors for evolving into MNCs are originated in their actions when they were still small or medium-sized. This course discusses the development of SME businesses under changing environment of the Japanese economy.</p> <p>Dividing the history of modern economic development in Japan into five eras, namely eras of pre-World War II, reconstruction from the war, rapid economic growth, moderate economic growth and slow economic growth, lectures and discussions of this course focus on the following three points. First, SME development is the result of operations by each firm, thus, we see actual cases of typical SMEs established in each era. Second, we discuss policies supporting SMEs in Japan. In general, SMEs face various challenges, because their management basis is weak compared to that of large enterprises. Support policy for solving SME problems by the government is important. The policy in this course includes cross-sectoral SME policy as well as policies for specific industries and regions targeting SMEs under the name of industrial policy or regional economic policy. Third, based on the understanding of SMEs and policies in Japan, we discuss the internal and external environment surrounding SMEs in low- and middle-income countries. The third point is extended further as a group work with presentation.</p> <p>In addition, visit to actual SMEs in Niigata prefecture will be organized (most probably during the weekend).</p>
Learning Objectives & Goals	<p>This course contributes to the achievement of 5 objectives of 2 learning goals mentioned mentioned in Contribution to the Diploma Policy. For the purpose of accomplishment of these objectives, this course covers issues related to small and medium enterprise development in Japan from the views of both support policy and management of enterprises under the changing economic and social environment.</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>MF1 (for 2-year MBA, JGDP): Able to demonstrate understanding of Management Knowledge</p> <p>MJ1 (for JGDP): Able to demonstrate understanding of Japanese industries, society, and business environments.</p> <p>MJ2 (for JGDP): Able to demonstrate understanding of Japanese employment practice</p> <p>MJ3 (for JGDP): Able to demonstrate understanding of Japanese corporate governance and management philosophy</p> <p>MJ4 (for JGDP): Able to demonstrate understanding of Japanese society and</p>

	business environments					
Delivery Methods	Classroom and online lectures and discussions (hybrid class). But students are required to participate at a classroom except for the special cases.					
Assessment	Final grades will be based on individual Weekly Assignments (15% x 2 assignments), Group Presentation (15%), Final Report (40%) and Class participation including discussions (15%). It is not prohibited to use generative AI. But students need to add more consideration to meet requirements of assignments.					
Prerequisites	None					
Method of feedback from instructor to students for exams/papers	Feedback will be sent to students individually.					
Textbook(s)	Required: Reference Books / Journal Articles:					
Note on Textbooks and Reference Books	Reference Books / Journal Articles: Reading journals are not necessarily related to Japan but selected for better understanding of SME development in students' own countries. <Week 1> Ayyagari, M., Beck, T., & Demirguc-Kunt, A. (2007) "Small and medium enterprises across the globe" Small business economics, 29(4) <Week 2> Hudson, M., Smart, A. & Bourne, M.  2026 Winter Term

Course	Schedule code JDP3010401	Course title Japanese Style Management and Corporate Governance	
Name of Instructor	Lee, Hyunkoo	Credits 2	
Instructor's contact information	Office#	Office Hours Wed 3:00-4:00 PM	E-mail
Class Schedule Day / Period	Tue.4~5		

Course Description	<p>This course will introduce Japanese-style management. It was established amid social chaos after World War II and has evolved into a unique management system that is distinct from a typical textbook model. This new system eventually led Japanese companies to rapid growth and worldwide success. While a business theory may envision universal business principles, an actual management system is constrained by various business environments. It is natural that a management system differs depending on a country where it is adopted. Japanese management system is also deeply rooted in its national culture and history. The creation of Japanese management system was an adaptation process of business theory to its unique environments. Its success was not accidental, but based on sound economic rationality. That's why it is interesting to examine why Japanese style management worked in Japan. This course will review Japanese style management's historical background and economic rationality behind it.</p> <p>Japanese management system is also intertwined with a unique corporate governance system which emphasizes the welfare of employees and long-term relationships. This system is contrasted with Anglo-Saxon corporate governance system which focuses on the sovereignty of shareholders. This course will examine the impact of Japanese corporate governance system on various management practices in Japanese companies.</p> <p>Japanese management style is still evolving as Japan's business environments are changing. There have been heated discussions on the effectiveness of Japanese style management in the rapidly changing world. This course will try to explore future directions and the role of Japanese style management.</p>
Learning Objectives & Goals	<p>This course contributes to the achievement of AACSB Learning Goal (LG) 8-2 and 8-3 for JGDP students.</p> <p>Upon completion of this course, students will be able to:</p> <ol style="list-style-type: none"> (1) Demonstrate understanding of Japanese employment practice (LG8-2). (2) Demonstrate understanding of Japanese corporate governance and management philosophy (LG8-3).
Contribution to the Diploma Policy	<p>This course fulfills the following MEXT learning objectives:</p> <p>MM1 (MBA, IMBA, JGDP, MBA-GX) Able to demonstrate the sensitivity to</p>

<p>(knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses</p>	<p>different perspectives and opinions of those from different international backgrounds MM2 (MBA, IMBA, JGDP, MBA-GX) Able to identify and articulate common viewpoints among different and possibly conflicting opinions of those from different international backgrounds MF1 (MBA, JGDP, MBA-GX): Able to demonstrate understanding of Management Knowledge MD1 (IMBA): Able to apply the concepts of strategic management, recognizing internal and external strategic contexts MJ2 (JGDP): Able to demonstrate understanding of Japanese employment practice MJ3 (JGDP): Able to demonstrate understanding of Japanese corporate governance and management philosophy MJ4 (JGDP): Able to demonstrate understanding of Japanese society and business environments</p>
<p>Delivery Methods</p>	<p>Two weekly sessions. Lectures, quizzes, case discussions, and presentations in a workshop style. All students should be able to participate in discussion.</p> <p>To excel in this course, you have to be more active and lead you study for yourself. For each class session, you are expected to be prepared to discuss the required topic or assignment. We meet in the class to review key ideas and check your progress.</p>
<p>Assessment</p>	<p>The grade will be based on the following guideline:</p> <p>Learning Objectives</p> <p>Assessment methods (1) (2) (3) (4) Overall</p> <p>Class Discussion 50% 10%</p> <p>Group Presentation 50% 10%</p> <p>Individual Memo 15% 15% 10% 10%</p> <p>Quizzes 15% 6%</p> <p>Final Exam 85% 85% 25% 44%</p> <p>Group Case Reports 50% 20%</p> <p>Weight on Final Grade 20% 20% 40% 20% 100%</p>
<p>Prerequisites</p>	<p>There is no prerequisite.</p>
<p>Method of feedback from instructor to students for exams/papers</p>	<p>Students can get back their graded quizzes and assignment. They can also review their final paper.</p>

International University of Japan
Graduate School of International Management
2026 Winter Term

Course	Schedule code MGT1010401 MGT1010402	Course title Organizational Behavior	
Name of Instructor	Hirose, Shinichi		Credits 2
Instructor's contact information	Office#	Office Hours By appointment (flexible)	E-mail/Google Chat
Class Schedule Day / Period	(Class A) Every Tuesday: 10:30-12:00 & 13:00-14:30 JST / Periods 2 & 3 (Class B) Every Wednesday: 10:30-12:00 & 13:00-14:30 JST / Periods 2 & 3		

Course Description	<p>This course contributes to achieving specific learning objectives defined in the Curriculum Map by IUJ, as mentioned below. In addition, this course provides essential understanding and skills in organizational behavior (OB) to accomplish the school's objective. We learn how to manage today's organizations effectively and the "people" working inside. Organizations we deal with are profit-seeking corporations, public agencies, and all other forms of other. They consider their activities like work, not a hobby or mere socializing.</p> <p>What knowledge and skills are required to manage an organization of a few or thousands of people? First, we must explain the behaviors of various individuals and groups—considered complex interaction processes among individuals—in an orderly way. Next, we need to be able to analyze and predict individual and group behaviors. We will only be capable of managing or leading the entire organization after overcoming these challenges.</p> <p>The terms "management" or "leadership" should be used with great care since they evoke diverse and heterogeneous implications among people. As we proceed with the classes, we will gradually clarify what we mean by managing and leading organizations in modern society.</p> <p>Upon completing this course, you will have a comprehensive understanding of the nature of working people's minds, the various phenomena that occur under group work, and the mechanism of organizational structure.</p> <p>Also, you will be better prepared to lead your organization, either small or large, under solid OB theories and concepts foundations. Cases are designed to be gradually exposed to various simulated experiences that serve as anchors of your future career's managerial behaviors.</p> <p>A good understanding of organizational behavior is essential for ANY roles you assume upon graduation, as long as you work with others. With OB knowledge, you will be more capable of handling "people-related" issues in organizations.</p>
--------------------	---

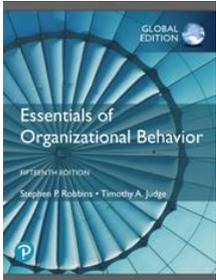

<p>Learning Objectives & Goals</p>	<p>Upon successful completion of this course, the class participants will achieve the goals of mastering the following:</p> <p>(L3-1) Ability to demonstrate an understanding of leadership concepts and practices — COMMON TO MBA, IMBA, AND JGDP</p> <ul style="list-style-type: none"> (a) Engagement in active listening and conduct of 2-way or multilateral conversation (b) Making constructive suggestions to deepen the group discussion (c) Exercising necessary leadership or followership behavior in the group discussion when needed <p>(L4-1) Demonstrable ability to formulate and define issues — 2YR MBA ONLY</p> <ul style="list-style-type: none"> (a) The capability of identifying the most critical issues under a given situation without being distracted by less critical factors (b) The ability to clarify the causes of critical issues by conducting analytical fact-gathering and finding implications from such sources. Also, it is required to be capable of making reasonable guesses when there are insufficient facts (c) The skills to unveil the hidden interrelationships among issues and to develop holistically integrated solutions and suggestions for the situation
<p>Contribution to the Diploma Policy (knowledge, skills, and attitude which can be acquired through this course for obtaining the degree concerned)</p>	<p>MM2: Able to identify and articulate common viewpoints among different and possibly conflicting opinions of those from different international backgrounds</p> <p>ML1: Able to demonstrate understanding of leadership concepts and practices</p> <p>ML2: Able to listen well and have empathy with other people</p> <p>MP1: Able to demonstrate the ability to formulate/define issues</p> <p>MP2: Able to demonstrate the ability to analyze and compute</p> <p>MP3: Able to demonstrate the ability to interpret concepts and data</p> <p>MP4: Able to demonstrate the ability to evaluate and make choices among alternatives</p> <p>MF1: Able to demonstrate understanding of Management Knowledge</p> <p>MD1: Able to apply the concepts of strategic management, recognizing internal and external strategic contexts</p> <p>MI4: Able to demonstrate the ability to establish systems with business knowledge for providing solutions to social issues sustainably</p>

<p>Delivery Methods</p>	<ol style="list-style-type: none"> 1. Case discussions <ul style="list-style-type: none"> ➤ Group discussions in the classroom at the beginning of the class <ul style="list-style-type: none"> ➤ Each student MUST join the class after reading and analyzing the Case individually ➤ Group discussions will take place in the classroom with pre-assigned group members ➤ Class-wide debate, where each student is supposed to speak up individually 2. Weekly CBT (computer-based testing) 3. Web-based teamwork simulation exercise and group report during Week 2 to Week 5 period 4. Supplementary lectures (Includes critical concepts of the week, special hot topics, and the Case wrap-up) 5. CBT Final Exam
<p>Assessment</p>	<p>[ASSESSMENT WEIGHTS]</p> <ol style="list-style-type: none"> a) Weekly Case Memos^[1]: 12% [WK 2, 3, 4, 6, 7, 8. See details below] b) CBT Weekly Quiz^[2]: 12% [WK 2, 3, 5, 6, 7, 8. See details below] c) Impact of your in-class speak-up and active participation: 20% d) Week 5 Group Presentation and the Simulation Exercise scores^[3]: 25% [See details below] e) Group Peer Review: 13% [Methods to ensure fairness to be explained on the Google Classroom when ready] f) Final Exam^[4]: 18% <p>[Details and date/time to be shared on the Google Classroom when ready]</p> <p>^[1] For SIX weeks of sessions, 1-2 pages (minimum one full page, maximum two pages) of <u>Case Memo is due by 09:00 a.m. on Tuesday for Tuesday Class</u> participants and <u>09:00 a.m. on Wednesday for Wednesday Class</u> participants. The template file will be provided electronically on the Google Classroom portal. Case memos are not graded (A, B, C...), and you will receive a Pass or Fail. The expected contents of the Case Memos are straightforward and basic. While you read the case material for the next class, you freely write down your thoughts and opinions based on the Case Questions provided for each Case by the instructor. There is no required fixed writing style for Memos. You will receive a Pass unless your submission has a problem with plagiarism or too little originality. You upload your Case Memo to the Classroom Assignment section in the Google Classroom portal.</p> <p>^[2] Weekly Quiz is a lightweight job if you carefully learn the textbook contents. It will typically take ten to twenty-five minutes. All assignments are given BEFORE the class, and the quizzes have a countdown time limit.</p>

[3] Each group (group assignment made by the instructor from the Week 2 session) will make **presentations** based on the group dynamics and leadership experiences encountered during the **Everest V3** simulation. After finishing all the instructor sessions, feedback and grading for group presentations will be returned to each group. The score weight of simulation scores is very small, while the presentation scores will be significant.

[4] Web-based Final Exam will be conducted in the PC room. You do not need to bring your device. The exam duration will be between 90 and 180 minutes. It will be conducted during the Final Exam period.

	Learning Objectives	
Assessment methods	L3-1	L4-1
Case Memos and Quiz	24%	
Speak-up Impact	15%	5%
Group Simulation and Presentation	20%	5%
Group Peer Review	8%	5%
Final Exam	10%	8%
Weight on Final Grade	77%	23%

Prerequisites	None.
Method of Feedback for Exams/Papers	Case Memo: Pass/Fail. Messages are sent in Case of a Fail Group Presentation: Commentary messages will be sent to each group by the end of Week 8 Final Essay: Commentary messages and rubric points forwarded to all participants individually before the grade release
Required Textbook(s)	Required Textbook: [Available for both printed, Kindle, and MyLab eBook (good for 24 mo.) formats] Robbins, S. P., & Judge, T. (2021). <i>Essentials of Organizational Behavior</i> (15th Global ed.). Boston: Pearson Education. (Refer to p.11 for details)  (Caution 1) Please make sure that you use the "Global Edition." A "US Only Edition" is incompatible with our text reading assignments and should not be used.

(Caution 2) There are books titled "Organizational Behavior" (without "Essentials of") written by the same authors. This book is different from the one we will use. Please be careful to make the proper selection.

ALL PARTICIPANTS WITH FORMAL REGISTRATION TO THIS CLASS SHOULD PURCHASE THE TEXTBOOK, especially the MyLab Access Code (bulk-purchased by OAA, no need to buy individually). IT IS BECAUSE COPYING ALL THE REQUIRED READING PARTS FROM THE LIBRARY OR OTHER PUBLIC SOURCES EXCEEDS THE LEVEL OF "FAIR USE" ALLOWED BY THE COPYRIGHT LAWS OF JAPAN. **BE COMPLIANT WITH THE LAWS BY ACQUIRING THE TEXTBOOK COPY ONLY FOR YOURSELF.**

[HOW TO PURCHASE YOUR COPY]

(OPTION 1) OAA WILL OFFER A PAPER-BASED TEXTBOOK ORDERING SERVICE ON YOUR BEHALF BEFORE THE CLASS STARTS

(OPTION 2) YOU CAN ORDER YOUR TEXTBOOK, EITHER PRINTED OR EBOOK, BY YOURSELF

- IF YOU CHOOSE THIS OPTION, PLEASE TAKE ACTION SOON. BOOK DELIVERY MAY TAKE SEVERAL WEEKS.

(OPTION 3) IF YOU FEEL YOU DO NOT NEED THE TEXTBOOK AFTER GRADUATION, eLab COMES WITH AN eBook THAT IS GOOD FOR 24 MONTHS ONLY

SUPPOSE THE ARRIVAL OF YOUR TEXTBOOK DELAYS MEET THE START OF THE OB SESSIONS. IN THAT CASE, THERE IS A TEMPORARY SUPPORT AVAILABLE. YOU CAN EITHER MAKE PARTIAL COPIES FROM THE MLIC RESERVE OR ASK THE LIBRARIAN TO LET YOU ACCESS THE ELECTRONIC TEXTBOOK RESOURCE.

[[SPECIAL ATTENTION]]

- THE 15th GLOBAL EDITION MADE HUGE CONTENT REVISIONS.
- THEREFORE, **YOU CANNOT USE PREVIOUS VERSIONS AS SUBSTITUTES.**
- MAKE SURE YOU GET THE 15th GLOBAL EDITION.

[TIPS: HOW TO "SKIM" THE TEXTBOOK]

- READING THE TEXTBOOK WORD-BY-WORD TAKES MUCH TIME
- PLEASE PAY ATTENTION TO THE FOLLOWING PARTS:
 1. TITLES OF EACH SECTION

	2. BOLD-TYPED WORDS 3. FIGURES AND TABLES
Reference Books	<ul style="list-style-type: none"> ➤ Levy, P. E. (2020). Industrial/organizational psychology: understanding the workplace (6th ed.). New York: Worth Publishers/Macmillan Learning. Class Schedule Day / Period	Wednesday 10:30 – 14:30		

Course Description	This course is particularly useful for students who are interested in starting their own business and want to learn different aspects of business management. This course is also suited to those involved in corporate entrepreneurship or in improving competitive positioning and transforming corporations towards value-creation. This course uses several concepts and knowledge from other courses (strategy, marketing, accounting) and is an efficient way to put them in practice in an integrative business plan.
Learning Objectives & Goals	Upon completion of this course, students will be able to: evaluate the necessary qualities and characteristics of the successful entrepreneurial profile; recognize and determine the steps necessary to open and operate a small business enterprise; identify the marketing, financial, leadership and other competencies needed by an entrepreneur; use information, projections, logic and critical thinking to recognize an opportunity and solve small business problems in a multicultural, ethical and legal environment; develop and present a Business Plan.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)	<p>Upon completion of this course, students will be able to:</p> <p>MM1: Able to demonstrate the sensitivity to different perspectives and opinions of those from different international backgrounds</p> <p>MM3: Able to acquire skills to communicate with people from diverse international backgrounds</p> <p>MS2: Able to outline strategies for socially responsible companies</p> <p>ML2: Able to listen well and have empathy with other people</p> <p>MP1: Able to demonstrate ability to formulate/define issues</p> <p>MP2: Able to demonstrate ability to analyze and compute</p> <p>MP3: Able to demonstrate ability to interpret concepts and data</p> <p>MP4: Able to demonstrate ability to evaluate and make choices among alternatives</p> <p>MF1: Able to demonstrate understanding of Management Knowledge</p> <p>MF4: Able to demonstrate understanding of Marketing Knowledge</p>

	MF5: Able to demonstrate understanding of Accounting Knowledge					
Delivery Methods	The course primarily uses a combination of lectures, class discussions, group and individual assignments. Note the following: 4 sessions on-line (Zoom) and 4 sessions in class (face-to-face).

Name of Instructor	Yokose, Tsutomu		Credits 1
Instructor's contact information	Office#	Office Hours Tuesday, 9:00-18:00 Wednesday, 9:00-18:00 Other date: By appointment	E-mail
Class Schedule Day / Period			

Course Description	<p>Due to the rapid change within today's global business environment, business leaders at every level and in every industry must balance various working styles, build efficient management teams, and develop sharp negotiation skills to remain competitive. This course will help students to understand the best practices in business negotiations as well as how to effectively resolve conflicts in everyday business situations.</p> <p>A business negotiation may be sometimes the formal affair that takes place across the proverbial bargaining table, in which a business people argues and discusses a wide variety of issues for either individual or mutual gain. Alternatively, such negotiations may be much less formal, such as a meeting between a business person and several fellow employees whose collaboration is need to get a job done.</p>
Learning Objectives & Goals	<p>Upon completion of this course, student should be able to:</p> <ol style="list-style-type: none"> 1. Outline strategies of negotiation, conflicts and business communication, which help students at the new start of business career after graduation, through discussions and practices in this program to have confidence in the daily tasks 2. Embody their knowledge, concept, theories and learnings in the other programs as the dynamic business conflicts resolution. 3. Gain the fundamental management skills required to succeed in students' future work environment as a business leader. Students will gain such skills through case studies, short cases and role playing in negotiation environment <p>This course provide students pragmatic environment to exercise their business capability by using their knowledge and theories in negotiation environment. Through the realistic situations which are settled in role playings, case studies and class discussion, students will be enable to gain the essential mind-set and own behaviors to be business leaders to manage negotiation. Through not only theoretical approach but also practical exercise, students will obtain the real life capability to lead business strategy and people.</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the	<p>For MBA/IMBA/JGDP(Management Concentration)</p> <p>ML1: Able to demonstrate understanding of leadership concepts and practices ML2: Able to listen well and have empathy with other people MD1: Able to apply the concepts of strategic management, recognizing internal and external strategic contexts</p>

Name of Instructor	Sheehan, Benjamin		Credits 2
Instructor's contact information	Office#	Office Hours Student consultation is available anytime, however, please email me to arrange an appointment where possible.	E-mail
Class Schedule Day / Period	Tue.2~3		

Course Description	<p>This unit is an important introduction to the management of successful advertising campaigns. Unless the advertising is based on research, well planned, and has a strong strategic focus, the campaign will not be successful - regardless of how good the creative is or how effective the media is planned. Therefore, advertising management is the keystone of successful advertising. This unit is of vital importance to all who study advertising or marketing communication. The course is designed around three sequential assessment pieces – each of which teaches real-world skills (quantitative and qualitative) that students will use post-graduation. Students are taught a range of advertising theories and hands-on techniques, including (1) how to uncover the hidden motivations driving buyer behavior and link advertising to those motivations, (2) how to compare competing brands across the dimensions that matter most to buyers, and (3) how to create professional, industry quality advertising briefs to manage a campaign. These techniques can be applied in both commercial (products & brands) and pro-social settings (public health campaigns, pro-environmental campaigns), across a range of media.</p>
Learning Objectives & Goals	<p>Upon successful completion of this course, you will:</p> <ul style="list-style-type: none"> • Be familiar with the role of the account manager, the advertiser, and the function of advertising management; • Understand the importance of research in generating consumer insights, developing advertising strategy, and preparing a comprehensive advertising brief; • Have examined the components of the advertising decision-making framework and understand how the process works; • Have developed a comprehensive knowledge of advanced advertising management theory; and • Have a full understanding of legal and ethical considerations and emergent issues within the field of advertising management.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the	<p>MF4: Able to demonstrate understanding of marketing knowledge MD1: Able to apply the concepts of strategic management, recognizing internal and external strategic contexts MD2: Able to demonstrate the ability to gather and interpret data MP2: Able to demonstrate ability to analyze and compute MP3: Able to demonstrate ability to interpret concepts and data</p>

degree concerned) N/A for language courses	MP4: Able to demonstrate ability to evaluate and make choices among alternatives
Delivery Methods	Each week, students are provided with a 90-min lecture covering theoretical material and a 90-min workshop covering the application of theory. This unit encourages learners to explore advertising management issues by applying theoretical concepts and drawing upon and enhancing critical thinking and analytical skills. Lectures provide a framework for discussion, problem-solving, and group interaction. Workshops demonstrate how current academic research can be applied to the advertising environment to deliver effective advertising management solutions as well as provide comprehensive examples of the techniques which need to be applied for the three assessment items.
Assessment	<p>Consumer Insight Analysis: 25%</p> <p>Students conduct interviews using the laddering technique in order to uncover consumer insights e.g., how people make choices between brands, what product attributes are important, what benefit(s) and/or value(s) do consumers receive from buying the product.</p> <p>Perceptual Mapping Analysis: 25%</p> <p>Perceptual mapping is an analysis tool used to understand the competitive market structure as perceived by consumers. Students conduct a survey and write a report.</p> <p>Advertising Brief Project: 50%</p> <p>Students use research, planning, and decision-making skills to develop an advertising brief that is both strategically sound and inspiring. The Ad Brief can be based on findings from assignments 1 and 2.</p>
Prerequisites	Nil.
Method of feedback from instructor to students for exams/papers	<p>Students will receive feedback in various forms throughout the semester:</p> <ul style="list-style-type: none"> • Informal: worked examples, such as verbal feedback in class, personal consultations – before or after class or on-campus or via Zoom by appointment • Formal: in writing, such as comments addressing specific marking criteria • Direct: to individual students, either in written form or via consultation • Indirect: to the whole class <p>At the end of the course, students will be asked to complete a survey, providing feedback to the instructor, which may be used to enhance future course delivery.</p>

Course	Schedule code MKG3030401	Course title Marketing Research	
Name of Instructor	Sheehan, Benjamin		Credits 2
Instructor's contact information	Office#	Office Hours Student consultation is available anytime, however, please email me to arrange an appointment where possible.	E-mail
Class Schedule Day / Period	Fri.4~5		

Course Description	<p>This course provides students with the fundamental marketing research skills they need while introducing many of the quantitative techniques currently used in modern marketing practice. The classes are a blend of traditional lecture and hands-on experience using research software under supervision. Students will gain real-world experience in the complete marketing research process: from idea generation, study design, measurement & sampling, data analysis, and reporting. The class is suitable for both first-time researchers and those looking for further development. Students will complete the class knowing how to design surveys and experiments, as well as perform a range of statistical analyses via easy-to-use software packages. These skills can then be applied to market segmentation and targeting; positioning and branding; pricing; product design; and advertising and promotion.</p>
Learning Objectives & Goals	<p>Upon successful completion of this course, you will be able to:</p> <ul style="list-style-type: none"> Convert a business problem into a research problem. Understand & execute the step-by-step marketing research process. Prepare and write a research report. Perform fundamental quantitative analyses.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	<p>MP1 Able to demonstrate ability to formulate / define issues MP2 Able to demonstrate ability to analyze and compute MP3 Able to demonstrate ability to interpret concepts and data</p> <p>MF4 Able to demonstrate understanding of Marketing Knowledge MF6 Able to demonstrate understanding of Data Analysis and Digital Technology</p> <p>MD2 Able to demonstrate ability to gather and interpret data MD3 Able to demonstrate ability to make a strategic decision under pressure</p>
Delivery Methods	<p>Each 3-hour session is divided into 2 parts: (A) A traditional lecture, where students are introduced to topics and course material and (B) A hands-on workshop, where students will get to practice developing surveys and experiments, data collection, and analysis techniques.</p>
Assessment	<p>1. Research Pitch (45%): Students are asked to submit a short-written pitch for a new marketing research project, highlighting why the research is necessary, potential outcomes from the research, and a basic plan of how they propose to conduct and</p>

	<p>analyze the hypothetical research.</p> <p>2. Research Report (45%): Students will be given the background of a hypothetical marketing research project and a data file. Using skills from the course, they are asked to perform the analysis and report the results. All of the required techniques will be demonstrated in class.</p> <p>3. In-class Participation (10%)</p>				
Prerequisites					
Method of feedback from instructor to students for exams/papers	<p>Students will receive feedback in various forms throughout the semester:</p> <ul style="list-style-type: none"> • Informal: worked examples, such as verbal feedback in class, personal consultations – before or after class or on-campus or via Zoom by appointment • Formal: in writing, such as comments addressing specific marking criteria • Direct: to individual students, either in written form or via consultation • Indirect: to the whole class <p>At the end of the course, students will be asked to complete a survey, providing feedback to the instructor, which may be used to enhance future course delivery.</p>				
Textbook(s)	<p>Required:</p> <p>Reference Books / Journal Articles:</p> <p>a)Title: SPSS Statistics: A Practical Guide (Allen, Bennett & Heritage, 2018), b)Edition: , c)Author: , d)Publisher: , e)Year: , f)ISBN:</p> <p>a)Title: Marketing Scales Handbook (Bruner, 2022), b)Edition: , c)Author: , d)Publisher: , e)Year: , f)ISBN:</p>				
Note on Textbooks and Reference Books	<p>Students do not have to buy any textbooks for this class (all books are available in the MLIC). However, students must purchase a copy of SPSS Grad Pack STANDARD edition. Approximate cost is Y5,000 with student discount.</p> <p>Please ensure you purchase the STANDARD edition - available from https://studentdiscounts.com/?adoper=208636_2_PR1 or https://www.hearme.software/SPSS-Grad-Pack-Selection-v29?adoper=208636_2_PR3</p> <p>For students with financial difficulties, please contact the Unit Coordinator (Prof. Sheehan) to make other arrangements. You can still participate in the class.</p>

Course	Schedule code OPR1010	Course title Operations Management	
Name of Instructor	Wenkai Li		Credits: 2
Instructor's contact information	Office#	Office Hours After class or by appointment	E-mail
Class Schedule Day / Period	Session 1: Every Monday, 2:40pm-5:50pm Session 2: Every Tuesday, 2:40pm-5:50pm		

Course Description	<p>Operations is one of three basic functions/pillars in any business organization. Operations function typically manages more employees and physical assets than does any other function in a business organization. Operations Management (OM) is the management of systems or processes that create goods and/or provide services, within an organization. Operations is the engine for a company that creates values in a firm's value chain, involving all aspects of the production and delivery of goods and services.</p> <p>OM is the core required course for MBA and JGDP students and a core elective course for other students. It serves as the basis for other courses such as Managerial Accounting (ACT1020), Digital Supply Chain Management (OPR3010), Managing Product Development (OPR3020), Service Management (MGT2020), Monozukuri (Manufacturing) Management in Japan (JDP2030) etc.</p> <p>OM is helpful for students seeking careers such as consultants, operational managers, general managers, financial analysts, and policy makers in manufacturing and service industries etc.</p>
Learning Objectives & Goals	<p>Upon completion of this course, students will be able to:</p> <p>(1): Demonstrate understanding of business knowledge on operations management (AACSB C5-3)</p> <p>(2): Demonstrate understanding of Japanese industries and manufacturing strategy (AACSB C8-1)</p> <p>For the purpose of accomplishment of course objectives, this course will familiarize students with basic knowledge of various production and operations management processes, including a strategic view of operations management, process thinking, lean thinking, quality management, and inventory management. Japanese way of operations</p>

	<p>management and quality control will also be introduced.</p> <p>Students will learn how to establish, maintain, and reengineer the processes that firms use to transform inputs into goods and services. Operations strategy, process selection, lean thinking, quality control, inventory management, and various other qualitative or quantitative techniques will be introduced for both manufacturing and service industries. The integration of operations decisions with other functional areas such as marketing, finance, and human resource will be introduced in the course. Other contemporary concepts such as supply chain management, globalization, environmental concerns and sustainability will also be discussed.</p>																										
<p>Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned)</p>	<p>MF3 (for MBA, JGDP, MBA-GX): Able to demonstrate understanding of IT/OM/SCM Knowledge</p> <p>MD1 (for IMBA): Able to apply the concepts of strategic management, recognizing internal and external strategic contexts</p> <p>MD3 (for IMBA): Able to demonstrate ability to make a strategic decision under pressure.</p> <p>MJ1 (for JGDP): Able to demonstrate understanding of Japanese industries, society, and business environments</p> <p>MP1 (for MBA): Able to demonstrate ability to formulate/define issues</p> <p>MP2 (for MBA): Able to demonstrate ability to analyze and compute</p> <p>MP3 (for MBA): Able to demonstrate ability to interpret concepts and data</p> <p>MP4 (for MBA): Able to demonstrate ability to evaluate and make choices among alternatives</p>																										
<p>Delivery Methods</p>	<p>Class lectures, in-class games, case studies, group discussions, and field trip.</p>

Other Materials	Case Materials: Available from the textbook. Will be announced during the semester.

Class Outlines	Class	Contents	
	1	Topic	Introduction. Operations Function (Chap. 1)
Required preparation /homework		Read textbook Chap. 1, preview professor lecture notes	2.0 h (hour)
Required post-study		Review professor lecture notes. Watch class videos	2.0 h
Topic		Operations and Supply Chain Strategy I (Chap. 2)	
Required preparation /homework		Read textbook Chap. 2, preview professor lecture notes	1.0 h
Required post-study		Read the case study in the 8th Ed. textbook (Page 424-430): Operations Strategy at BYD of China, Electrifying the World's Automotive Market	5.0 h

		Conduct group discussions on the BYD case.	
3	Topic	Operations and Supply Chain Strategy II (Chap. 2), In-class discussion on the BYD case	
	Required preparation /homework	Read textbook Chap. 2, preview professor lecture notes	1.0 h
	Required post-study	Review professor lecture notes, watch class video recording.	3.0 h
4	Topic	Process Selection I (Chap. 4)	
	Required preparation /homework	Read textbook Chap. 4, preview professor lecture notes	2.0 h
	Required post-study	Review professor lecture notes. Watch class videos	2.0 h
5	Topic	Process Selection II (Chap. 4)	
	Required preparation /homework	Read textbook Chap. 4, preview professor lecture notes	1.0 h
	Required post-study	Complete Group-Discussion Assignment (Chap. 4)	3.0 h
6	Topic	Process-Flow Analysis I (Chap. 6)	
	Required preparation /homework	Read textbook Chap. 6, preview professor lecture notes	2.0 h
	Required post-study	Review professor lecture notes.	1.0 h
7	Topic	Process-Flow Analysis II (Chap. 6)	
	Required preparation /homework	Read textbook Chap. 6, preview professor lecture notes	2.0 h
	Required post-study	Participate in one of the TA sessions (for Chap. 6, flow chart) Read the mini case: Process Flow Innovation at Kaiser Permanente	3.5 h
8	Topic	Lean thinking and Lean Systems I (Chap. 7)	
	Required preparation /homework	Read textbook Chap. 7, Preview professor lecture notes	1.0 h
	Required post-study	Review professor lecture notes.	0.5 h

	9	Topic	Lean thinking and Lean Systems II (Chap. 7)	
		Required preparation /homework	Read Eastern Gear Case (Textbook Page 432(8 th Ed), Page 418 (7 th Ed), Page 450(6 th Ed)). Read textbook Chap. 7 Preview professor lecture notes	3.0 h
		Required post-study	Review professor lecture notes.	1.0 h
	10	Topic	Lean thinking and Lean Systems III (Chap. 7)	
		Required preparation /homework	Read textbook Chap. 7, Preview professor lecture notes	1.0 h
		Required post-study	Review professor lecture notes, watch class videos (1 h). Solve Week 5 TA session exercises and participate in Week 5 TA session (4 h)	5.0 h
	11	Topic	Managing Quality I (Chap. 8)	
		Required preparation /homework	Read textbook Chap. 8, Preview professor lecture notes	2.0 h
		Required post-study	Review professor lecture notes	0.5 h
	12	Topic	Managing Quality II (Chap. 8)	
		Required preparation /homework	Read textbook Chap. 8, Preview professor lecture notes	1.0 h
		Required post-study	Complete Chap. 8 group assignment and submit a group report (2 h). Work on Homework #1 (3 h)	5.0 h
13	Topic	Quality Control and Improvement I (Chap. 9)		
	Required preparation /homework	Read textbook Chap. 9, Preview professor lecture notes	1.0 h	
	Required post-study	Review professor lecture notes	1.0 h	
14	Topic	Quality Control and Improvement II (Chap. 9)		
	Required preparation /homework	Read textbook Chap. 9, Preview professor lecture notes	1.0 h	
	Required post-study	Review professor lecture notes (1 h) Complete Homework #1 (3 h)	4.0 h	

	15	Topic	Independent Demand Inventory I (Chap. 14)	
		Required preparation /homework	Read textbook Chap. 14, Preview professor lecture notes	1.0 h
		Required post-study	Review professor lecture notes	0.5 h
	16	Topic	Independent Demand Inventory II (Chap. 14)	
		Required preparation /homework	Read textbook Chap. 14, Preview professor lecture notes	2.0 h
		Required post-study	1). Participate in Week 9 Field Trip. Field trips are optional. Schedules are to be confirmed (8 h). 2). Solve Week 10 Extra TA session I exercises and participate in the Extra TA session I (5 h) 3). Participate in Week 10 Extra TA session II (2 h) 4). Review all materials, prepare for the final exam.	15.0 h
		Total		76.0 h
Others	<p>1). The definitions of GSIM Competency goals and Competency objectives are available at: https://www.iuj.ac.jp/im-info/learning_goals/</p> <p>2). Lecture notes, schedule changes, homework questions, exam information, and other materials for this course will be updated at the course folder: \\iuj-home\IM materials\2025-2026\Winter\Operations-Management or Google Classroom. Students should visit this folder frequently for newly posted online materials.</p> <p>3). Details of the exams, factory tours, presentations, assignments, and quizzes will be announced in class.</p> <p>4). Course policies: (a) All assignments, exams, and presentations should be completed to receive a passing grade for this course. (b) No late assignment submissions will be accepted. Course	Schedule code SEM6030404	Course title Advanced Seminar III	
Name of Instructor	Zhang Zhang, Yingying		Credits 2
Instructor's contact information	Office#	Office Hours After class or by appointment.	E-mail
Class Schedule Day / Period	unfixed		

Course Description	The advanced seminar III aims to clarify the personalized issues on research to ensure its progress and finalization. Issues such as academic writing consistency, plagiarism, reference style will be reinforced. At this late stage of research progress, we will focus on the personalization of research project of each and customize the research seminar in one-to-one base. Some of the activities during each individual research meetings, including but not limited to, data source setting, research design consistency review, advices on theoretical framework setting and refinement, research method refinement, interview protocol and semi-structured question design, questionnaire definition, etc. depending on the nature of research project of each student.		
Learning Objectives & Goals			
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses			
Delivery Methods	Punctual specific research seminar with lecture format, with frequent use of individual research meeting for tutorial and research progress advices and monitoring.		
Assessment	A final research paper is requested to delivery by the end of term, simulating the final delivered research report or thesis. The content includes research title, research question, objective, theoretical framework or literature review, methodology and preliminary findings. For case report or other research report types, more structure flexibility is allowed, but a preliminary draft version is also required.		
Prerequisites	No.		
Method of feedback from instructor to students for exams/papers

Class Schedule Day / Period	unfixed		

Course Description	<p>IUJ students are required to produce a piece of independent research as part of their course requirements. This seminar series provides access to 1-on-1 supervision and training - to help you along your research journey. The seminar series is designed to provide personalized guidance - based on your existing skills and research topic.</p> <p>In broad terms, the seminars will examine key concepts and methods for marketing research - helping you to apply methodological and analytical tools to the topic of your choice. Throughout the supervision process, you will learn basic techniques of research in marketing, including problem definition, research design, questionnaire construction, experimental design, sampling strategies, data collection, data analysis, and result presentation. During our personalized sessions, we will also discuss how marketing research can help managers make business decisions and how we can transform research findings into actionable business insights. Students are expected to define the research problem, develop a research plan, collect and analyze data on their own (with assistance), and present findings and theoretical and practical implications of their work.</p>
Learning Objectives & Goals	<p>The goal of the seminar series is to provide supervision and guidance to students as they learn:</p> <ol style="list-style-type: none"> 1. The fundamentals sufficient to define a quantitative marketing research problem. 2. The types of variables used in quantitative marketing models 3. How to develop testable hypotheses 3. How to find and use quantitative measurement instruments to collect data 4. How to design a sound, rigorous survey or experiment 5. How to collect and analyze data using SPSS or PSPP 6. How to write-up research results in APA format, inline with discipline norms 7. How to communicate theoretical and practical research contributions and the limitations of their work
Contribution to the Diploma Policy	

(knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses					
Delivery Methods	Weekly meetings - either face-to-face or via Zoom. Please note: Student research is to be driven by the student. I will be available to provide as much guidance and supervision as is needed e.g., we can meet more than once per week, but students should take the initiative to seek additional help as required.				
Assessment	The goal is to produce a piece of research of publishable quality - although publication is not necessary. 100% of students grade is awarded based on progress towards this goal.				
Prerequisites	Nil. However, it is strongly recommended that students take or plan to take Consumer Behavior and Marketing Research courses. The Consumer Behavior course will provide you with an overview of marketing theory - from which you can develop your research ideas. The Marketing Research course will provide you will the fundamental skills required to complete a Master's level research project.				
Method of feedback from instructor to students for exams/papers	Students will receive feedback in various forms throughout the semester: <ul style="list-style-type: none"> • Informal: worked examples, such as verbal feedback in meetings, personal consultations etc. • Formal: in writing, such as comments on drafts of your manuscript and research plan. • Direct: to individual students, either in written form or via consultation. • Indirect: on occasion, all students will meet together - to learn as a group and from each-other. 				
Textbook(s)	Required: Reference Books / Journal Articles: a)Title: SPSS Statistics: A Practical Guide, b)Edition: , c)Author: Allen, Bennett & Heritage, d)Publisher: , e)Year: 2018, f)ISBN: a)Title: Marketing Scales Handbook, b)Edition: , c)Author: Bruner, d)Publisher: , e)Year: 2022, f)ISBN:

Course Description	The Advanced Research Seminar introduces students to research and guides them through the process of writing their research report. The seminar is conducted from an academic perspective.
Learning Objectives & Goals	After attending this seminar, you should be able to <ul style="list-style-type: none"> - Understand the difference between casual and academic writing. - Be aware of plagiarism and AI content generation. - Learn how to organize an academic paper - Focus on your main topic - Apply different research strategies (e.g., using Boolean operators or reviewing previous work such as systematic literature articles on the main topic) - Identify the gap in the literature and formulate your research questions
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	
Delivery Methods	Regular weekly meetings with all students. Each student will share the progress of his/her research with all other participants.
Assessment	Based on participation, work progress and final delivery
Prerequisites	
Method of feedback from instructor to students for exams/papers	Weekly, during the weekly meeting. After receiving feedback and constructive criticism, he/she determines the work to be done the following week. The seminar includes individual meetings, especially when students are completing or nearing completion of their report.
Textbook(s)	Required: Reference Books / Journal Articles:
Note on Textbooks and Reference Books

Others	<p>Each student will use the methodology that best suits his or her research. Qualitative methods are usually recommended when the research questions are open-ended and divergent (e.g., How...). In contrast, when the research questions are more conclusive (e.g., What, Why), a quantitative method is recommended. Case studies are also considered.</p>

Course	Schedule code SEM7010409	Course title Research Seminar I	
Name of Instructor	Zhang Zhang, Yingying		Credits 1
Instructor's contact information	Office#	Office Hours After class or by appointment.	E-mail
Class Schedule Day / Period	unfixed		

Course Description	The research seminar I aims to clarify the basic knowledge on research, including what research is, what academic writing consists of, what plagiarism is, what is the common sense language and research terms. At a later stage of term, personalization of research project of each will be customized during the research seminar in one-to-one base. Some of the activities during each individual research meetings, including but not limited to, literature review and search methodology, data source setting, research design consistency, advices on theoretical framework setting and refinement, research method refinement, interview protocol and semi-structured question design, questionnaire definition, etc. depending on the nature of research project of each student.		
Learning Objectives & Goals			
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses			
Delivery Methods	Punctual specific research seminar with lecture format, with frequent use of individual research meeting for tutorial and research progress advices and monitoring.		
Assessment	A final research paper is requested to delivery by the end of term, simulating the final delivered research report or thesis. The content includes research title, research question, objective, theoretical framework or literature review, methodology and preliminary findings. For case report or other research report types, more structure flexibility is allowed, but a preliminary draft version is also required.		
Prerequisites	No.		
Method of feedback from instructor to students for exams/papers

Course Description	<p>This course is for year-long research seminars for 1-year program students. It is designed to lay the foundations of research writing and help students to conduct their own research. In the Winter term, there will be joint seminars with all students. In the Spring semester, however, the seminar will be conducted as an individual consultation based on each person's topic and progress.</p> <p>After taking this course, students become acquainted with research format, research designs, and quality issues. They can develop their own research projects and execute them properly. They are expected to produce a preliminary draft by the end of the term. The draft will be expanded in the subsequent terms and eventually become the final research report.</p>
Learning Objectives & Goals	The objective of the Research Seminar is to improve the quality of work by each student toward drafting a Research Report. Advice will be provided through face-to-face consultations as well as advice through feedback on drafts. Additional knowledge and information will be provided based on students' research interests.
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	
Delivery Methods	The Research Seminar will be conducted through individual supervision and advice. During the Winter term, students are expected to make presentations of their research proposal and subsequent progress 1~2 times.
Assessment	Participation 30% Proposal or draft at the end of a term 70% Total 100%
Prerequisites	None
Method of feedback from instructor to students for exams/papers	Individual feedback will be given to students through face-to-face discussions as well as comments by email.

Name of Instructor	Sheehan, Benjamin		Credits 1
Instructor's contact information	Office#	Office Hours Student consultation is available anytime, however, please email me to arrange an appointment where possible.	E-mail
Class Schedule Day / Period	unfixed		

Course Description	<p>IUJ students are required to produce a piece of independent research as part of their course requirements. This seminar series provides access to 1-on-1 supervision and training - to help you along your research journey. The seminar series is designed to provide personalized guidance - based on your existing skills and research topic.</p> <p>In broad terms, the seminars will examine key concepts and methods for marketing research - helping you to apply methodological and analytical tools to the topic of your choice. Throughout the supervision process, you will learn basic techniques of research in marketing, including problem definition, research design, questionnaire construction, experimental design, sampling strategies, data collection, data analysis, and result presentation. During our personalized sessions, we will also discuss how marketing research can help managers make business decisions and how we can transform research findings into actionable business insights. Students are expected to define the research problem, develop a research plan, collect and analyze data on their own (with assistance), and present findings and theoretical and practical implications of their work.</p>
Learning Objectives & Goals	<p>The goal of the seminar series is to provide supervision and guidance to students as they learn:</p> <ol style="list-style-type: none"> 1. The fundamentals sufficient to define a quantitative marketing research problem. 2. The types of variables used in quantitative marketing models 3. How to develop testable hypotheses 3. How to find and use quantitative measurement instruments to collect data 4. How to design a sound, rigorous survey or experiment 5. How to collect and analyze data using SPSS or PSPP 6. How to write-up research results in APA format, inline with discipline norms 7. How to communicate theoretical and practical research contributions and the limitations of their work
Contribution to the Diploma Policy (knowledge, skills and	

attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses					
Delivery Methods	Weekly meetings - either face-to-face or via Zoom. Please note: Student research is to be driven by the student. I will be available to provide as much guidance and supervision as is needed e.g., we can meet more than once per week, but students should take the initiative to seek additional help as required.				
Assessment	The goal is to produce a piece of research of publishable quality - although publication is not necessary. 100% of students grade is awarded based on progress towards this goal.				
Prerequisites	Nil. However, it is strongly recommended that students take or plan to take Consumer Behavior and Marketing Research courses. The Consumer Behavior course will provide you with an overview of marketing theory - from which you can develop your research ideas. The Marketing Research course will provide you will the fundamental skills required to complete a Master's level research project.				
Method of feedback from instructor to students for exams/papers	Students will receive feedback in various forms throughout the semester: <ul style="list-style-type: none"> • Informal: worked examples, such as verbal feedback in meetings, personal consultations etc. • Formal: in writing, such as comments on drafts of your manuscript and research plan. • Direct: to individual students, either in written form or via consultation. • Indirect: on occasion, all students will meet together - to learn as a group and from each-other. 				
Textbook(s)	Required: Reference Books / Journal Articles: a)Title: SPSS Statistics: A Practical Guide, b)Edition: , c)Author: Allen, Bennett & Heritage, d)Publisher: , e)Year: 2018, f)ISBN: a)Title: Marketing Scales Handbook, b)Edition: , c)Author: Bruner, d)Publisher: , e)Year: 2022, f)ISBN:

Course	Schedule code SEM7010413	Course title Research Seminar I	
Name of Instructor	Sakurai, Mihoko		Credits 1
Instructor's contact information	Office#	Office Hours	E-mail
Class Schedule Day / Period	unfixed		

Course Description	<p>In this course, students will learn how to structure their research. Starting with forming research interests, defining research question, choosing research methodology and setting expected outcome of your research.</p> <p>Research can be done through desktop activities, but I strongly recommend to have some interactions i.e., a research interview with practitioners either in your country or in Japan during your research activities.</p> <p>Depending on the number of students, we will do a round of reading (read by turns) during the course.</p>
Learning Objectives & Goals	<p>Define research question</p> <p>Choose research methodology</p> <p>Set research outcome</p>
Contribution to the Diploma Policy (knowledge, skills and attitude which can be acquired through this course for obtaining the degree concerned) N/A for language courses	
Delivery Methods	Reading by turns with all students, research presentations and feedback
Assessment	<p>Student must submit a research report at the end of the semester. The research report at this stage should not be a completed version. The goal is to determine the scope of your case study or feasibility study and plan the research activities.</p> <p>It is recommended that preliminary research be conducted to accomplish this goal.</p>
Prerequisites	N/A
Method of feedback from instructor to students for exams/papers	Feedback will be provided for a round of reading and research presentations through face-to-face and online meetings
Textbook(s)	<p>Required:</p> <p>Reference Books / Journal Articles:</p>
